## **Queues Rendezvous Riots Questioning The Public In Art And Architecture:**

**Architecture and the Unconscious** John Shannon Hendrix, Lorens Eyan Holm, 2016-06-17 There are a number of recent texts that draw on psychoanalytic theory as an interpretative approach for understanding architecture or that use the formal and social logics of architecture for understanding the psyche But there remains work to be done in bringing what largely amounts to a series of independent voices into a discourse that is greater than the sum of its parts in the way that say the architect Peter Eisenman was able to do with the architecture of deconstruction or that the historian Manfredo Tafuri was able to do with the Marxist critique of architecture The discourse of the present volume focuses specifically for the first time on the subject of the unconscious in relation to the design perception and understanding of architecture It brings together an international group of contributors who provide informed and varied points of view on the role of the unconscious in architectural design and theory and in doing so expand architectural theory to unexplored areas enriching architecture in relation to the humanities The book explores how architecture engages dreams desires imagination memory and emotions how architecture can appeal to a broader scope of human experience and identity Beginning by examining the historical development of the engagement of the unconscious in architectural discourse and the current and historical theoretical and practical intersections of architecture and psychoanalysis the volume also analyses the city and the urban condition

*"Architecture, Design and Craft in Toronto 1900-1940 "* Alla Myzelev, 2017-07-05 Toronto the largest and one of the most multicultural cities in Canada boasts an equally interesting and diverse architectural heritage *Architecture Design and Craft in Toronto 1900 1940* tells a story of the significant changes in domestic life in the first 40 years of the twentieth century Adopting a multidisciplinary approach to studies of residential spaces the author examines how questions of modernity and modern living influenced not only architectural designs but also interior furnishings modes of transportation and ways to spend leisure time The book discusses several case studies some of which are known both locally and internationally for example Casa Loma while others such as Guild of All Arts or Sherwood have been virtually unstudied by historians of visual culture The overall goal of the book is to put Toronto on the map of scholars of urban design and architecture and to uncover previously unknown histories of design craft and domesticity in Toronto This study will be of interest not only to the academic community namely architects designers craftspeople and scholars of these disciplines along with social historians but also the general public interested in local history and or visual culture

**The Figure of Knowledge** Sebastiaan Loosen, Rajesh Heynicks, Hilde Heynen, 2020-10-01 It is a major challenge to write the history of post WWII architectural theory without boiling it down to a few defining paradigms An impressive anthologising effort during the 1990s charted architectural theory mostly via the various theoretical frameworks employed such as critical theory critical regionalism deconstructivism and pragmatism Yet the intellectual contours of what constitutes architectural theory have been constantly in flux It is therefore paramount to ask what kind of knowledge has become important in the recent history of architectural theory and how the

resulting figure of knowledge sets the conditions for the actual arguments made. The contributions in this volume focus on institutional, geographical, rhetorical, and other conditioning factors. They thus screen the unspoken rules of engagement that postwar architectural theory ascribed to.

**Arts for Change** Beverly Naidus, 2009-04-01. Arts for Change presents strategies and theory for teaching socially engaged art with an historical and contemporary overview of the field. The book features interviews with over thirty maverick artists, faculty from colleges and universities in the United States, Canada, and Great Britain, whose pedagogy is drawn from and informs activist arts practice. The issues these teaching artists address are provocative and diverse. Some came to this work through personal healing from injustice and trauma, or by witnessing oppressions that became intolerable. Many have taught for decades, deeply influenced by social movements of the 1960s and 1970s, yet because the work is controversial, tenured positions are rare.

**Rites of Way** Mark Kingwell, Patrick Turmel, 2011-04-07. There are many ways to approach the subject of public space, the threats posed to it by surveillance and visual pollution, the joys it offers of stimulation and excitement, of anonymity and transformation, its importance to urban variety or democratic politics. But public space remains an evanescent and multidimensional concept that too often escapes scrutiny. The essays in *Rites of Way: The Politics and Poetics of Public Space* open up multiple dimensions of the concept from architectural, political, philosophical, and technological points of view. There is some historical analysis here, but the contributors are more focused on the future of public space under conditions of growing urbanization and democratic confusion. The added interest offered by non-academic work, visual art, fiction, poetry, and drama, is in part an admission that this is a topic too important to be left only to theorists. It also makes an implicit argument for the crucial role that art, not just public art, plays in a thriving public realm. Throughout this work, contributors are guided by the conviction, not pious but steely, that healthy public space is one of the best living parts of a just society. The paths of desire we follow in public, trace and speak our convictions and needs, our interests and foibles. They are the vectors and walkways of the social, the public dimension of life lying at the heart of all politics.

**Unprecedented Realism** K. Michael Hays, Rodolfo Machado, Jorge Silvetti, 1995. For almost two decades, the work of Rodolfo Machado and Jorge Silvetti has remained at the forefront of theoretical production. Their rigorously detailed and exquisitely drawn projects characterize an attitude of aesthetic realism towards materials, construction, function, and the cultural role of architecture. Yet the conditions they address and the effects they produce are unprecedented. Their projects synthesize seemingly incompatible images, uses, and typologies. *Unprecedented Realism* is not an illustration of theory. Rather, what emerges is a constructive theory of architecture that understands the process of design itself as a distinct mode of knowledge, as theoretical research that is still irreducibly architectural. *Unprecedented Realism* presents both buildings and urban infrastructures: Steps of Providence, RI; Entrance for Cranbrook Bloomfield Hills, Mich.; Carnegie Mellon University Center, Pittsburgh; Pershing Square, Los Angeles; and Times Square, New York City. Along with the analytic text of K. Michael Hays, the volume includes critical essays by Alan
