## **Sciences Of Cognition Theory And Research In Psychology And Artificial Intelligence:**

**The Sciences of Cognition** Morton Wagman, 1995-03-30 Wagman presents a general unified theory of artificial and human intelligence under which the nature of human reasoning problem solving analogical thinking and scientific discovery is examined from theoretical research and computational perspectives The work analyzes foundational issues regarding the nature of intelligent systems and intelligence and significant and current research in the area is discussed This book will be of interest to scholars dealing with psychology artificial intelligence and cognitive science *Human Intellect and Cognitive Science* Morton Wagman, 1996-02-28 The advancement of knowledge concerning the complexities of human intellectual processes can best be achieved by combining theory and research from the disciplines of cognitive psychology and artificial intelligence Wagman explores various aspects of these disciplines to further his ideas He examines the nature of the human intellect and proposes a theory of representation and intelligence that is applicable to human computer and animal cognition He also evaluates theory and research concerned with structure and process in human reasoning and human problem solving Several scientific discovery systems including BACON FARENHEIT and IDS are described in depth The ability of these systems to emulate solutions to 10 types of scientific problems is examined The capacity theory of language comprehension is also presented and extended to the domain of cognitive processes Cognitive Psychology and Artificial Intelligence Morton Wagman, 1993-02-28 The nature of cognition is examined by the methods of experimental cognitive psychology and the theoretical models of computational psychology First explained is the nature and objectives of artificial intelligence symbolic and connectionist paradigms the architecture of cognition and characteristics of a general theory of intelligence Wagman then examines theory and research in human reasoning and reasoning systems Experimental research in deductive and inductive reasoning the nature of artificial intelligence reasoning systems nonmonotonic and common sense reasoning and general types of reasoning in artificial intelligence are examined Next the author examines the nature of human problem solving and problem solving systems Problem representation methods and their duplication by artificial intelligence is discussed at length Concepts and research in human learning and learning systems are also reviewed as are the nature of human expertise and expert systems Major characteristics of expertise including deep knowledge reasoning strategies and pattern recognition are described and exemplified in research concerned with medical expertise The nature of intelligence and intelligence systems is examined and the physical symbol system hypothesis and its results are analyzed The author covers an artificial intelligence system that emulates the cognitive processes in scientific discovery and its implications for human creativity *Cognitive Science* Jay Friedenberg, Gordon Silverman, Michael J. Spivey, 2021-08-25 Cognitive Science provides a comprehensive and up to date introduction to the study of the mind from an interdisciplinary perspective

**Contemporary Theories of Human Cognition** DIEGO. AZEVEDO LEITE, 2025-04-11 This book provides a systematic presentation of some of the most relevant contemporary major theories of human cognition Each theory is analyzed in terms

of their origins central idea central theoretical elements empirical evidence and major criticism This analysis shows the advantages and disadvantages in each theoretical system thus providing reasonable means for evaluating and comparing these proposals The discussions are often supported by empirical research mainly from fields such as cognitive science cognitive neuroscience and artificial intelligence and they are combined with rigorous theoretical and argument analysis The content therefore can be helpful for many contemporary central debates concerning the topic of human cognition

*Language and Thought in Humans and Computers* Morton Wagman, 1998-07-28 A comprehensive analysis of current theory and research in the psychological computational and neural sciences elucidates the structures and processes of language and thought Chapters discuss language comprehension and artificial intelligence ARCS system for analogical retrieval ACME model of analogical mapping PAULINE an artificial intelligence system for pragmatic language generation a theory of understanding of spoken and written text recent developments and effect of different modes of language representation on the efficiency of information processing This book will be of interest to professionals and scholars in psychology artificial intelligence and cognitive science

*The Psychology of Expertise* Robert R. Hoffman, 2014-02-25 This volume investigates our ability to capture and then apply expertise In recent years expertise has come to be regarded as an increasingly valuable and surprisingly elusive resource Experts who were the sole active dispensers of certain kinds of knowledge in the days before AI have themselves become the objects of empirical inquiry in which their knowledge is elicited and studied by knowledge engineers experimental psychologists applied psychologists or other experts involved in the development of expert systems This book achieves a marriage between experimentalists applied scientists and theoreticians who deal with expertise It envisions the benefits to society of an advanced technology for capturing and disseminating the knowledge and skills of the best corporate managers the most seasoned pilots and the most renowned medical diagnosticians This book should be of interest to psychologists as well as to knowledge engineers who are out in the trenches developing expert systems and anyone pondering the nature of expertise and the question of how it can be elicited and studied scientifically The book's scope and the pivotal concepts that it elucidates and appraises as well as the extensive categorized bibliographies it includes make this volume a landmark in the field of expert systems and AI as well as the field of applied experimental psychology

