Regional Development In China States Globalization And Inequality:

Regional Development in China Yehua Dennis Wei, 2000 Regional Inequality in Transitional China Felix Haifeng Liao, Yehua Dennis Wei, Li Huang, 2020-09-17 This book investigates uneven regional development in China with particular focus on the cases of Guangdong and Zhejiang provinces which have been at the forefront of debate since Chinese economic reform. Rapid economic growth since the opening up of China has been accompanied by significant disparities in the regional distribution of income. This book represents one of the most recent studies to present a picture of this inequality. Built upon a multi-scale and multi-mechanism framework, it provides systematic examination of both the patterns and mechanisms of regional development and inequality in provincial China, emphasizing the effects of economic transition. Approaching from a geographical perspective, its authors consider the interplay between the local, the state, and the global forces in shaping the landscape of regional inequality in China. Extensive empirical findings will prove useful to those researching other developing countries within the frontier of globalization and economic transition. Regional Inequality in Transitional China will appeal to scholars and students of geography, economics, and Chinese studies more broadly.

Innovation and Regional Development in China Ingo Liefner, Yehua Dennis Wei, 2013-07-24 Although China is now the factory of the world, there is no reason to expect that it will always be content with manufacturing labor-intensive goods for foreign corporations. Scholars must now ask: What is the current level of innovation in China? And how can we face this challenge and renovate industrial production and innovation capacities in developed countries? This edited volume investigates the unique characteristics of Chinese innovation and regional development, China's policy framework, and the role that transnational corporations play in China's increasing innovation activities. This book contributes to the heated debate regarding pathways for technology progress and regional development in developing countries and identifies the ways in which local production networks respond to different configurations of external linkages. Linking patterns of global and local production networks with the trajectories of technology development and regional development allows the authors to theorize and test whether and how particular configurations of production networks generate divergent long-term local productivity growth and technological development outcomes. Innovation and Regional Development in China will be of interest to geographers, economists, China specialists, development specialists, and scholars working on innovation and regional development in developing areas and transition countries.

Regional Development in China Yehua Dennis Wei, 2013-04-15 This study systematically examines uneven regional development in China, focusing on three central agents: the foreign investor, the state, and the region. Wei's findings have important implications for theories of and policy towards Chinese regional development. This book is a vital resource for those with an interest in transition economies.

Globalizing Regional Development in East Asia Henry Wai-chung Yeung, 2013-09-13 Significant historical and geographical differences account for the many processes and trajectories of regional development in East Asia. These historical and geographical specificities in East Asia have prompted serious re-

examination of existing theories in regional development and in particular the new regionalism approach associated with such ideas as the learning region institutional thickness relational assets and regional innovation system This book brings together a group of leading researchers specializing in local and regional development in East Asian economies Through in depth empirical studies of specific regions and localities these authors offer fresh and innovative perspectives on how regions evolve and develop over time in the world s most dynamic macro regional economy In particular their work points to the critical importance of local and trans local processes in shaping regional development trajectories The book is timely given that the debate on the nature and dynamics of regional development in both academic and policy circles has now moved on From the earlier focus on endogenous regional assets such as localized networks of association and trust scholars and policymakers are now analyzing the complex relationship between economic globalization and regional change This high calibre collection makes a significant contribution to the literature on local and regional development in Asia and provides an important resource for researchers students and policy makers interested in East Asia This book was published as a special issue of *Regional Studies* Globalization and Beyond Jon Shefner, María Patricia Fernández-Kelly, 2011 Explores the origins and the reciprocal influences of globalization and the recent economic crisis and suggests what new ideological foundations and geographic regions will be ascendant Provided by publisher *Routledge Handbook on Global China* Maximilian Mayer, Emilian Kavalski, Marina Rudyak, Xin Zhang, 2024-10-22 This innovative Routledge Handbook sheds light on the complex and transformative nature of Global China prompting a re evaluation of existing theories on global and regional dynamics It encourages theoretical innovation methodological reflection and analytical transformation providing new avenues for critical engagement with China s global interactions The chapters propose three key commitments for the study of Global China Advocating for diverse viewpoints and non binary frameworks employing nuanced analysis to understand Beijing s transnational relations and utilizing alternative methodological approaches to explore different trajectories for China in international affairs The Handbook also identifies and avoids epistemic traps that hinder the understanding of Global China such as othering and strategic narcissism It suggests five analytical frameworks related to relationality global capitalist processes language and discourse power planetary scale modernization and experimentalism to guide future research By adopting these frameworks researchers can gain a deeper understanding of the multifaceted factors shaping Global China within the broader global context of cooperation competition and crisis Introduction Chapter 21 and Epilogue of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license Small Town China Beatriz Carrillo Garcia, 2011-04-19 While much has been written about rural migrant workers experiences in the big cities population movements into China s vast network of towns and small cities has been largely neglected This book presents a detailed case study of rural migrant workers experiences in a small town in a north China county The author explores the processes and

