Rymsza-Pawlowska,2017-10-03 During the 1976 Bicentennial celebration millions of Americans engaged with the past in brand new ways They became absorbed by historical miniseries like Roots visited museums with new exhibits that immersed them in the past propelled works of historical fiction onto the bestseller list and participated in living history events across the nation While many of these activities were sparked by the Bicentennial M J Rymsza Pawlowska shows that in fact they were symptomatic of a fundamental shift in Americans relationship to history during the 1960s and 1970s For the majority of the twentieth century Americans thought of the past as foundational to but separate from the present and they learned and thought about history in informational terms But Rymsza Pawlowska argues that the popular culture of the 1970s reflected an emerging desire to engage and enact the past on a more emotional level to consider the feelings and motivations of historic individuals and most importantly to use this in reevaluating both the past and the present This thought provoking book charts the era s shifting feeling for history and explores how it serves as a foundation for the experience and practice of history making today *Script-Based Semantics* Salvatore Attardo,2020-02-24 The book contains essays in honor of Victor

Raskin The contributions are all directly related to some of the major areas of work in which Raskin s scholarship has spanned for decades The obvious connecting idea is the encyclopedic script based foundation of lexical meaning which informs his pioneering work in semantics in the 1970s and 1980s The first part of the book collects articles directly concerned with script based semantics which examine both the theoretical and methodological premises of the idea and its applications Script based semantics is the foundation of both Raskin s ground breaking work in humor research addressed by the articles in part 2 and in Ontological semantics addressed in part 3 the most recent development of script based semantics The fourth part is dedicated to a less known but equally important strand of Raskin s research the applications of linguistics to other fields including writing lexicography and professional applications e g tourism Overall the book provides and up to date in depth discussion of an influential strand of the discussion on semantics and its most recent developments and influence on other seemingly unrelated fields such as Cognitive Linguistics **Cultural Change & Continuity In Central**

Asia Shirin Akiner,2013-10-28 First published in 1991 Central Asia is a vast sprawling territory with no precise boundaries

no precise geographic definition There is much detailed closely focused research that remains to be done on every part of Central Asia Sometimes however it is illuminating to stand back and look at the region as a whole seeking similarities as well as contrasts This volume is a collection of papers from a conference on Tradition and Change in Central Asia was held at the School of Oriental and African Studies University of London in April 1987 Transactional Analysis Approaches to Brief Therapy Keith Tudor,2002-02-05 Of all the approaches to therapy Transactional Analysis or TA is arguably one of those most suited to time limited work At a time when short term therapy is increasingly dominant as a form of practice Transactional Analysis Approaches to Brief Therapy provides an insightful guide which both informs and challenges Rather than a single theory TA has developed as a group of four schools which share a common philosophy but place different emphasis on what occurs during the therapeutic process Written by therapists at the leading edge of developments in TA the book presents and differentiates each of these four approaches Through transcripts and commentaries it shows how theory applies to practice for example *John Betjeman* William S. Peterson,2006 Sir John Betjeman 1906 1984 Poet Laureate was probably the most widely read English poet of the twentieth century Because of his frequent appearances on radio and television and his fervent devotion to the preservation of England's architectural heritage his face and voice became familiar to millions Few other poets of any century have had such a powerful influence on their contemporaries This bibliography lists and describes all of his known writings including his own books ephemera contributions to periodicals and to books by others lectures and radio and television programmes Other categories such as editorships music settings and dramatic adaptations of his poems recordings and interviews are also included as well as a section devoted to writings about him Manuscripts and drafts of all his works are described in detail This enormous body of material is thoroughly indexed cross referenced and in most cases annotated Now at last the activities of this remarkable man both a poet and a cultural phenomenon can be seen in their full breadth and complexity Area Handbook for Somalia Irving Kaplan,1977 **Writers Directory** NA NA,2016-03-05
