Teaching British Women Writers, 1750-1900 Jeanne Moskal, Shannon R. Wooden, 2005 The exuberant recovery from obscurity of scores of British women writers has prompted professors and publishers to revisit publication of women s writings New curricular inclusion of these sometimes quirky often passionate writers profoundly disrupts traditional pedagogical assumptions about what constitutes literature This book addresses this radically changed educational landscape offering practical proven teaching strategies for newly recovered writers both in special topics courses and in traditional teaching environments Moreover it addresses the institutional issues confronting feminist scholars who teach women writers in a variety of settings and the kinds of career altering effects the decision to teach this material can have on junior and senior scholars alike Collectively these essays argue that teaching noncanonical women writers invigorates the curriculum as a whole not only by introducing the voices of women writers but by incorporating new genres by asking new questions about readers assumptions and aesthetic values and by altering the power relations between teacher and student for the better

to the key terms and frameworks in cognitive poetics and stylistics *Transformations of Electricity in Nineteenth-Century Literature and Science* Stella Pratt-Smith, 2017-05-15 Throughout the nineteenth century practitioners of science writers of fiction and journalists wrote about electricity in ways that defied epistemological and disciplinary boundaries Revealing electricity as a site for intense and imaginative Victorian speculation Stella Pratt Smith traces the synthesis of nineteenth century electricity made possible by the powerful combination of science literature and the popular imagination With electricity resisting clear description even by those such as Michael Faraday and James Clerk Maxwell who knew it best Pratt Smith argues that electricity was both metaphorically suggestive and open to imaginative speculation Her book engages with Victorian scientific texts popular and specialist periodicals and the work of leading midcentury novelists including Charles Dickens Charlotte Bronte Emily Bronte William Makepeace Thackeray and Wilkie Collins Examining the work of William Harrison Ainsworth and Edward Bulwer Lytton Pratt Smith explores how Victorian novelists attributed magical qualities to electricity imbuing it with both the romance of the past and the thrill of the future She concludes with a case study of Benjamin Lumley's *Another World* which presents an enticing fantasy of electricity's potential based on contemporary developments Ultimately her book contends that writing and reading about electricity appropriated and expanded its imaginative scope transformed its factual origins and applications and contravened the bounds of literary genres and disciplinary constraints **The Facts on File Companion to the British Short Story** Andrew Maunder, 2007 A comprehensive reference to short fiction from Great Britain Ireland and the British Commonwealth With approximately 450 entries this A to Z guide explores the literary contributions of such writers as Joseph Conrad James Joyce D H Lawrence Rudyard Kipling Oscar Wilde Katherine Mansfield Martin Amis and others **Discourses of Ageing in Fiction and Feminism** J. British Short Fiction in the Early Nineteenth Century Dr Tim Killick,2013-04-28 In spite of the importance of the idea of the tale within Romantic era literature short fiction of the period has received little attention from critics Contextualizing British short fiction within the broader framework of early nineteenth century print culture Tim Killick argues that authors and publishers sought to present short fiction in book length volumes as a way of competing with the novel as a legitimate and prestigious genre Beginning with an overview of the development of short fiction through the late eighteenth century and analysis of the publishing conditions for the genre including its appearance in magazines and annuals Killick shows how Washington Irving s hugely popular collections set the stage for British writers Subsequent chapters consider the stories and sketches of writers as diverse as Mary Russell Mitford and James Hogg as well as didactic short fiction by authors such as Hannah More Maria Edgeworth and Amelia Opie His book makes a convincing case for the evolution of short fiction into a self conscious intentionally modern form with its own techniques and imperatives separate from those of the novel
