

SPAIN
 I'd like to see Africa, but I can't seem to get it. I'd like to see the top part of Morocco, but I can't seem to get it. I'd like to see the whole country, but France disagrees and won't give it up.

FRANCE
 Our country's love affair with Africa began in Senegal and Algeria, from where we sent word across the Sahara until the British stopped us in Sudan. We own more of Africa than anyone else—even if most of it is sand!

ITALY
 We may be a young country, but we want our own empire, just like France and Britain.

We've already grabbed Eritrea and Somalia, and now it's Libya's turn. The Ethiopians throw us out—but one day, who knows?

BRITAIN
 The Ottoman rulers of Egypt were weak, so we stepped in and took over control of the Suez Canal to protect our sea route to India. An Islamic religious leader known as the Mahdi "graded" our? And a rebellion in Sudan (then part of Egypt), so we fought a war and took charge there as well.

BELGIUM
 I'm King Leopold II of Belgium. I ran this massive chunk of central Africa as my personal estate and made a huge fortune from the rubber plantations and copper. People said I mistreated my African workers, and maybe it is true that within 17 years half the population had been worked or starved to death. But was it really necessary to make me hand the Congo over to the state of Belgium? No wonder!

GERMANY
 Our leaders, Kaiser Wilhelm I and Chancellor Bismarck, were determined that the great German Empire should not be left out of the African land grab, so we carved out four widely scattered colonies for ourselves from what remained. We may have been last on the scene, but, hey, we deserve our place in the sun, too, don't we?

PORTUGAL
 We used to ship slaves to Brazil from our forts along the coasts of Mozambique and Angola, which we've owned since the 1500s. But now that business is over, we've moved inland to claim land there.

BRITAIN
 We took over the Cape colony of South Africa from the Dutch in 1804. That gave us a base to move into southern Africa, with its wealth of gold and diamonds. Leading the way was Cecil Rhodes, who dreamed of building a railroad from Cairo in Egypt to the Cape.

THE SCRAMBLE FOR AFRICA

Before 1870, European colonization of Africa was limited to a handful of small coastal settlements. These diamonds were found in South Africa. Suddenly every colonial power wanted a share of Africa's mineral wealth—and the unclaimed Congo basin was a prime target. The race for colonies grew so frantic that in 1884 a conference was held in Berlin to settle rival claims. African resistance was powerless against European guns, and by 1914 almost the entire continent was under European rule.

The Scramble for Africa Robin Brooke-Smith, 1987-11-11 The extended plan of the series is designed in response to the changing trends in history examinations at 18 plus which now demand the study of documentary sources and the testing of historical skills Each volume similar in format to the earlier books in the series concentrates on a particular topic within a narrower time span A general introduction to the period in question is followed by eight sections dealing with a major theme Each section consists of an introduction a series of documents to illustrate the theme drawn mainly from primary sources and sets of questions following groups of documents The student is thus introduced to a wider range of sources than that to be found in the standard textbook

1885 galvanized a phenomenon that came to be known as the Scramble for Africa. The conference established two fundamental rules for European seizure of Africa. The first of these was that no recognition of annexation would be granted without evidence of a practical occupation and the second that a practical occupation would be deemed unlawful without a formal appeal for protection made on behalf of a territory by its leader, a plea that must be committed to paper in the form of a legal treaty. This began a rush spearheaded mainly by European commercial interests in the form of Chartered Companies to penetrate the African interior and woo its leadership with guns, trinkets and alcohol and having thus obtained their marks or seals upon spurious treaties began establishing boundaries of future European African colonies. The ease with which this was achieved was due to the fact that at that point traditional African leadership was disunited and the people had just staggered back from centuries of concussion inflicted by the slave trade. Thus to usurp authority to intimidate an already broken society and to play one leader against the other was a diplomatic task so childishly simple the matter was wrapped up for the most part in less than a decade. There were some exceptions to this however the most notable of which was perhaps the Zulu Nation, a centralized monarchy of enormous military prowess that required a British colonial war, the much storied Anglo Zulu War of 1879, to affect pacification. Another was the amaNdebele, an offshoot of the Zulu established as early as the 1830s in the southeastern quarter of what would become Rhodesia and later still Zimbabwe in the future. Both were powerful centralized monarchies fortified by an organized and aggressive professional army subdivided into regiments and owing fanatical loyalty to the crown. The Zulu were not dealt with by treaty and their history is perhaps the subject of another episode of this series but the amaNdebele were and early European treaty and concession gatherers were required to tread with great caution as they entered their lands. It would be a long time before the inevitable course of history forced the amaNdebele to submit to European domination. Although treaties and British gunboat diplomacy played a role it was ultimately war, conquest and defeat in battle that brought the amaNdebele to heel. Despite this the amaNdebele notwithstanding their eventual military defeat commanded enormous respect from the British. This was also true with the Zulu. The British were a martial nation themselves and they saw the concept of the Noble Savage as the romance of a bygone age offering up the esteem due to a ruling aristocracy according to the rules of chivalry. With the defeat of the amaNdebele in 1893.

