Screen World 1982:

Korean War Filmography Robert J. Lentz, 2016-05-01 The Korean experience changed the way Americans viewed war. The lack of a clear cut victory inspired filmmakers to try to make sense of fighting another country's civil war and risking American lives for an unpopular cause. This filmography details more than 90 English language films. Each entry includes complete cast and credit listings, a plot synopsis, evaluation, review snippets, and notice of video availability. This book places each film in its historical context, assesses the essential truthfulness of each film, and evaluates its entertainment value and discusses how and why Korean War films differ from other Hollywood war genres. Four appendices list the films by chronology, production company, and studio level of historical accuracy and subject and theme. Additional appendices list films with incidental references to the Korean War, documentaries on the Korean War, and South Korean films about the war. Photographs, a bibliography, and an index are included. [Gloria Grahame, Bad Girl of Film Noir](#) Robert J. Lentz, 2014-01-10 A marvelous actress, Gloria Grahame (1923-1981) was also an iconic figure of film noir. Her talents are showcased in several classic motion pictures of the 1940s and 1950s, including *It's a Wonderful Life*, *Crossfire*, *In a Lonely Place*, *The Greatest Show on Earth*, *The Big Heat*, *Oklahoma*, and *The Bad and the Beautiful*, for which she earned an Academy Award. This comprehensive overview of Gloria Grahame's life and work examines each of her feature films in detail, as well as her made-for-television productions, her television series appearances, and her stage career. Also discussed are the varied ways in which Grahame's acting performances were affected by her tumultuous personal life, which included four marriages, the second to director Nicholas Ray, and the fourth to Ray's stepson, Anthony. [Video and DVD Industries](#) Paul McDonald, 2019-07-25 When the videocassette recorder was launched on the consumer market in the mid-1970s, it transformed home entertainment. Bringing together complementary but also competing interests from the consumer electronics industry and the film, television, and other copyright industries, video created a new sector of media business. Two decades later, DVD reinvented video media for the digital age. DVD provided consumers with an innovative form of entertainment technology and almost instantaneously became the catalyst for a huge boom in the video market. Although the VCR and DVD created major markets for video hardware and software, the video business has been continually shaped by industry conflicts and tensions. Repeatedly, the video market has become divided when faced with the introduction of competing formats. Easy reproduction of films and other works on cassette or disc made video software a lucrative market for the copyright industries but also intensified struggles to combat the effects of commercial piracy. *Video and DVD Industries* examines the business of video entertainment and provides the first study looking at DVD from an industrial perspective. Detailing divisions in the video business, the book outlines industry battles over incompatible formats, from the Betamax/VHS war to competing laserdisc systems, alternatives such as video compact disc or Digital Video Express, and the introduction of HDDVD and Blu-ray high definition systems. Chapters also look at the formation of international markets in the globalization of video media, the contradictory responses

of the Hollywood studios to video and DVD and the legal and technological measures taken to control industrialized video piracy **John Willis Screen World 1982** ,1982 Lee Marvin Robert J. P. Wolf,2010-07-22 Over a mere three decades the video game became the entertainment medium of choice for millions of

people who now spend more time in the interactive virtual world of games than they do in watching movies or even television. The release of new games or game playing equipment such as the PlayStation 2 generates great excitement and even buying frenzies. Yet until now this giant on the popular culture landscape has received little in depth study or analysis. In this book Mark J P Wolf and four other scholars conduct the first thorough investigation of the video game as an artistic medium. The book begins with an attempt to define what is meant by the term video game and the variety of modes of production within the medium. It moves on to a brief history of the video game then applies the tools of film studies to look at the medium in terms of the formal aspects of space time narrative and genre. The book also considers the video game as a cultural entity, object of museum curation and repository of psychological archetypes. It closes with a list of video game research resources for further study.

A Heart at Fire's Center Steven C. Smith, 2002-05-31. No composer contributed more to film than Bernard Herrmann who in over 40 scores enriched the work of such directors as Orson Welles, Alfred Hitchcock, François Truffaut and Martin Scorsese. In this first major biography of the composer Steven C. Smith explores the interrelationships between Herrmann's music and his turbulent personal life using much previously unpublished information to illustrate Herrmann's often outrageous behavior, his working methods and why his music has had such lasting impact. From his first film *Citizen Kane* to his last *Taxi Driver*, Herrmann was a master of

evoking psychological nuance and dramatic tension through music often using unheard of instrumental combinations to suit the dramatic needs of a film His scores are among the most distinguished ever written ranging from the fantastic Fahrenheit 451 The Day the Earth Stood Still to the romantic Obsession The Ghost and Mrs Muir to the terrifying Psycho Film was not the only medium in which Herrmann made a powerful mark His radio broadcasts included Orson Welles s Mercury Theatre on the Air and The War of the Worlds His concert music was commissioned and performed by the New York Philharmonic and he was chief conductor of the CBS Symphony Almost as celebrated as these achievements are the enduring legends of Herrmann s combativeness and volatility Smith separates myth from fact and draws upon heretofore unpublished material to illuminate Herrmann s life and influence Herrmann remains as complex as any character in the films he scored a creative genius an indefatigable musicologist an explosive bully a generous and compassionate man who desperately sought friendship and love Films scored by Bernard Herrmann Citizen Kane The Ghost and Mrs Muir Vertigo Psycho Fahrenheit 451 Taxi Driver The Magnificent Ambersons The Man Who Knew Too Much North By Northwest The Birds The Snows of Kilimanjaro Cape Fear Marnie Torn Curtain among others

Screening the World Stuart Hanson, 2019-07-26 This book charts the development of the multiplex cinema as the pre eminent form of film exhibition across the world Going from its origins in the USA in the 1960s to its expansion overseas from the mid 1980s across Europe Australia and other parts of Asia Pacific the book considers the emergence of a series of initially regional then national and then international exhibition circuits However more than a consideration of US overseas expansion on the part of companies this book examines the hegemony of the multiplex as a cultural and business form arguing for its significance as a phenomenon that has transcended national and global boundaries and which has become the predominant venue for film viewing Implicit in this analysis is a recognition of the domination of US media multi nationals and Hollywood cinema and the

development of the multiplex cinema as symbolic of the extension and maintenance of the USA's cultural and economic power. With case studies ranging from European countries such as Belgium, France, Germany and The Netherlands to Pacific Asian countries such as Australia, China, Japan and South Korea, this book is the first to explore the development of multiplexes on a global scale.

Retrofitting Blade Runner Judith Kerman, 1991. This book of essays looks at the multitude of texts and influences which converge in Ridley Scott's film *Blade Runner*, especially the film's relationship to its source novel Philip K. Dick's *Do Androids Dream of Electric Sheep?* The film's implications as a thought experiment provide a starting point for important thinking about the moral issues implicit in a hypertechnological society. Yet its importance in the history of science fiction and science fiction film rests equally on its mythically and psychologically resonant creation of compelling characters and an exciting story within a credible science fiction setting. These essays consider political, moral and technological issues raised by the film as well as literary, filmic, technical and aesthetic questions. Contributors discuss the film's psychological and mythic patterns, important political issues and the roots of the film in *Paradise Lost*, *Frankenstein*, detective fiction and previous science fiction cinema.
