Masters of the Post Duncan Campbell-Smith, 2011-11-03 The origins of the Post Office go back to the early years of the Tudor monarchy Brian Tuke a former King's Bailiff in Sandwich was acknowledged as the first Master of the Posts by Cardinal Wolsey in 1512 and went on to build up a network of postmasters across England for Henry VIII Over the following five hundred years the Royal Mail expanded to an unimaginable degree to become the largest employer in the country and the face of the British state for most people in their everyday lives But it also faced the demands of an increasingly commercial marketplace With the election of Margaret Thatcher in 1979 the possibility of privatising the Royal Mail has prompted passionate arguments and has added immeasurably to the difficulties of running it In charting the whole of this extraordinary story Duncan Campbell Smith recounts a series of remarkable tales including how postal engineers built the first programmable computer for the wartime code breakers of Bletchley Park and how the Royal Mail managed to successfully continue delivering post to the front lines during two world wars but also how they failed to avert the Great Train Robbery of 1963 He brings to life many of the dominant personalities in the Royal Mail's history from Rowland Hill who imposed a uniform penny post and set the great Victorian expansion on its way to Tony Benn who championed the modernisation of the service in the 1960s and Tom Jackson who led the postal workers' biggest union through fifteen frequently stormy years up to 1982 This is the first complete history of the Royal Mail up to the present day based on its comprehensive archives and including the first detailed account of the past half century of Britain's postal history made possible by privileged access to confidential records Today's debate over the future of the Royal Mail is shown to be just the latest chapter in a centuries old conflict between its roles raising revenue and serving the public Will its employees remain like Brian Tuke's postmasters servants of the Crown This book could hardly appear at a more timely moment

Police control systems in Britain, 1775-1975 Chris Williams, 2015-11-01 During the last two centuries the job of policing in Britain has been transformed several times This book analyses the ways that police institutions have controlled the individual constable on the front line The eighteenth century constable was an independent artisan his successor in the Metropolitan Police and other new forces was ferociously disciplined and closely monitored Police have been controlled by a variety of different practices ranging from direct day to day input from the community through bureaucratic systems built around exacting codes of rules to the real time control of officers via radio and latterly the use of centralised computer systems to deliver key information Police forces became pioneers in the adoption of many technologies including telegraphs telephones office equipment radio and computers and this book explains why and how this happened considering the role of national security in the adoption of many of these innovations It will be of use to a range of disciplines including history criminology
