Swickard,Alice Gertrude Mildren Harkin,Betty J. Paul,1954 **Evaluating Office Lighting Environments** ,1989 Data from a post occupancy evaluation POE of 912 work stations with lighting power density LPD photometric and occupant response measures were examined in a detailed second level analysis Seven types of lighting systems were identified with different combinations of direct and indirect ambient lighting and task lighting and daylight The mean illuminances with body shadow at the primary task location were within the IES target values for office tasks with a range of mean illuminances from 32 to 75 fc depending on the lighting system The median LPD was about 2.36 W sq ft with about one third the work stations having LPD s at or below 2.0 W sq ft Although a majority of the occupants 69% were satisfied about their lighting the highest percentage of those expressing dissatisfaction 37% with lighting had an indirect fluorescent furniture mounted IFFM system The negative reaction of so many people to the IFFM system suggests that the combination of task lighting with an indirect ambient lighting system had an important influence on lighting satisfaction even though task illuminances tended to be higher with the IFFM system Concepts of lighting quality visual health and control were explored as well as average luminance to explain the negative reactions to the combination of indirect lighting with furniture mounted lighting *Some Psychophysical Tests of the Conspicuity of Emergency Vehicle Warning Lights* Gerald Leonard Howett, Law Enforcement Standards Laboratory,1979 **Born Too Soon Or Born Too Small** G. The Development and Integration of Behaviour Paul Patrick Gordon Bateson, 1991-05-30 What regularities lie behind the development and organization of behaviour in animals and humans One theme emerging from this book is that ideas have to flow in both directions between the different levels of analysis between the neural and behavioural levels and between the individual and the social group Another theme is that it is not enough to identify the many factors operating in the development and integration of behaviour The processes must also be studied directly Bringing together work at different levels and studying behavioural dynamics require more knowledge and expertise than any one person can usually command Links have to be made between different disciplines and specialists have to learn to work with others who speak with what at first seem to be mutually incomprehensible scientific languages The book illustrates how this may be achieved The themes of this book are strongly related to the approach of Robert Hinde in whose honour the chapters were written
