monastic landscape **A Second Domesday?** Sandra Raban, 2004-09-02 The 1279 80 hundred rolls are one of the most important sources for later thirteenth century England yet this is the first comprehensive study of the inquiry which brought them into being A Second Domesday will be an indispensable working tool for historians and is based on the latest knowledge of the returns More of these are being discovered all the time and one of the aims of this book is to stimulate the recognition of other surviving texts The book places the inquiry in its historical context continental as well as English This is followed by an examination of its purpose and whether or not it was conceived deliberately as a second Domesday Book Central to the study is a consideration of the geographical range of the inquiry how it was conducted and the way in which the returns were compiled The way in which the inquiry was used by historians as well as contemporaries along with the introductory chapters will be particularly helpful to students The book concludes with a description of all known returns which together with the appendices are designed to assist future users *Land and People in Late Medieval England* Bruce M.S.

Campbell, 2024-10-28 This is the third collection of articles by Bruce Campbell to appear in the Variorum series Late medieval England was an overwhelmingly rural society Never since has such a large proportion of the population lived in the countryside or relied so directly for its livelihood upon agriculture The lot of a majority of that population was always a hard one and never more so than during the first half of the 14th century when peasants competed with each other for ever scarcer land and work and a succession of major harvest failures jeopardised the survival of many Nevertheless experience varied considerably both during this era of mounting population pressure and the century and more of population decline and stagnation that followed the demographic disaster of the Black Death How well individual communities coped during these contrasting conditions of expansion and contraction owed much to the quality and composition of their natural resource endowment a good deal to their ability to take advantage of changing commercial opportunities and sometimes almost everything to how exposed they were to military conflict Always however much hinged upon how the twin feudal institutions of lordship and serfdom were mapped onto land and people via the manorial system These are the themes variously explored by the eight essays assembled in this volume which range from a case study of a single crowded Norfolk manor to a consideration of the broad and towards the end of the Middle Ages widening contrasts that persisted between North and South **Field Systems and Farming Systems in Late Medieval England** Bruce M.S. Campbell, 2023-05-31 The later

Middle Ages was an overwhelmingly rural world with probably three out of four households reliant upon farming for a living Yet conventional accounts of the period rarely do justice to the variety of ways in which the land was managed and worked The thirteen essays collected in this volume draw upon the abundant documentary evidence of the period to explore that diversity In the process they engage with the issue of classification without which effective generalisation is impossible and offer a series of solutions to that particularly thorny methodological challenge Only through systematic and objective classification is it possible to differentiate between and map different field systems husbandry types and land use categories

That in turn makes it possible to consider and evaluate the relative roles of soils and topography institutional structures and commercialised market demand in shaping farm enterprise both during the period of mounting population before the Black Death and the long era of demographic decline that followed it What emerges is an agrarian world more commercialised differentiated and complex than is usually appreciated whose institutional and agronomic contours shaped the course of agricultural development for centuries to come
