A History of the Quests for the Historical Jesus, Volume 1 Colin Brown, Craig A. Evans, 2022-11-08 A comprehensive two volume reassessment of the quests for the historical Jesus that details their origins and underlying presuppositions as well as their ongoing influence on today s biblical and theological scholarship Jesus life and teaching is important to every question we ask about what we believe and why we believe it And yet there has never been common agreement about his identity intentions or teachings even among first century historians and scholars Throughout history different religious and philosophical traditions have attempted to claim Jesus and paint him in the cultural narratives of their heritage creating a labyrinth of conflicting ideas From the evolution of orthodoxy and quests before Albert Schweitzer s famous Old Quest to today s ongoing questions about criteria methods and sources A History of the Quests for the Historical Jesus not only chronicles the developments but lays the groundwork for the way forward The late Colin Brown brings his scholarly prowess in both theology and biblical studies to bear on the subject assessing not only the historical and exegetical nuts and bolts of the debate about Jesus of Nazareth but also its philosophical sociological and theological underpinnings Instead of seeking a bedrock of facts Brown stresses the role of hermeneutics in formulating questions and seeking answers Colin Brown was almost finished with the manuscript at the time of his passing in 2019 Brought to its final form by Craig A Evans this book promises to become the definitive history and assessment of the quests for the historical Jesus Volume One covers the period from the beginnings of Christianity to the end of World War II Volume Two sold separately covers the period from the post War era through contemporary debates

Feminization of Quest-Romance Dana A. Heller, 2014-03-19 What happens when a woman dares to imagine herself a hero Questing she sets out for unknown regions Lighting a torch she elicits from the darkness stories never told or heard before The woman hero sails against the tides of great legends that recount the adventures of heroic men legends deemed universal timeless and essential to our understanding of the natural order that holds us and completes us in its spiral Yet these myths and rituals do not fulfill her need for an empowering self image nor do they grant her the mobility she requires to imagine enact and represent her quest for authentic self knowledge The Feminization of Quest Romance proposes that a female quest is a revolutionary step in both literary and cultural terms Indeed despite the difficulty that women writers face in challenging myths rituals psychological theories and literary conventions deemed universal by a culture that exalts masculine ideals and universalizes male experience a number of revolutionary texts have come into existence in the second half of the twentieth century by such American women writers as Jean Stafford Mary McCarthy Anne Moody Marilynne Robinson and Mona Simpson all of them working to redefine the literary portrayal of American women's quests They work in part by presenting questing female characters who refuse to accept the roles accorded them by restrictive social norms even if it means sacrificing themselves in the name of rebellion In later texts female heroes survive their lighting out experiences to explore diverse alternatives to the limiting roles that have circumscribed female development This study of *The Mountain Lion* *Memories of a Catholic Girlhood* *Coming of Age in Mississippi* *Housekeeping* and *Anywhere but Here* identifies transformations of the quest romance that support a viable theory of female development and offer literary patterns that challenge the male monopoly on transformative knowledge and heroic action **Handbook for the Study of the**

Liberalisation of European Electricity, Natural Gas and Petroleum Markets Henning Matthiesen, 2023-04-21 Doctoral Thesis Dissertation from the year 2020 in the subject Law European and International Law Intellectual Properties grade 2 2 Leuphana Universität Lüneburg Fakultät Wirtschaftswissenschaften language English abstract This doctoral thesis examines how European merger control law is applied to the energy sector and to which extent its application may facilitate the liberalisation of the electricity natural gas and petroleum industries so that only those concentrations will be cleared that honour the principles of the liberalisation directives In 2007 the Commission emphasized that a real internal European

