Loss Of A Life Partner Narratives Of The Bereaved:

The Loss of a Life Partner Carolyn Ambler Walter, 2003-03-05 Although there is extensive research on the loss of a spouse predominantly focusing on the experiences of widows much less attention is paid to bereaved partners not married to their significant other whether or not the partners are of the same sex This first of its kind work explores both socially sanctioned and disenfranchised grief highlighting similarities and differences Combining a discussion of various theories of grief with personal narratives of grieving men and women drawn from numerous interviews and detailed case study analysis Carolyn Ambler Walter has produced a penetrating examination of the bereavement experiences of partners in varying types of relationships She views narratives of widows widowers and bereaved domestic gay and lesbian partners from a postmodern perspective that breaks away from the traditional belief that the living must detach themselves from the dead in order to move on with their lives Instead building on the works of postmodern grief theorists such as Klass Silverman and Nickman Walter views ongoing bonds with the dead as a resource for enriching functionality in the present and as a key to looking to the future

The Loss of a Life Partner Carolyn Ambler Walter, 2003 Through discussions of various theories of grief narratives of the bereaved obtained in interviews with 22 men and women case study analysis and chapter summaries this text integrates the literature about and the bereavement experiences of partners in varying types of relationships

The Therapist in Mourning Anne Adelman, Kerry Malawista, 2013-06-04 The unexpected loss of a client can be a lonely and isolating experience for therapists While family and friends can ritually mourn the deceased the nature of the therapeutic relationship prohibits therapists from engaging in such activities Practitioners can only share memories of a client in circumscribed ways while respecting the patient's confidentiality Therefore they may find it difficult to discuss the things that made the therapeutic relationship meaningful

Similarly when a therapist loses someone in their private lives they are expected to isolate themselves from grief since allowing one's personal life to enter the working relationship can interfere with a client's self discovery and healing. For therapists caught between their grief and the empathy they provide for their clients this collection explores the complexity of bereavement within the practice setting. It also examines the professional and personal ramifications of death and loss for the practicing clinician. Featuring original essays from longstanding practitioners the collection demonstrates the universal experience of bereavement while outlining a theoretical framework for the position of the bereft therapist. Essays cover the unexpected death of clients and patient suicide, personal loss in a therapist's life, the grief of clients who lose a therapist, disastrous loss within a community and the grief resulting from professional losses and disruptions. The first of its kind, this volume gives voice to long suppressed thoughts and emotions enabling psychologists, psychiatrists, counselors and other mental health specialists to achieve the connection and healing they bring to their own work.
