HOW TO DO TECHNOLOGICAL FORECASTING?

Kim **10 YEARS**
WITH YOU

Technological Forecasting is the study of new trends, technologies or new forces in order to reduce the uncertainty associated with new technologies, products, or services.

Is useful for prioritization of R&D investment, planning new product development, making strategic decisions on technology licensing or joint ventures.

For **Established/mature technology** (T2M<1y) use Short-term Forecast
For **Innovative/Medium technology** (T2M[1-3]y) use Medium-term Forecast
For **Emerging/immature technology** (T2M>3y) use Long-term Forecast

#3 Choose a Forecasting Technique

#4. Collect Data

The type of data selected depends on the objective and the allocated budget.

#5. Execute

Make the Forecast

#6 Evaluate the result

Monitor the results, reexamine, adjust, validate and improve the quality of the future predictions
