Hao,Montserrat Fullà,2004 RESUMEN Narra la historia de la concurso entre el brit nico Robert Scott y el noruego Roald Amundsen por ser el primero hombre en pisar el polo sur **The Coldest Place on Earth - With Audio Level 1 Oxford Bookworms Library** Tim Vicary,2014-09-22 A

level 1 Oxford Bookworms Library graded reader This version includes an audio book listen to the story as you read Written for Learners of English by Tim Vicary In the summer of 1910 a race began A race to be the first man at the South Pole in Antarctica Robert Falcon Scott an Englishman left London in his ship the Terra Nova and began the long journey south Five days later another ship also began to travel south And on this ship was Roald Amundsen a Norwegian But Antarctica is the coldest place on earth and it is a long hard journey over the ice to the South Pole Some of the travellers never returned home This is the story of Scott and Amundsen and of their famous and dangerous race **Salvaje de corazon** John Eldredge,

Problems of Polar Research American Geographical Society of New York, 1928 Ways and means of polar exploration and problems needing further study **Captain Scott's Invaluable Assistant: Edgar Evans** Isobel Williams, 2011-11-30 Petty Officer Edgar Evans was Captain Scott's giant worker and his invaluable assistant He went with Scott on both the British Antarctic Expeditions of the early 1900s the Discovery expedition of 1901 and the Terra Nova expedition in 1910 distinguishing himself on both In 1903 with Scott Edgar made the first long and arduous sortie onto the Plateau of Victoria Land The journey highlighted Edgar's common sense strength courage wit and unflappability Thus it came as no surprise when in 1911 Edgar was chosen by Scott to be one of the five men to go on the final attempt at the South Pole Tragically the Welsh Giant was the first to die on the ill fated return and posthumously Edgar was blamed in some quarters for causing the deaths of the whole party It was suggested that his failure was due to his relative lack of education which made him less able to endure the conditions than his well educated companions Isobel Williams repudiates this shameful suggestion and redresses the balance of attention paid to the upper and lower deck members of Scott's famous expeditions **Antarctica in British Children's Literature** Sinead Moriarty, 2020-11-29 For over a century British authors have been writing about the Antarctic for child readers yet this body of literature has never been explored in detail Antarctica in British Children's Literature examines this field for the first time identifying the dominant genres and recurrent themes and tropes while interrogating how this landscape has been constructed as a wilderness within British literature for children The text is divided into two sections Part I focuses on the stories of early twentieth century explorers such as Robert F Scott and Ernest Shackleton Antarctica in British Children's Literature highlights the impact of children's literature on the expedition writings of Robert Scott including the influence of Scott's close friend author J M Barrie The text also reveals the important role of children's literature in the contemporary resurgence of interest in Scott's long term rival Ernest Shackleton Part II focuses on fictional narratives set in the Antarctic including early twentieth century whaling literature adventure and fantasy texts contemporary animal stories and environmental texts for children Together these two sections provide an insight into how depictions of this unique continent have changed over the past century reflecting transformations in attitudes towards wilderness and wild landscapes **Key Concepts in Geography** Nicholas Clifford, Sarah Holloway, Stephen P Rice, Gill Valentine, 2008-12-12 This book clearly outlines key concepts that all geographers should readily be able to explain It does so

in a highly accessible way It is likely to be a text that my students will return to throughout their degree Dr Karen Parkhill Bangor University The editors have done a fantastic job This second edition is really accessible to the student and provides the key literature in the key geographical terms of scale space time place and landscape Dr Elias Symeonakis Manchester Metropolitan University An excellent introductory text for accessible overviews of key concepts across human and physical geography Professor Patrick Devine Wright Exeter University Including ten new chapters on nature globalization development and risk and a new section on practicing geography this is a completely revised and updated edition of the best selling standard student resource Key Concepts in Geography explains the key terms space time place scale landscape that define the language of geography It is unique in the reference literature as it provides in one volume concepts from both human geography and physical geography Four introductory chapters on different intellectual traditions in geography situate and introduce the entries on the key concepts Each entry then comprises a short definition a summary of the principal arguments a substantive 5 000 word discussion the use of real life examples and annotated notes for further reading Written in an accessible way by established figures in the discipline the definitions provide thorough explanations of all the core concepts that undergraduates of geography must understand to complete their degree

Biochemistry Explained Thomas Millar, 2018-12-14 Biochemistry Explained employs an innovative approach which has proven highly successful in the author's own classes The author establishes a thorough understanding of the foundations of and common linkages between molecular structures and reactions so that eventual interpretation of complex biochemical pathways and reactions is easy All of the major molecular structures and biochemical pathways are explained and for the most part these center on mammalian biochemistry The text is supported by biochemical nomenclature and questions to bear in mind while reading Higher learning sections are also provided for advanced students Written in an informal conversational style this textbook will serve as an invaluable resource for any student who is struggling with the standard texts and for postgraduate students who need to refresh their knowledge

