Science Textbook Struggle a worldwide battle about the origin of the universe life and man erupted without warning It caught the scientific illuminati completely by surprise Why Because science textbooks had become filled with wild unbelievable stories about the beginning of everything And those tales were simply not scientific The universe starting with a Big Bang life arising out of a soup of lifeless amino acids humans produced by apes those myths had only replaced ancient Greek mythology and were being passed off as scientific truths Caught in the crossfire between educators news media textbook publishers religious notables and world renowned scientists including nineteen Nobel laureates was a private citizen Father of six schoolchildren he had only one goal to prove that science never will have answers for origins He was up against the arrogance of scientists who were determined to disguise their private beliefs as being the only explanations for the origin of the universe life and man This story concludes with a great victory for objectivity with more than 200 changes being made in textbooks over the objections of the National Academy of Sciences All discussion about origins was transformed by admission that stories about them are based solely on personal views of individual scientists Remarkably 3 000 scientists around the world later signed an affirmation to assure that this issue of belief over fact in science never be repeated Wernher von Braun father of Americas space program writes in the Foreword Vernon Grose in tracing out in Science But Not Scientists his personal involvement in the vortex of these two forces illustrates one more time the humanity of scientists their likelihood of being just as prejudiced and bigoted as anyone untrained in science He properly calls for objectivity rather than scientific consensus He rightly urges that message rather than messenger should be scrutinized and tested for validity Science will be the richer and humanity the ultimate beneficiary by heeding this clarion call A History of Weed Science in the United States Robert L Zimdahl, 2010-02-04 It is important that scientists think about and know their history where they came from what they have accomplished and how these may affect the future Weed scientists similar to scientists in many technological disciplines have not sought historical reflection The technological world asks for results and for progress Achievement is important not in general the road that leads to achievement What was new yesterday is routine today and what is described as revolutionary today may be considered antiquated tomorrow Weed science has been strongly influenced by technology developed by supporting industries subsequently employed in research and ultimately used by farmers and crop growers The science has focused on results and progress Scientists have been and the majority remain problem solvers whose solutions have evolved as rapidly as have the new weed problems needing solutions In a more formal sense weed scientists have been adherents of the instrumental ideology of modern science That is an analysis of their work and their orientation reveals the strong emphasis on practical useful knowledge on know how The opposite and frequently complementary orientation that has been missing from weed science is an emphasis on contemplative knowledge that is knowing why This book expands on and analyzes how these orientations have affected weed science s development The first analytical history of weed science to be written Compares the development of weed science entomology and plant pathology

Identifies the primary founders of weed science and describes their role **Oceaning** Adam Fish, 2024-01-19 Drones are revolutionizing ocean conservation By flying closer and seeing more drones enhance intimate contact between ocean scientists and activists and marine life In the process new dependencies between nature technology and humans emerge and a paradox becomes apparent Can we have a wild ocean whose survival is reliant upon technology In *Oceaning* Adam Fish answers this question through eight stories of piloting drones to stop the killing of porpoises sharks and seabirds and to check the vitality of whales seals turtles and coral reefs Drone conservation is not the end of nature Instead drone conservation results in an ocean whose flourishing both depends upon and escapes the control of technologies Faulty technology oceanic and atmospheric turbulence political corruption and the inadequacies of basic science serve to foil governance over nature Fish contends that what emerges is an ocean culture a flourishing ocean that is distinct from but exists alongside humanity **Schweitzer** George N. Marshall, David Poling, 2000 He was an accomplished organist and interpreter of Bach a crusader for world peace and a winner of the Nobel Peace Prize He made his philosophy of reverence for life an ethic for the world The hospital he founded in Lambaré is still in operation in present day Gabon is a model of what Europeans might have given to Africans throughout colonial history But above all Albert Schweitzer 1875-1965 was a talented and compassionate human being This biography probes beyond the timeworn image of Schweitzer as the old man in the pith helmet to reveal the philosopher scholar husband father humanitarian and liberal rebel in a conservative church