energy market is essential to meet Europe's three energy objectives. These were, for example, competitiveness to cut costs for citizens and undertakings to foster energy efficiency and investment sustainability including emissions trading and security of supply with high standards of public service obligations. The EU issued three pre-liberalisation directives since the 1990s. Dissatisfied with the existing monopolistic structures in Germany through demarcation and exclusive concession agreements for the supply of electricity and natural gas which were until 1998 exempted from the cartel prohibition provision and the prevalence of exclusive rights on the energy markets, the Commission triggered infringement proceedings against four Member States. The CJEU confirmed that the Commission has the power to abolish monopoly rights under certain circumstances and the rulings had the effect of convincing the member states to enter into negotiations for an opening up of energy markets owing to the internal market energy liberalization directives 1996, 1998, 2003, 2009, 2019. The 2nd liberalisation package of 2003 brought a widening of market opening and acceleration of pace of market opening to a greater number of eligible customers and an increase in the provisions on management and legal unbundling. The 3rd energy package of 2009 addressed ownership unbundling of key infrastructure ownership and energy wholesale and retail supply consisting of three regulations and two directives. The 4th liberalization package inter alia consists of a new IEMD 2019 and IGMD 2019 and addresses energy efficiency and rules on good governance in the Energy Union. A brief analysis of the economic implications of concentrations is followed by an assessment of the evolution of European merger control law since 1989, 1997, and 2004. Then the theoretical findings are contrasted to the results of recent merger proceedings in the energy sector.

Untaming the Frontier in Anthropology, Archaeology, and History Bradley J. Parker, Lars

Rodseth, 2023-01-24. Despite a half century of attempts by social scientists to compare frontiers around the world, the study of these regions is still closely associated with the nineteenth century American West and the work of Frederick Jackson Turner. As a result, the very concept of the frontier is bound up in Victorian notions of manifest destiny and rugged individualism. The frontier, it would seem, has been tamed. This book seeks to open a new debate about the processes of frontier history in a variety of cultural contexts, untaming the frontier as an analytic concept and releasing it in a range of unfamiliar settings. Drawing on examples from over four millennia, it shows that throughout history societies have been formed and transformed in relation to their frontiers and that no one historical case represents the normal or typical frontier pattern. The contributors, historians, anthropologists, and archaeologists, present numerous examples of the frontier as a shifting zone of innovation and recombination through which cultural materials from many sources have been unpredictably channeled and transformed. At the same time, they reveal recurring processes of frontier history that enable world historical comparison: the emergence of the frontier in relation to a core area, the mutually structuring interactions between frontier and core, and the development of social exchange, merger, or conflict between previously separate populations brought together on the frontier. Any frontier situation has many dimensions, and each of the chapters highlights one or more of these from the physical and ideological

aspects of Egypt's Nubian frontier to the military and cultural components of Inka outposts in Bolivia to the shifting agrarian religious and political boundaries in Bengal They explore cases in which the centripetal forces at work in frontier zones have resulted in cultural hybridization or creolization and in some instances show how satellite settlements on the frontiers of core polities themselves develop into new core polities Each of the chapters suggests that frontiers are shaped in critical ways by topography climate vegetation and the availability of water and other strategic resources and most also consider cases of population shifts within or through a frontier zone As these studies reveal transnationalism in today's world can best be understood as an extension of frontier processes that have developed over thousands of years This book's interdisciplinary perspective challenges readers to look beyond their own fields of interest to reconsider the true nature and meaning of frontiers

Ghost Storeys Cameron Macdonell, 2017-07-04 Most studies of modern Gothic media assume that beyond the 1830s modern Gothic architecture and literature had very little in common The work of Ralph Adams Cram 1863-1942 America's most prolific Gothic Revival architect and an author of ghost stories challenges that assumption The first interdisciplinary study of Cram's aesthetics Cameron Macdonell's *Ghost Storeys* deconstructs the boundaries of Gothic architecture and literature through a microhistory of St Mary's Anglican Church in Walkerville Ontario Focusing on Cram and the church's main patron Edward Walker 1851-1915 Macdonell explores the intricate intersections of Gothic aesthetics architectural ethics literature theology cultural values and community construction in an Edwardian era company town When Walker commissioned the church he believed that its economy of salvation could save him from the syphilis that afflicted his body and stained his soul However while implementing that economy Cram whose architectural theory social commentary and ghost stories were pessimistic about reviving the Gothic in the modern world also created an architecture haunted by the sickness of humanity Painstakingly researched and lavishly illustrated *Ghost Storeys* redefines the allegorical relationship between a marginalized church and the Gothic Revival movement as a global interdisciplinary phenomenon