Antarctica and the Humanities Roberts Peder, Lize-Marié van der Watt, Adrian Howkins, 2016-08-31 The continent for science is also a continent for the humanities Despite having no indigenous human population Antarctica has been imagined in powerful innovative and sometimes disturbing ways that reflect politics and culture much further north Antarctica has become an important source of data for natural scientists working to understand global climate change As this book shows the tools of literary studies history archaeology and more can likewise produce important insights into the nature of the modern world and humanity more broadly

Correspondance, La próxima frontera Albert Figueras, 2017-10-02 Llegar a pisar la Luna, alcanzar el Polo Sur, ser capaces de captar y reproducir la voz o poder mandar un correo electrónico desde Barcelona hasta un bar remoto en la selva de Borneo en pocos segundos son logros de la humanidad que tienen un denominador común: la voluntad del Homo sapiens para cruzar fronteras que a muchos congéneres les habrían parecido infranqueables. La idea de frontera implica que hay un más allá de ella; también sugiere una diferencia entre lo conocido y lo ignoto, entre la seguridad de lo cierto y el miedo de la incertidumbre. Sin embargo, desde el punto de vista del colectivo humano, cruzar la frontera suele significar un avance notable que puede conllevar incluso un cambio en la manera de pensar. La próxima frontera te propone acompañar al Homo sapiens desde que empezó a caminar en algún lugar del continente africano hasta ser capaz de conectarse con cualquier otro congénere a través de las redes sociales, un viaje intenso, curioso y poco convencional en busca de nuestro límite con las máquinas y nuestras diferencias con los animales para tratar de averiguar qué nos hace humanos. Te subes al autobús.

The Saturday Review of Politics, Literature, Science, Art, and Finance, 1914 *Invierno* Alessandro Vanoli, 2019-06-24 A nuestro alrededor el silencio; nosotros estamos al calor de un fuego encendido. Es la milenaria historia de una naturaleza que contiene la respiración. Contar el invierno significa hablar de una parte profunda de la historia de la humanidad: las grandes glaciaciones, la lucha por la supervivencia, pero también de la idea del renacer ligada a los mitos y a las fiestas más antiguas. Estación de la suspensión tanto de los trabajos agrícolas como de la guerra; es uno de los momentos más importantes del año, marcado por ritos religiosos y por la esperanza de renovación que esos ritos expresan. Seguirlo a lo largo de los siglos nos remite a cazadores, a enfermedades, a agotadoras retiradas militares al frío de los monasterios y luego a hechizados, seres escondidos en el corazón de la tierra, a largas vigilias frente al fuego en el recogimiento de la intimidad doméstica. Un mullido intervalo blanco, festivo y mortal al mismo tiempo que nunca deja de apelar a nuestro imaginario.

Relatos del confín del mundo (y del universo) Juan Diego Soler Pulido, 2021-11-01 En busca de la Antártida, el último lugar de la tierra. Una ventana al cosmos. En el extremo sur de nuestro planeta se esconde un territorio que fue desconocido para los humanos durante la mayor parte de su historia. Antártida. Durante siglos, los más audaces exploradores cruzaron los océanos y protagonizaron extraordinarias hazañas en búsqueda de sus costas. Cuando sus barcos lograron sortear el embate del frío lacerante, el embrujo de sus días sin noche y la amenaza de los enormes témpanos de hielo que ha sido llamado el último lugar de la Tierra se convirtió en una obsesión. Como los astronautas en los tiempos modernos, los humanos atravesaron una nueva

frontera y se internaron como hormigas en este inconmensurable desierto de hielo para coronar con sus banderas el punto más austral del mundo. Esta es su historia. Hoy poco más de un siglo después de que los humanos llegaran al Polo Sur, Antártida se ha convertido en un centro de investigaciones a donde llegan cada año expertos de todo el mundo para desarrollar estudios científicos que permiten entender nuestro planeta y el universo. El astrofísico colombiano Juan Diego Soler fue uno de ellos. En 2010 aterrizó por primera vez en esas gelidas planicies para, con el apoyo de la NASA y la Fundación Nacional de Ciencias de los Estados Unidos, lanzar a la estratosfera un telescopio robótico impulsado por un globo de helio y ver la luz más allá de las estrellas. Esta también es su historia. Relatos del confín del mundo y del universo es un viaje a través de palabras, mapas e imágenes a uno de los lugares más misteriosos de la Tierra: el hogar de millones de pingüinos y miles de ballenas y focas. Es una travesía a un terreno inhóspito e inhumanamente frío en compañía de quienes arriesgaron su vida en nombre de la exploración y de quienes hoy regresan allí en nombre de la ciencia.