The Scramble for Africa Muriel Evelyn Chamberlain, 1999. This study contrasts the Victorian image of Africa with what has been revealed by late 20th century research on the history of Africa. In addition to the politics and diplomacy of Europe it gives equal attention to African history.

The Scramble for Africa, 1876-1912 Thomas Pakenham, 2001. The Scramble for Africa astonished everyone. In 1880 most of the continent was ruled by Africans and barely explored. By 1902 five European Powers and one extraordinary individual had grabbed almost the whole continent giving themselves 30 new colonies and protectorates and 10 million square miles of new territory and 110 million bewildered new subjects. Thomas Pakenham's story of the conquest of Africa is recognised as one of the finest narrative histories of the last few decades. We

are given arresting vignettes of the main players Lord Derby protesting at this absurd scramble the Belgian Emperor King Leopold II grabbing and ruthlessly exploiting the rubber deposits in the Congo and Prince Otto von Bismarck casually munching on prawns at the Congress of Berlin while determining the fate of millions *Scramble for Africa* Kevin Daniels,2022-05-25 The Scramble for Africa likewise called the partition of Africa or the conquest of Africa was the intrusion addition division and colonization of the majority of Africa by seven Western European powers during a brief period known as New imperialism The 10% of Africa that was under proper European control in 1870 expanded to very nearly 90% by 1914 with just Ethiopia Abyssinia and Liberia staying autonomous however Ethiopia would later be attacked and involved by Italy Th book was written to Broaden our knowledge of African history Understand Europeans activities in Africa prior independence Know why Africans are still attached to European Understand why Africa still remains third world countries

The Scramble for Africa M. E. Chamberlain,2014-01-14 In 1870 barely one tenth of Africa was under European control By 1914 only about one tenth Abyssinia Ethiopia and Liberia was not This book offers a clear and concise account of the scramble or race for Africa the period of around 20 years during which European powers carved up the continent with little or no consultation of its inhabitants In her classic overview M E Chamberlain Contrasts the Victorian image of Africa with what we now know of African civilisation and history Examines in detail case histories from Egypt to Zimbabwe Argues that the history and background of Africa are as important as European politics and diplomacy in understanding the scramble Considers the historiography of the topic taking into account Marxist and anti Marxist financial economic political and strategic theories of European imperialism This indispensable introduction now in a fully updated third edition provides the most accessible survey of the scramble for Africa currently available The new edition includes primary source material unpublished elsewhere new illustrations and additional pedagogical features It is the perfect starting point for any study of this period in African history *The Arabs and the Scramble for Africa* John Craven Wilkinson,2015 This book examines the history of the European Scramble for Africa from the perspective of the Omanis and other Arabs in East Africa It will be of interest not only to African specialists but also those working on the Middle East where awareness is now emerging that the history of those settled on the southern peripheries of Arabia has been intimately entwined with Indian Ocean maritime activities since pre Islamic times The nineteenth century however saw these maritime borderlands being increasingly drawn into a new world economy one of whose effects was the development of an ivory front in the interior of the continent that by the 1850s led the Omanis and Swahili to establish themselves on the Upper Congo A reconstruction of their history and their interaction with Europeans is a major theme of this book European colonial rivalries in Africa is not a subject in vogue today while the Arabs are still largely viewed as invaders and slavers The fact that the British separated the Sultanates of Muscat and Zanzibar is reflected in European research so that historians have little grasp of the geographic tribal and religious continuum that persisted between overseas empire and the Omani homeland Ibadism is regarded as irrelevant to the

mainstream of Islamic religious protest whereas during the lead up to establishing direct colonial rule its ideology played a significant role even the final rally against the Belgians in the Congo was conducted in the name of an Imam al Muslim n

The New Scramble for Africa Pádraig Risteard Carmody, 2011-06-07. Once marginalized in the world economy, the past decade has seen Africa emerge as a major global supplier of crucial raw materials like oil, uranium and coltan. With its share of world trade and investment now rising and the availability of natural resources falling, the continent finds itself at the centre of a battle to gain access to and control of its valuable natural assets. China's role in Africa has loomed particularly large in recent years, but there is now a new scramble taking place involving a wider range of established and emerging economic powers from the EU and US to Japan, Brazil and Russia. This book explores the nature of resource and market competition in Africa and the strategies adopted by the different actors involved, be they world powers or small companies. Focusing on key commodities, the book examines the dynamics of the new scramble and the impact of current investment and competition on people, the environment and political and economic development on the continent. New theories, particularly the idea of Chinese flexigemony, are developed to explain how resources and markets are accessed. While resource access is often the primary motive for increased engagement, the continent also offers a growing market for low-priced goods from Asia, and Asian-owned companies. Individual chapters explore old and new economic power interests in Africa: oil, minerals, timber, biofuels, food and fisheries, and the nature and impacts of Asian investment in manufacturing and other sectors. *The New Scramble for Africa*
