Medicine and Modern Warfare ,2016-08-29 After years at the margins of medical history the relationship between war and medicine is at last beginning to move centre stage The essays in this volume focus on one important aspect of that relationship the practice and development of medicine within the armed forces from the late nineteenth century through to the end of the Second World War During this crucial period medicine came to occupy an important position in military life

especially during the two world wars when manpower was at a premium Good medical provisions were vital to the conservation of manpower protecting servicemen from disease and returning the sick and wounded to duty in the shortest possible time A detailed knowledge of the serviceman s mind and body enabled the authorities to calculate and standardise rations training and disciplinary procedures Spanning the laboratory and the battlefield and covering a range of national contexts the essays in this volume provide valuable insights into different national styles and priorities They also examine the relationship between medical personnel and the armed forces as a whole by looking at such matters as the prevention of disease the treatment of psychiatric casualties and the development of medical science The volume as a whole demonstrates that medicine became an increasingly important part of military life in the era of modern warfare and suggests new avenues and approaches for future study

Emergency Propaganda Kumar Ramakrishna,2013-04-15 Sheds new light on the hitherto neglected years of the Emergency 1955-58 demonstrating how it was British propaganda which decisively ended the shooting war in December 1958 The study argues for a concept of propaganda that embraces not merely words in the form of film radio and leaflets but also deeds

Darwin and International Relations Bradley A. Thayer,2014-07-11 Pathbreaking and controversial Darwin and International Relations offers the first comprehensive analysis of international affairs of state through the lens of evolutionary theory Bradley A Thayer provides a new method for investigating and

explaining human and state behavior while generating insights into the origins of human and animal warfare ethnic conflict and the influence of disease on international relations Using ethnological and statistical studies of warfare among tribal societies Thayer argues that humans wage war for reasons predicted by evolutionary theory to gain and protect vital resources but also for the physically and emotionally stimulating effects of combat Thayer demonstrates that an evolutionary understanding of disease will become a more important part of the study of international relations as new strains of diseases emerge and advances in genetics make biological warfare a more effective weapon for states and terrorists He also explains the deep causes of ethnic conflict by illuminating how xenophobia and ethnocentrism evolved in humans He notes that these behaviors once contributed to our ancestors success in radically different environments but they remain a part of us Darwin and International Relations makes a major contribution to our understanding of human history and the future of international relations

rape is about power theories Indebted to a growing body of sophisticated feminist analyses about rape victims Bourke here shifts the emphasis from the victims to the perpetrators in order to place rapists in their historical context An invaluable study this book delivers the hard truth that if we are to imagine a world free of unwanted sexual violence then we must consider the issue of rape from every angle Army History ,1989 Home Run Howard R. Representations of Masculinity in Literature and Film Sara Martín,2020-09-11 How are men represented on the printed page the stage and the screen What do these representations say about masculinity in the past the present and the future The twelve essays in this volume explore the different ways in which men and masculinity have been represented from the plays of William Shakespeare to the science fiction of Richard K Morgan passing through classic fiction by Emily Bront and Charles Dickens and popular favourites by Terry Pratchett and Isaac Asimov without forgetting the Star Wars saga Collectively these essays argue that although much has been written about men it has been done from a perspective that does not see masculinity as a specific feature in need of critical appraisal Men need to be made aware of how they are represented in order to alter the toxic patriarchal models handed down to them and even break the extant binary gender models For that it is important that men distinguish patriarchy from masculinity as is done here and form anti patriarchal alliances with each other and with women This book is then an invitation to men s liberation from patriarchy by raising an awareness of its crippling constraints

Air University Library Index to Military Periodicals ,1997 *Red Coat, Green Machine* Charles Kirke,2014-07-04 How different were the men who fought at Blenheim and at Goose Green Is there a human thread that connects the redcoat of 300 years ago with the British soldier of today What would they find in common if they faced a common foe This book is about the people in the Army and the very human interactions between them in their daily lives It marries the disciplines of Social Anthropology and Military History to provide a novel way of looking at the anatomy of the British Army at unit level from an entirely human perspective Concentrating on the attitudes expectations and concerns expressed by the people involved it sets out a set of simple models of life at regimental duty that can be used to describe analyze and explain their behaviour over the past 300 years The book is grounded on what soldiers of all ranks have said using the author s research interview material for the modern witnesses and memoirs diaries and letters published and unpublished for earlier ones

Multivocal Archaeologies of the Pacific War, 1941-45 Ben Raffield,Yu Hirasawa,Neil Price,2023-07-21 This volume draws together the ground breaking work of researchers and archaeological practitioners working in multiple countries to explore and understand the material and cultural impacts of the Pacific War The combat

taking place in the Pacific region during the years 1941-45 was characterized by a brutality and violence unmatched in any other theatre of the Second World War. Described by indigenous Micronesians as a typhoon, the war was an unstoppable force that rolled across the islanders' homes leaving only a trail of destruction in its wake with physical, psychological and cultural impacts that continue to resonate today. This difficult period is examined in a variety of ways through chapters that include targeted studies of archaeological sites, wider surveys of battlefield landscapes and the ways in which we commemorate the experiences and legacies of both combatants and civilian populations. The translation of important research by Okinawan, Japanese and Russian archaeologists brings into focus regions that have previously been neglected in Anglophone literature and enriches this comprehensive exploration of the archaeology of the Pacific War. This book will be of interest to archaeological practitioners, students and members of the general public working in conflict studies or with an interest in the material culture history and legacies of the Pacific War.

Men Against Fire S. L. A. Marshall, 2012-11-15 S L A Slam

Marshall was a veteran of World War I and a combat historian during World War II. He startled the military and civilian world in 1947 by announcing that in an average infantry company no more than one in four soldiers actually fired their weapons while in contact with the enemy. His contention was based on interviews he conducted immediately after combat in both the European and Pacific theaters of World War II. To remedy the gunfire imbalance, he proposed changes to infantry training designed to ensure that American soldiers in future wars brought more fire upon the enemy. His studies during the Korean War showed that the ratio of fire and more than doubled since World War II.
