Polenske, 2007-04-12 This critical

addition to the growing literature on innovation contains extensive analyses of the institutional and spatial aspects of innovation Written by leading scholars in the fields of economic geography innovation studies planning and technology policy the fourteen chapters cover conceptual and measurement issues in innovation and relevant technology policies The contributors examine how different institutional factors facilitate or hamper the flows of information and knowledge within and across firms regions and nations In particular they provide insights into the roles of important institutions such as gender and culture which are often neglected in the innovation literature and demonstrate the key role which geography plays in the innovation process Institutions and policy measures which support entrepreneurship and cluster development are also discussed The result is a comparative picture of the institutional factors underlying innovation systems across the globe NeoLiberal Scotland Neil Davidson, Patricia McCafferty, 2009-12-14 Neoliberal Scotland argues that far from

passing Scotland by as is so often claimed neoliberalism has in fact become institutionalised there As the mainstream political parties converge on market friendly policies and business interests are equated with the public good the Scottish population has become more and more distanced from the democratic process to the extent that an increasing number now fail to vote in elections This book details for the first time these negative effects of neoliberal policies on Scottish society and takes to task those academics and others who either defend the neoliberal order or refuse to recognise that it exists Neoliberal Scotland represents both an intervention in contemporary debates about the condition of Scotland and a case

study of more general interest of how neoliberalism has affected one of the stateless nations of the advanced West Chapter One takes an overview of the origin and rise of neoliberalism in the developed world arguing that it repudiates rather than continues the thought of Adam Smith and the Scottish Enlightenment Part One addresses the fundamental issue of social class in Scotland over three chapters Chapter Two attempts to locate the ruling class both internally and externally Chapter Three explores the changing nature of working class membership and its collective experience Chapter Four follows the working class into the workplace where heightened tensions in the state sector have provoked an increasingly militant response from trade unionists Part Two engages with the broader impact of neoliberalism on Scottish society through a diverse series of studies Chapter Five assesses claims by successive Scottish governments that they have been pursuing environmental justice Chapter Six examines how Glasgow has been reconfigured as a classic example of the neoliberal city Chapter Seven looks at another aspect of Glasgow in this case as the main destination of Eastern European migrants who have arrived in Scotland through the international impact of neoliberal globalisation Chapter Eight investigates the economic intrusion of private capital into the custodial network and the ideological emphasis on punishment as the main objective in sentencing Chapter Nine is concerned with the Scottish manifestations of the happiness industry showing how market fundamentalist notions of individual responsibility now structure even the most seemingly innocuous attempts to resolve supposed attitudinal problems Finally Chapter Ten demonstrates that the limited extent to which devolved Scottish governments particularly the present SNP administration have been able to go beyond the boundaries of neoliberal orthodoxy has been a function of the peculiarities of party competition in Holyrood rather than representing a fundamental disavowal of the existing order

Small Nations, High Ambitions X. Hubert Rioux, 2020-02-24 Given the importance that entrepreneurship and start up businesses in technology intensive sectors like life sciences renewable energy artificial intelligence financial technologies software and others have come to assume in economic development the access of entrepreneurs to appropriate levels of finance has become a major focus of policymakers in recent decades Yet this prominence has led to a variety of policy models across countries and even within countries as different levels of government have adapted to new challenges by refining or transforming pre existing institutions and crafting new policy tools *Small Nations High Ambitions* investigates the roots of such policy diversity at the subnational level offering in depth accounts of the evolution of Quebec's and Scotland's policy strategies in the entrepreneurial finance sector and venture capital more specifically As compared to other regions and provinces in the United Kingdom and Canada Quebec and Scottish venture capital ecosystems rely on a high degree of state intervention either direct through public investment funds or indirect through government backed hybrid or tax advantaged funds These two regions can thus be described as sponsor states heavily involved in the strategic backing of innovative businesses Whereas most of the literature on venture capital has focused on economic variables to explain variations in policy models this book seeks to explain policy divergence in Quebec

and Scotland through political and ideological lenses Its main argument is that the development of venture capital ecosystems in these regions was underpinned by Qu b cois and Scottish nationalisms which induced preferences for policy asymmetry and state intervention

Local Economic and Employment Development (LEED) Global Knowledge Flows and Economic Development OECD,2004-06-02 Global knowledge flows are becoming a key driver of economic development This book examines how countries can develop policies to reap the benefits that they bring

Business History and International Business Peter Buckley,2014-01-02 Business History and International Business are cognate subjects There are few if any studies of international business that do not require a proper study of context International business decision making must be made relevant by a considered evaluation of the circumstances surrounding that decision This often means putting it into its historical context The contributions that the study of international business can make to business history are the input of appropriate theory and appropriate research methods The best international business theory can illuminate the seemingly disparate strategies of firms in given historical circumstances and can provide an integrated overarching conceptual structure of the study of business history The research methods used in international business are also worthy of scrutiny by business historians The proposition of this book is that international business theory and method can complement business history This cross fertilization has been occurring with increasing regularity over the past few decades and this book brings together some of the fruits of this conjunction of two important intellectual domains This book was published as a special issue of Business History

The Multinational Subsidiary N. Hood,2003-11-03 This book highlights the evolution of the thinking on the multinational subsidiary over a quarter of a century from the early concerns about the branch plant syndrome to very current topics relating to the Multinational Enterprise as a differentiated corporate network and its role in innovation and entrepreneurship It summarises and evaluates the state of the art in research on the multinational subsidiary with particular reference to managerial and economic development dimensions The volume presents the articles of Neil Hood written in conjunction with other leading scholars particularly Julian Birkinshaw and Stephen Young along with new contributions The book will be of major interest to students researchers and policy makers

Regional Development in the Knowledge Economy Philip Cooke,Andrea Piccaluga,2006-09-27 International contributors provide the first examination of the growing subject of regional knowledge economy development Illustrated by data and stylized accounts the international contributors chart the evolution of knowledge economies questioning the way in which they work and criticize accepted theories and inform how places can cope in the knowledge economy Based in concept on Cooke s Knowledge Economies Routledge 2002 Regional Development in the Knowledge Economy is a well grounded work exploring this increasingly important theme with relevance to innovation systems and

Fiscal Federalism in Multinational States François Boucher, Alain Noël, 2021-07-21 Substate nationalism is often studied as a question of political identity and cultural recognition The same applies to the study of multinational federalism it is mainly conceived as a tool for the accommodation of minority cultures and identities Few works in political philosophy and political science pay attention to the fiscal and redistributive dimensions of substate nationalism and multinational federalism Yet nationalist movements in Western countries make crucial claims about fiscal autonomy and the fair distribution of resources between national groups within the same state In recent years Scottish nationalists have demanded greater tax autonomy Catalan and Flemish nationalists have viewed themselves as unfairly disadvantaged by centralized fiscal arrangements and equalization payments and social transfers in Canada have exacerbated tensions within the federation In *Fiscal Federalism in Multinational States* contributors from political philosophy and political science disciplines explore the fiscal side of substate nationalism in Canada Belgium the United Kingdom Spain and Australia Chapters examine the connection between secessionist claims and interregional redistributive arrangements power relations in federations where taxing and spending responsibilities are shared between orders of government the relationship between substate nationalism and fiscal autonomy and the role of federal governments in redistributing resources among substate national groups *Fiscal Federalism in Multinational States* brings together scholars of nationalism and federalism in a groundbreaking analysis of the connections between nationalist claims and fiscal debates within plurinational states **Multinationals, Clusters and**
