## Screening Space:

Screening Space Vivian Carol Sobchack, 1997 This text attempts to shape definitions of the American science fiction film studying the connection between the films and social preconceptions It covers many classic films and discusses their import seeking to rescue the genre from the neglect of film theorists The book should appeal to both film buff and fans of science fiction

Screen Interiors Pat Kirkham, Sarah A. Lichtman, 2021-03-11 Covering everything from Hollywood films to Soviet cinema London's queer spaces to spaceships horror architecture and action scenes Screen Interiors presents an array of innovative perspectives on film design Essays address questions related to interiors and objects in film and television from the early 1900s up until the present day Authors explore how interior film design can facilitate action and amplify tensions how rooms are employed as structural devices and how designed spaces can contribute to the construction of identities Case studies look at disjunctions between interior and exterior design and the inter relationship of production design and narrative With a lens on class sexuality and identity across a range of films including *Twilight of a Woman's Soul* 1913 *The Servant* 1963 *Caravaggio* 1986 and *Passengers* 2016 and illustrated with film stills throughout Screen Interiors showcases an array of methodological approaches for the study of film and design history

Image and Territory Jennifer Burwell, Monique Tschofen, 2007 In a culture that often understands formal experimentation or theoretical argument to be antithetical to pleasure Atom Egoyan has nevertheless consistently appealed to wide audiences around the world If films like *The Adjuster* *Calendar Exotica* and *The Sweet Hereafter* have ensured him international cult status as one of the most revered of all contemporary directors Egoyan's forays into installation art and opera have provided evidence of his versatility and confirmed his talents Throughout his career Atom Egoyan has shown himself to possess the rarest kind of singularity As Jonathan Romney puts it Egoyan's preoccupations and tropes have been so consistent that he's practically created his own genre<sup>3</sup> 1995:8 Hrag Vartanian adds 2Egoyanesque has become a word to film aficionados commonly understood to mean a cinematic moment that examines sexuality technology and alienation in the modern world<sup>3</sup> 2004 For this singularity Egoyan is widely hailed as a true auteur someone carrying on the legacy of the European art house traditions of Bergman Godard and Truffaut Certainly his work bears a most recognizable signature there is no confusing an Egoyan work with anyone else's Like his art house predecessors Egoyan clearly intends that his work be as Dudley Andrew puts it 2read rather than consumed<sup>3</sup> that is viewed meditatively reflected upon and discussed 2000:24 And indeed in this world in which filmmaking has become commonplace where as Egoyan has said 2what used to be a rarified activity is now available to anyone with a digital camera and a computer<sup>3</sup> 2001b:18 he intends through much of his work to recall an earlier image culture in which artists had an ability to produce something that gained its power precisely through its rarity

Cinema Off Screen Chenshu Zhou, 2021-07-06 At a time when what it means to watch movies keeps changing this book offers a case study that rethinks the institutional ideological and cultural role of film exhibition demonstrating that film exhibition can produce meaning in

itself apart from the films being shown Cinema Off Screen advances the idea that cinema takes place off screen as much as on screen by exploring film exhibition in China from the founding of the People's Republic in 1949 to the end of the Cold War in the early 1990s Drawing on original archival research interviews and audience recollections Cinema Off Screen decenters the filmic text and offers a study of institutional operations and lived experiences Chenshu Zhou details how the screening space media technology and the human body mediate encounters with cinema in ways that have not been fully recognized opening new conceptual avenues for rethinking the ever changing institution of cinema *Photoferroelectrics* Vladimir M. Fridkin, 2012-12-06 Since Valasek's discovery of the ferroelectric properties of Rochelle salt nearly 60 years ago ferroelectricity has been regarded as one of the traditional branches of dielectric physics It has had important applications in lattice dynamics quantum electronics and nonlinear optics The study of electron processes in ferroelectrics was begun with VUL's investigations of the ferroelectric properties of barium titanate 1 1 Intrinsic and extrinsic optical absorption band structure conductivity and photoconductivity carrier mobility and transport mechanisms were examined in this compound and in other perovskite ferroelectric semiconductors An important discovery was that of the highly photosensitive photoconducting ferroelectrics of type AVB<sub>1-x</sub>VC<sub>x</sub>VIII e.g. SbSI by MERZ et al in 1962 1 2 3 A large number of ferroelectric semiconductors some photosensitive some not are now known including broad band materials e.g. lithium niobate lithium tantalate barium and strontium niobate and type A<sub>1-x</sub>B<sub>x</sub>I compounds BI and narrow band semiconductors e.g. type A<sub>1-x</sub>IVB<sub>x</sub> compounds A series of improper ferroelectric semiconductors and photosensitive ferroelastics have been discovered of which Sb<sub>0.5</sub>O<sub>1</sub>I is an example 7 Owing to the uncertainty of their band structure the difficulty in determining the nature of the levels the complexity of alloying and their generally low mobility values ferroelectrics are rarely of interest regarded as nonlinear semiconductors The most fruitful approach has been the study of the influence of electrons especially nonequilibrium electrons and electron excitations on phase transitions and ferroelectric properties A large group of phenomena have recently been discovered and investigated **Vision and hearing screening for school-age children** World Health Organization, 2025-05-21 The substantial overlap between vision and hearing impairment prevalence presents a strong rationale for implementing combined screening programmes A joint approach could facilitate widespread screening particularly in low and middle income countries that have limited resources The Vision and hearing screening for school age children implementation handbook provides practical information to support personnel tasked with planning and implementation It outlines the equipment and human resources required for screening school age children as well as steps for referral follow up and management It is not designed to be a training manual Training content online modules can be accessed via Learning on TAP Supporting documents such as templates for consent forms and screen forms as well as health promotion materials are provided in the Annexes **Cinema of Actuality** Yuriko Furuhashi, 2013-09-13 During the 1960s and early 1970s Japanese avant garde filmmakers intensely explored the shifting role of the image in political activism and

media events Known as the season of politics the era was filled with widely covered dramatic events from hijackings and hostage crises to student protests This season of politics was Yuriko Furuhashi argues the season of image politics Well known directors including Oshima Nagisa Matsumoto Toshio Wakamatsu Kaji and Adachi Masao appropriated the sensationalized media coverage of current events turning news stories into material for timely critique and intermedial experimentation Cinema of Actuality analyzes Japanese avant garde filmmakers struggle to radicalize cinema in light of the intensifying politics of spectacle and a rapidly changing media environment one that was increasingly dominated by television Furuhashi demonstrates how avant garde filmmaking intersected with media history and how sophisticated debates about film theory emerged out of dialogues with photography television and other visual arts *Societies in Space* Gary Westfahl, 2025-01-21 Science fiction films and television programs about space travel have undergone a significant transformation since their inception In contrast to the early depictions of small spaceship crews on exploratory missions recent film and television portrayals depict much larger societies in space as well as the obstacles that arise with them This collection of essays examines many aspects of making space travel films from the process of screenwriting to the impact of Greek myth on modern film with illuminating commentary on contemporary problems including class distinction racism and sexism Contributors to this volume including several extensively published scholars and science fiction writers analyze a wide variety of relevant science fiction films and television programs ranging from Star Trek Silent Running the Alien films and Japanese anime to more recent works like Battlestar Galactica Avatar Elysium The Martian Passengers and Ad Astra
