Management and Ideology Judith A. Merkle, 2023-11-10 From its obscure beginning as a system for organizing machine shops Scientific Management has grown into the major technocratic ideology of the twentieth century Its development and international diffusion have influenced industrial productivity the social fabric of industrial society and even the nature of government In this study of the movement's growth Merkle compares the

Optimizing the German Workforce David Meskill, 2010-04-01 During the twentieth century German government and industry created a highly skilled workforce as part of an ambitious program to control and develop the country's human resources Yet these long standing efforts to match as many workers as possible to skilled vocations and to establish a system of job training have received little scholarly attention until now The author's account of the broad support for this program challenges the standard historical accounts that focus on disagreements over the German political economic order and points instead to an important area of consensus These advances are explained in terms of political policies of corporatist compromise and national security as well as industry's evolving production strategies By tracing the development of these policies over the course of a century the author also suggests important continuities in Germany's domestic politics even across such different regimes as Imperial Weimar Nazi and post 1945 West Germany
