## **Scientific Theology An Introduction:**

*The Science of God* Alister McGrath, 2005-11 How do science and theology interact What can be gained by exploring Christian theology using the insights of the natural sciences Can a synergy be found Is there a defensible natural theology within the scope and framework of a revealed God In the three volumes of *A Scientific Theology* T T Clark 2001 2003 Alister E McGrath produced a groundbreaking work proposing a mutual cross fertilization of ideas and approaches a scientific theology based on the present and past relationships between Christian theology and the natural sciences In *The Science of God* Professor McGrath provides a summary of and introduction to the major themes examined in the series He outlines all the main ideas on Christian theology both philosophically and historically discussing their relationships with the natural sciences This unique approach results not simply in a traditional introduction to systematic theology nor in an introduction to the science versus religion debate but in a highly readable guide to Christian theology as a systematic theology enriched by the natural sciences conceived and presented as a legitimate and coherent intellectual discipline with its own sense of identity place and purpose

**Natural and Cosmic Theodicy** Jongseock James Shin, 2022-10-21 This book presents a third way to envision the Creatorship of the Triune God who is both compassionate and eschatologically redemptive in providential presence rather than biasedly gravitating toward the openness of a self-limiting God or God's all-determining sovereignty Not only is God in with and under creation God's kenotic presence invites creatures to participate in the self-giving love of God through both general and special divine action in a top-down through bottom-up mode Creatio continua is God's own journey of fulfilling the eschatological promise for creation This redemptive presence of God in creation is a Trinitarian co-protesting against the power of death sin and evil considering the cosmic dimensions of the eschatological hope promised in the resurrection of Jesus The new creation is the ultimate fulfillment of creaturely freedom and contingency divinely granted in creatio ex nihilo In arguing this Shin engages

in a comparative and critical study of natural and cosmic theodicy advanced by Catherine Keller Arthur Peacocke Wolfhart Pannenberg and Robert Russell     *An Introductory Essay to the Science of Comparative Theology; with a Tabular Synopsis of Scientific Religion ...* Edward Webster (of Ealing.),1870
