In April 2002 the U S National Academies hosted an interacademy workshop involving participants from the United States and Iran on the topic of Science and Ethics The explicit purposes of the workshop were a to engage important members of the American and Iranian scientific communities in meaningful discussions of the topic of science and ethics and particularly differences in the approaches in the west and in Islamic countries in general and Iran in particular b to encourage greater participation by Iranian scientists in international scientific discussions by exposing them to seasoned veterans in international meetings and c to identify specific topics and approaches that could be carried out by the Academies in the two countries to contribute to international understanding of the importance of considering the ethical dimensions of scientific research and related activities This report includes documents prepared by four breakout groups and a statement on priority areas for future interacademy cooperation developed at the final plenary session Also included are background papers prepared by some participants prior to the workshop that were not previously published **Handbook of the**

Philosophical Foundations of Business Ethics Christoph Luetge, 2012-10-09 The Handbook of Business Ethics Philosophical Foundations is a standard interdisciplinary reference handbook in the field of business ethics Articles by notable philosophers and economists examine fundamental concepts theories and questions of business ethics Are morality and self interest compatible What is meant by a just price What did the Scholastic philosophers think about business The handbook will cover the entire philosophical basis of business ethics Articles range from historical positions such as

Aristotelianism Kantianism and Marxism to systematic issues like justice religious issues rights and globalisation or gender The book is intended as a reference work for academics students esp graduate and professionals

Evolution and Human Values, 2022-03-07 Initiated by Robert Wesson *Evolution and Human Values* is a collection of newly written essays designed to bring interdisciplinary insight to that area of thought where human evolution intersects with human values The disciplines brought to bear on the subject are diverse philosophy psychiatry behavioral science biology anthropology psychology biochemistry and sociology Yet as organized by co editor Patricia A Williams the volume falls coherently into three related sections Entitled *Evolutionary Ethics* the first section brings contemporary research to an area first explored by Herbert Spencer Evolutionary ethics looks to the theory of evolution by natural selection to find values for human living The second section *Evolved Ethics* discusses the evolution of language and religion and their impact on moral thought and feeling Evolved ethics was partly Charles Darwin's subject in *The Descent of Man* The last section bears the title *Scientific Ethics* A nascent field scientific ethics asks about the evolution of human nature and the implications of that nature for ethical theory and social policy Together the essays collected here provide important contemporary insights into what it is and what it may be to be human

Philosophy and Psychiatry Thomas Schramme, Johannes Thome, 2012-08-09 Philosophy and psychiatry share many topics and problems For example the solutions of the psychiatry of the philosophical body soul problem have direct effects on the self image of the discipline Despite these obvious overlappings and unlike the English speaking countries interdisciplinary research on philosophical psychopathology has been scarce in Germany The current anthology closes these gaps because the authors renowned experts as well as young scientists whose new approaches open promising perspectives come from both disciplines The individual contributions deal with philosophical debates as they arise within the context of psychiatric theory and practice

The Singularity Uziel Awret, 2016-11-23 This volume represents the combination of two special issues of the *Journal of Consciousness Studies* on the topic of the technological singularity Could artificial intelligence really out think us and what would be the likely repercussions if it could Leading authors contribute to the debate which takes the form of a target chapter by philosopher David Chalmers plus commentaries from the likes of Daniel Dennett Nick Bostrom Ray Kurzweil Ben Goertzel Frank Tipler among many others Chalmers then responds to the commentators to round off the discussion

The ^A Philosophy of Psychiatry Jennifer Radden, 2004-06-10 This is a comprehensive resource of original essays by leading thinkers exploring the newly emerging inter disciplinary field of the philosophy of psychiatry The contributors aim to define this exciting field and to highlight the philosophical assumptions and issues that underlie psychiatric theory and practice the category of mental disorder and rationales for its social clinical and legal treatment As a branch of medicine and a healing practice psychiatry relies on presuppositions that are deeply and unavoidably philosophical Conceptions of rationality personhood and autonomy frame our understanding and treatment of

mental disorder Philosophical questions of evidence reality truth science and values give meaning to each of the social institutions and practices concerned with mental health care The psyche the mind and its relation to the body subjectivity and consciousness personal identity and character thought will memory and emotions are equally the stuff of traditional philosophical inquiry and of the psychiatric enterprise A new research field the philosophy of psychiatry began to form during the last two decades of the twentieth century Prompted by a growing recognition that philosophical ideas underlie many aspects of clinical practice psychiatric theorizing and research mental health policy and the economics and politics of mental health care academic philosophers practitioners and philosophically trained psychiatrists have begun a series of vital cross disciplinary exchanges This volume provides a sampling of the research yield of those exchanges Leading thinkers in this area including clinicians philosophers psychologists and interdisciplinary teams provide original discussions that are not only expository and critical but also a reflection of their authors distinctive and often powerful and imaginative viewpoints and theories All the discussions break new theoretical ground As befits such an interdisciplinary effort they are methodologically eclectic and varied and divergent in their assumptions and conclusions together they comprise a significant new exploration definition and mapping of the philosophical aspects of psychiatric theory and practice **Arabic Science**

