greatest authorities on the Great War World War One The collection is a significant contribution to the on going re examination of Canada s experiences in war and a must read for students of Canadian history A Future for Economics Christopher Maule,2022-08-10 Economics is a discipline fundamentally concerned with effective coordination In that way its main concerns are very close to those of governance Economics like governance has evolved considerably over the last half century This book is a very modest attempt at gauging the relative importance of this tsunami and the way in which it might indicate what will be its future A Future for Economics proposes the reflections on this general theme by eight senior members of the economics profession who have all taught at some time in the Department of Economics at Carleton University in Ottawa a department that has always been known for its intellectual temerity and for its interest in extending the scope of economics beyond its traditional boundaries The Carleton sample of economists who share their views here have practiced in different sub fields of economics and have chosen to articulate their views and experiences in very different ways But their collective experience reflects a broad exposure to the ways in which the discipline has evolved both in academic circles and in the various organizations and institutions where they have practiced their profession in Canada and abroad

*Tradition and Innovation* H.T. Wilson,2023-11-06 First published in 1984 Tradition and Innovation by viewing Western civilization as a culture puts the common perspectives of our major Western institutions in bolder relief The author shows how the institutionalization of central modes of Western rationality found in capitalism industrialization science science based technology bureaucracy the rule of law the social and behavioral sciences has created a culturally and historically unique form of collective life advanced industrial society Indicative of this development is the nature and meaning of the so called innovative society itself where rationality is increasingly seen to repose in institutions and organized structures rather than in individuals Professor Wilson argues that this rationality is becoming traditionalized as a central artifact of our form of life one which believes in the independent existence of the facts of life This is borne out by the increasing autonomy of what professor Wilson calls disembodied disciplined observation determined as it is to annihilate contemplation and reflection in its effort to reconstitute practice in its own image This is an interesting read for students of sociology political science public administration and social science in general *George J. Klein* Richard I. Bourgeois-Doyle,National Research Council Canada,National Research Council Canada. Monograph Publishing Program,2004 This book is the official biography of George J Klein a design engineer who spent 40 years at the National Research Council of Canada NRC and was considered the most productive inventor in Canada in the 20th Century The book recounts Klein s family history and personal life

**Intellectual Property Management for Start-ups** Martin A. Bader, Sevim Süzeröglü-Melchior, 2023-02-16 This book examines intellectual property (IP) as an important value driver for start-ups. Businesses of all sizes are inevitably confronted with intellectual property issues at some point, but start-ups and their collaborators face unique challenges and opportunities in IP management. Identifying, generating and exploiting intellectual property can lead to sustainable competitive advantages and avoidance of risks. Many start-ups

sense the complexity of IP management and therefore place their energy elsewhere. However, the clear conclusion to be drawn from this unique collection of contributions is that putting an IP management strategy in place is critical to the successful development of a business. Prof. Dr. Martin A. Bader and Prof. Dr. Sevim S. Zerlu Melchior have years of experience as consultants, entrepreneurs, business owners, and researchers where they saw firsthand the need for a comprehensive yet practical resource for start-ups and their key stakeholders. This book explores different perspectives in dealing with IP from six different angles: the start-up's view, the investor's view, the corporation's view, the university's view, the global IP office's view, and the advisor's view. Each section consists of chapters written by leading experts from around the globe, including Silicon Valley, Canada, Israel, Switzerland, Germany, Finland, France, Australia, Brazil, India, Japan, Singapore, and South Africa. Contributors bring practical experience from a wide range of sectors such as information and communication technology, software, artificial intelligence, machine learning, cybersecurity, industrial automation, internet of things, life sciences, pharma, crop science, biotech, medtech, mining, sustainability, climate tech, and even quantum technologies. This timely publication serves as a guidebook for entrepreneurs and other key stakeholders in the start-up ecosystem. It empowers founders to develop their own IP management strategy to mitigate risk, create and capture value, and lay the groundwork for sustainable growth. An essential reference for start-ups to achieve business excellence.
