Scottish Seas Douglas Jones, 2009 In the Scottish fishing village of Auchmithie in 1707 Mac Ayton the youngest in a family of brave Covenanters grows strong amid clashes with the sea bandits myths animals and brothers **Britain's Living Seas** Hannah Rudd, 2023-01-19 Discover the incredible diversity of life within our seas and learn how we can all play a role in protecting and conserving it Our seas are home to an abundance of fascinating creatures and stunning habitats From spectacular kelp forests to intricate rocky reefs and from mud plains to open ocean the British Isles have a diversity of marine ecosystems that rival those seen on any nature documentary Yet for generations we have been slowly suffocating life beneath the waves Decades of unsustainable exploitation endless pollution and a warming climate have had a devastating effect on our marine habitats However it is not too late to make a difference and change course Written in collaboration with the Wildlife Trusts Britain's Living Seas provides a user friendly and richly illustrated guide to coasts around the British Isles uncovering the diversity of life within a range of marine habitats and the life giving services that they provide us Outlining how their very existence is under threat marine biologist Hannah Rudd presents an alternative and sustainable future for the management of our seas We can all do our bit as individuals too Through practical steps such as re thinking what we eat our relationship with plastic and how we spend our money we can become marine conservationists in our everyday lives and help to create a healthier future for our oceans Everyone can discover more about the wonders within the waters that surround us and play a part in rebuilding our connection with the natural world Monarchs, Ministers, and Maps David Buisseret, 1992-12-15 These diverse essays investigate political factors behind the rapid development of cartography in Renaissance Europe and its impact on emerging European nations By 1500 a few rulers had already discovered that better knowledge of their lands would strengthen their control over them by 1550 the cartographer's art had become an important instrument for bringing territories under the control of centralized government Throughout the following century increasing governmental reliance on maps demanded greater accuracy and more sophisticated techniques This volume a detailed survey of the political uses of cartography between 1400 and 1700 in Europe answers these questions When did monarchs and ministers begin to perceive that maps could be useful in government For what purposes were maps commissioned How accurate and useful were they How did cartographic knowledge strengthen the hand of government By focusing on particular places and periods in early modern Europe the chapters offer new insights into the growth of cartography as a science the impetus behind these developments often rulers attempting to expand their power and the role of mapmaking in European history The essay on Poland reveals that cartographic progress came only under the impetus of powerful rulers another explores the French monarchy's role in the burst of scientific cartography that marked the opening of the splendid century Additional chapters discuss the profound influence of cartographic ideas on the English aristocracy during the sixteenth century the relation of progress in mapmaking to imperialistic goals of the Spanish and Austrian Habsburgs and the

supposed primacy of Italian mapmaking following the Renaissance Contributors to this volume are Peter Barber David Buisseret John Marino Michael J Mikos Geoffrey Parker and James Vann These essays were originally presented as the Kenneth Nebenzahl Jr Lectures in the History of Cartography at the Newberry Library