Fiction Ian Campbell, 2018-05-25 This book traces the roots of Arabic science fiction through classical and medieval Arabic literature undertaking close readings of formative texts of Arabic science fiction via a critical framework developed from the work of Western critics of Western science fiction Arab critics of Arabic science fiction and postcolonial theorists of literature Ian Campbell investigates the ways in which Arabic science fiction engages with a theoretical concept he terms double estrangement wherein these texts provide social or political criticism through estrangement and simultaneously critique their own societies inability or refusal to engage in the sort of modernization that would lead the Arab world back to leadership in science and technology *Soviet Fiction since Stalin* Rosalind J. Marsh, 2022-03-14 First published in 1986 Soviet Fiction

since Stalin presents a comprehensive overview of the literature of the post Stalin period in the Soviet Union The rapid advances in science and technology in these years are reflected in the themes of many of the major novelists Pasternak Solzhenitsyn Sinyavsky Daniel and Grossman and scientific subjects frequently offer a vehicle for the exploration of the wider socio political moral and philosophical ideas As the period advances however literature becomes the first medium in which to express mistrust of scientific advance and hence indirectly of Soviet policy as a whole Rosalind J Marsh uses a broad definition of science which enables her to cover topics ranging from de Stalinization nationalism and anti Semitism in science to Lysenko and scientific charlatanism the Soviet rejection of relativity theory and quantum mechanics the atom bomb and also such general problems as secrecy careerism and bureaucracy The bulk of the book concentrates on the Khrushchev years but there is also plentiful discussion of more recent writing such as that of Zinoviev and Voinovich This book will be of interest to students and researchers of Soviet literature Russian Literature and literature in general Medicine and Ethics

in Times of Corona Martin Woesler, Hans-Martin Sass, 2021-11-18 The Corona pandemic kills people endangers families friends communities companies institutions societies economies and global networks It brings about triage unemployment social distancing and home schooling Countries respond differently often set aside civil and basic human rights Families and friends cannot get together visiting the sick nor attending funerals This pestilence is clearly a cultural economic and political disease 40 leaders in medical and sociological research in politics religion and consulting from 24 countries offer diverse sometimes controversial answers collected by Martin Woesler and Hans Martin Sass **Institutional Economics and the Theory of Social Value: Essays in Honor of Marc R. Tool** Charles M.A. Clark, 2012-12-06 Marc R Tool both through his writings and his editorship of the Journal of Economic Issues has had a profound influence on institutional economics Tool's efforts in his own words has been to keep values on the agenda of economic inquiry which is another way of saying keep economic inquiry relevant Tool's work on the theory of social value and instrumental valuation has helped to keep institutional economics focused on the core economic and social issues facing society providing both a perspective from which to analyze the economy and a criteria for evaluating outcomes This collection of essays is a testament to this legacy Although these 15 chapters cover a wide and diverse range of topics it is the common themes which are most striking the inescapable necessity of values in economic discourse the central role of valuation in economic activity and most importantly the requirement of democratic participation to achieve efficient solutions to the economic problem These essays are offered to honor a body of work a set of ideas but mostly a man who by directing economic inquiry to these core issues has promoted the continuity of human life and the noninvidious recreation of community through the instrumental use of knowledge

Science, Society, and Values Sal P. Restivo, 1994 He has tried in his career and specifically in this volume to understand science without accepting the culture of science uncritically **Science and Ethics** Evandro Agazzi, Fabio Minazzi, 2008 Philosophy of science used to be identified with the logical and methodological analysis of scientific theories and any allusion to values was considered as a deplorable intromission in a philosophical investigation that should remain strictly epistemological As a reaction against this view an opposite sociological approach downplayed the usual virtues of scientific knowledge such as logical rigor and empirical adequacy as artificial imageries that cover the actual nature of science that is a social product submitted to all the kinds of social conditionings and compromises A more balanced view is badly needed today when technoscience is permeating all aspects of our civilization and wise persons understand that we cannot survive without using science and technology but at the same time we need to steer their development in view of the real benefit of humankind We must investigate how science technology and values are legitimately interconnected and in particular how the discourses of ethics politics and religion can enter a fruitful dialogue with science The essays presented in this volume offer a valuable contribution to this interdisciplinary study *Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures* Helaine Selin, 1997-07-31 The Encyclopaedia fills a gap in both the history

of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi
