Ruppe,Jane F. Barstad,2013-11-11 Although underwater archaeology has assumed its rightful place as an important subdiscipline in the field the published literature has not kept pace with the rapid increase in the number of both prehistoric and historic underwater sites The editors have assembled an internationally distinguished roster of contributors to fill this gap In addition to both geographical and topical approaches the chapters also focus on

technology law public and private institutional roles and goals and the research and development of future technologies and public programs **Rethinking Resilience, Adaptation and Transformation in a Time of Change** Wanglin Yan, Will Galloway, 2017-03-21 This book contributes to the literature on resilience hazard planning risk management environmental policy and design presenting articles that focus on building resilience through social and technical means Bringing together contributions from Japanese authors the book also offers a rare English language glimpse into current policy and practice in Japan since the 2011 Tohoku disaster The growth of resilience as a common point of contact for fields as disparate as economics architecture and population politics reflects a shared concern about our capacity to cope with and adapt to change The ability to bounce back from hardship and disaster is essential to all of our futures Yet if such ability is to be sustainable and not rely on a brute force response innovation will need to become a core practice for policymakers and on the ground responders alike The book offers a valuable reference guide for graduate students researchers and policy analysts who are looking for a holistic but practical approach to resilience planning