**Cognitive Science and Concepts of Mind** Morton Wagman, 1991-10-30 Following the introductory chapter each succeeding chapter focuses on a major component of cognition Each cognitive component logic reasoning problem solving language memory learning discovery is analyzed from the perspectives of human intellect and artificial intelligence The dual perspectives are then compared The analyses and the comparisons take account of basic theory and describe contemporary research The technical theory and research is considered against a broad background of intellectual history and psychological implication This book is intended for anyone aware of the new intellectual paradigm and psychological challenge of artificial intelligence It is written for the general reader as well as for university students in

cognitive science programs artificial intelligence psychology and philosophy courses and for professionals in these and related fields from preface *The Application of Artificial Intelligence in Brain-Computer Interface and Neural System Rehabilitation* Fangzhou Xu,Dong Ming,Tzyy-Ping Jung,Peng Xu,Minpeng Xu,2023-11-15 Cognition: Theory and Practice Russell Revlin,2012-02-24 Cognition Theory and Practice provides the link between theory experimental findings and ordinary human activity showing students how the field of cognitive psychology relates to their everyday lives Engagingly written the book captivates students by explaining common experiences such as why answering a cell phone while driving is as dangerous as closing your eyes for a half second but talking with your passenger for a minute can be perfectly safe Research coverage draws heavily on the rapidly accumulating discoveries of human neuroscience and brain imaging

### **Cognitive Science and the Symbolic Operations of Human and Artificial Intelligence** Morton

Wagman,1997-09-30 This scholarly book presents and critically evaluates the outstanding contributions of both cognitive psychology and artificial intelligence to our understanding of the nature of intelligence and intelligent systems Examining conceptual thought across the domains of reasoning and logic language and analogy and scientific discovery Wagman compares human reasoning with computer reasoning Of special interest to readers is the general critique of artificial intelligence research directed toward the ultimate objective of mapping and surpassing all of human knowledge The first chapter examines the theoretical foundations of the logical approach to artificial intelligence and the centrality of declarative knowledge and the predicate calculus The artificial intelligence system CYC is critically examined with respect to its avowed objective of matching or surpassing human intelligence The second chapter focuses on the probabilistic contrast model of causal reasoning and underscores its significance as a mathematical conceptualization of human reasoning In the third chapter the ARCS Analogical Retrieval by Constraint Satisfaction system is discussed and its psychological validity is evaluated In the fourth chapter scientific heuristics characteristics of different developmental levels and differentially applied in the discovery spaces of hypotheses and experiments are analyzed in the context of the philosophy of science The fifth chapter presents the logic principles and applications of PAULINE a pragmatic language generation system and explains human language pragmatics

**The Cognitive Science of Science** Paul Thagard,2012-04-06 A cognitive science perspective on scientific development drawing on philosophy psychology neuroscience and computational modeling Many disciplines including philosophy history and sociology have attempted to make sense of how science works In this book Paul Thagard examines scientific development from the interdisciplinary perspective of cognitive science Cognitive science combines insights from researchers in many fields philosophers analyze historical cases psychologists carry out behavioral experiments neuroscientists perform brain scans and computer modelers write programs that simulate thought processes Thagard develops cognitive perspectives on the nature of explanation mental models theory choice and resistance to scientific change considering disbelief in climate change as a case study He presents a series of studies that describe the

psychological and neural processes that have led to breakthroughs in science medicine and technology He shows how discoveries of new theories and explanations lead to conceptual change with examples from biology psychology and medicine Finally he shows how the cognitive science of science can integrate descriptive and normative concerns and he considers the neural underpinnings of certain scientific concepts

**Proceedings of 3rd International Conference on Mathematical Modeling and Computational Science** Sheng-Lung Peng, Noor Zaman Jhanjhi, Souvik Pal, Fathi Amsaad, 2023-08-28 The volume is a collection of high quality peer reviewed research papers presented at the Third International Conference on Mathematical Modeling and Computational Science ICMACS 2023 held during 24-25 February 2023 in hybrid mode The topics covered in the book are mathematical logic and foundations numerical analysis neural networks fuzzy set theory coding theory higher algebra number theory graph theory and combinatorial computation in complex networks calculus differential equations and integration application of soft computing knowledge engineering machine learning artificial intelligence big data and data analytics high performance computing network and device security Internet of Things IoT

**The Human Mind According to Artificial Intelligence** Morton Wagman, 1999-03-30 In an evaluation of the strengths and limitations of artificial intelligence in a number of intellectual domains Wagman draws comparisons with human cognitive ability in those domains and assesses its role as a theoretical model as a collaborator or as a competitor of the human mind This book distinguishes itself in its structured and detailed account of advancing intellectual developments in the science of artificial intelligence as opposed to a highly technical or vague philosophical treatment of the topic

**The Mind's New Science** Howard E Gardner, 2008-08-05 The first full scale history of cognitive science this work addresses a central issue What is the nature of knowledge

*The General Unified Theory of Intelligence* Morton Wagman, 1997-02-19 The general unified theory of intelligence addresses the cognitive functions of thinking reasoning and problem solving At an abstract level this theory construes the intellectual functions of humans and computers as respectively restricted and directed forms of the logic of implication In other words human intelligence operates according to production rules Here Wagman presents the central tenets and research elaboration of the general unified theory of intelligence that embraces both human and artificial intelligence across the cognitive domains of scientific discovery processes inductive and deductive reasoning and the mechanisms basic to analogical thinking and problem solving
