Maize Cobs and Cultures: History of Zea mays L. John Staller,2009-12-02 Our perceptions and conceptions regarding the roles and importance of maize to ancient economies is largely a product of scientific research on the plant itself developed for the most part out of botanical research and its recent role as one of the most important economic staples in the world Anthropological research in the early part of the last century based largely upon the historical particularistic approach of the Boasian tradition provided the first evidence that challenged the assumptions about the economic importance of maize to sociocultural developments for scholars of prehistory Subsequent ethnobotanic and archaeological studies showed that the role of maize among Native American cultures was much more complex than just as a food staple In *Maize Cobs and Cultures* John Staller provides a survey of the ethnohistory and the scientific botanical and biological research of maize complemented by reviews on the ethnobotanic interdisciplinary and multidisciplinary methodologies

The South American Camelids Duccio Bonavia, 2009-02-01 One of the most significant differences between the New World s major areas of high culture is that Mesoamerica had no beasts of burden and wool while the Andes had both Four members of the camelid family wild guanacos and vicunas and domestic llamas and alpacas were native to the Andes South American peoples relied on these animals for meat and wool and as beasts of burden to transport goods all over the Andes In this book Duccio Bonavia tackles major questions about these camelids from their domestication to their distribution at the time of the Spanish conquest One of Bonavia s hypotheses is that the arrival of the Europeans and their introduced Old World animals forced the Andean camelids away from the Pacific coast creating the mistaken impression that camelids were exclusively high altitude animals Bonavia also addresses the diseases of camelids and their population density suggesting that the original camelid populations suffered from a different type of mange than that introduced by the Europeans This new mange he believes was one of the causes behind the great morbidity of camelids in Colonial times In terms of domestication while Bonavia believes that the major centers must have been the puna zone intermediate zones he adds that the process should not be seen as restricted to

a single environmental zone Bonavia's landmark study of the South American camelids is now available for the first time in English This new edition features an updated analysis and comprehensive bibliography In the Spanish edition of this book Bonavia lamented the fact that the zooarchaeological data from R S MacNeish's Ayacucho Project had yet to be published In response the Ayacucho's Project's faunal analysts Elizabeth S Wing and Kent V Flannery have added appendices on the Ayacucho results to this English edition This book will be of broad interest to archaeologists zoologists social anthropologists ethnohistorians and a wide range of students

The Oxford Handbook of the Incas Sonia Alconini, R. Alan Covey, 2018-04-02 When Spaniards invaded their realm in 1532 the Incas ruled the largest empire of the pre Columbian Americas Just over a century earlier military campaigns began to extend power across a broad swath of the Andean region bringing local societies into new relationships with colonists and officials who represented the Inca state With Cuzco as its capital the Inca empire encompassed a multitude of peoples of diverse geographic origins and cultural traditions dwelling in the outlying provinces and frontier regions Bringing together an international group of well established scholars and emerging researchers this handbook is dedicated to revealing the origins of this empire as well as its evolution and aftermath Chapters break new ground using innovative multidisciplinary research from the areas of archaeology ethnohistory and art history The scope of this handbook is comprehensive It places the century of Inca imperial expansion within a broader historical and archaeological context and then turns from Inca origins to the imperial political economy and institutions that facilitated expansion Provincial and frontier case studies explore the negotiation and implementation of state policies and institutions and their effects on the communities and individuals that made up the bulk of the population Several chapters describe religious power in the Andes as well as the special statuses that staffed the state religion maintained records served royal households and produced fine craft goods to support state activities The Incas did not disappear in 1532 and the volume continues into the Colonial and later periods exploring not only the effects of the Spanish conquest on the lives of the indigenous populations but also the cultural continuities and discontinuities Moving into the present the volume ends with an overview of the ways in which the image of the Inca and the pre Columbian past is memorialized and reinterpreted by contemporary Andeans

Bauer, 2010-07-22 The ceque system of Cusco the ancient capital of the Inca empire was perhaps the most complex indigenous ritual system in the pre Columbian Americas From a center known as the Coricancha Golden Enclosure or the Temple of the Sun a system of 328 huacas shrines arranged along 42 ceques lines radiated out toward the mountains surrounding the city This elaborate network maintained by ayllu kin groups that made offerings to the shrines in their area organized the city both temporally and spiritually From 1990 to 1995 Brian Bauer directed a major project to document the ceque system of Cusco In this book he synthesizes extensive archaeological survey work with archival research into the Inca social groups of the Cusco region their land holdings and the positions of the shrines to offer a comprehensive empirical description of the ceque system Moving well beyond previous interpretations Bauer constructs a convincing model of the system s physical form and its relation to the social political and territorial organization of Cusco **Reading Africa into American Literature** Keith Cartwright, 2021-12-14 The literature often considered the most American is rooted not only in European and Western culture but also in African and American Creole cultures Keith Cartwright places the literary texts of such noted authors as George Washington Cable W E B DuBois Alex Haley Zora Neale Hurston Ralph Ellison William Faulkner Joel Chandler Harris Herman Melville Toni Morrison and many others in the context of the history spiritual traditions folklore music linguistics and politics out of which they were written Cartwright grounds his study of American writings in texts from the Senegambian Old Mali region of Africa Reading epics fables and gothic tales from the crossroads of this region and the American South he reveals that America s foundational African presence along with a complex set of reactions to it is an integral but unacknowledged source of the national culture identity and literature The Millennial New World Frank Graziano, 1999 This is a study of millennialism the idea that something climactic will happen in the year 2000 in Latin America from the pre Columbian period up to the present
