*Noninvasive Methods for the Quantification of Skin Functions* Peter J. Frosch, Albert M. Kligman, 2012-12-06 More than 10 years ago I had the chance to visit the university hospital in Munster Germany At the outpatient clinic there I accidentally met a young dermatologist who was devoted to the study of the quantification of irritated skin during his busy daily clinical work I sensed immediately that this Dr P Frosch was conducting his research with the ideals and enthusiasm which were so familiar to me Soon we found that we shared a similar past experience we both had begun our careers in dermatological investigation with the same mentor For me it was more than 25 years ago that I first met Dr Kligman Professor at the University of Pennsylvania in Philadelphia USA I reminisced that I had been greatly shocked by his initial question As a dermatologist do you want to study living or dead skin because at that time and even today whenever we cannot collect enough information about the skin with the naked eye it is invasively removed is common practice to histologically examine a skin sample that from living tissue Many dermatologists still would never think of studying the living intact skin itself noninvasively with the aid of existing advanced technologies to assess its structural and functional properties At that time Dr Kligman intended to build up a system of evaluating the skin from various aspects using methods that had been unduly neglected in the past and

introducing various technological instruments      **Immunotoxicology And Immunopharmacology** H Dean Jack,1994-06-30 The second edition of this text has been revised and refocused to reflect the transformation of immunotoxicology from a subdiscipline of toxicology to an independent area of research that can best be described as environmental immunology New chapters discuss the role of immune mediators in liver lung and skin toxicity in regulating chemical metabolizing enzymes and in the immunosuppression produced by ultraviolet light More emphasis is placed on the clinical consequences of immunotoxicity as well as the interpretation of experimental data for predicting human health risk The second edition is divided into three major sections immunosuppression autoimmunity and hypersensitivity This new organization of the text allows for a more thorough treatment of these phenomena with greater attention to test methods theoretical considerations and clinical implications The book includes many chapters on specific environmental agents therapeutic drugs biological agents and drugs of abuse as well as on immune mediated toxicity in specific organ systems