institutions that enable or preclude the social inclusion of rural workers into the town s socio economic system Inclusion and exclusion are assessed through an examination of rural workers immersion into the urban labour market their access to welfare benefits and to social services such as housing education and health The book proposes that outside the larger cities there are alternative accounts of urban social change and of the integration of rural migrant workers It stresses the fact that the particular socio economic structure of towns where the state owned share of the economy has been smaller and where consequently social and private forces have been more active allowed for a more open inclusion of rural workers Though shortcomings are still observed the book suggests that China s transformation may not necessarily result in dysfunctional and socially polarized urban environments This book will be of interest to students and scholars of China s rural migrant workers bottom up urbanization and small town development social policy and more broadly on contemporary social change in China

Choosing China's Leaders Chien-wen Kou,Xiaowei Zang,2013-10-08 Political elites are a key topic in contemporary China studies and have been investigated in relation to factional politics generation politics technocracy and crucially institutionalization The institutionalization of elite replacement began in China in the 1980s and quickly accelerated after the early 1990s as mechanisms emerged to regulate political elites entry and exit including age limits term limits and step by step promotion By examining the various processes of elite selection this book explores the role played by institutionalization in elite recruitment promotion and turnover in China While existing studies have developed our understanding of Chinese elite politics two key puzzles regarding institutionalisation remain Although institutionalisation is recognised as an important trend in Chinese politics there is as yet no theoretical framework to explain the forces that have brought about and sustained this Further it is unclear how the process of institutionalisation has impacted on factional politics and how factions would continue to operate within the parameters of formal politics Drawing on a wide range of studies this book looks at Politburo members senior People s Liberation Army officers provincial leaders heads of major central state owned enterprises and Youth League affiliates to provide a comprehensive understanding of elite recruitment and mobility in contemporary China This book will be of great interests to students and scholars of Chinese politics and government Chinese studies and Asian politics more broadly

Policing Serious Crime in China Susan Trevaskes,2012-08-06 Despite a resurgence in the number of studies of Chinese social control over the past decade or so no sustained work in English has detailed the recent developments in policy and practice against serious crime despite international recognition that Chinese policing of serious crime is relatively severe and that more people are executed for crime in China each year than in the rest of the world combined In this book the author skilfully explores the politics practice procedures and public perceptions of policing serious crime in China focusing on one particular criminal justice practice anti crime campaigns in the period of transition from planned to market economy from the 1980s to the first years of the twenty first century Susan Trevaskes analyzes the elements that led to the Hard Strike becoming the preferred method of attacking the growing problem of serious crime in

China before going on to examine the factors surrounding the failure of the Hard Strike as a way of addressing the main problems of serious crime in China today that is drug trafficking and organized crime Drawing on a rich variety of Chinese sources *Serious Crime in China* is an original and informed read for scholars of China criminologists generally and the international human rights community *Rural Policy Implementation in Contemporary China* Anna Ahlers, 2014-01-10 At the turn of the millennium the disparities between rural and urban livelihoods underdevelopment and administrative shortcomings in the Chinese countryside were increasingly seen as posing a manifest threat to social harmony and economic and political stability At that time the term three rural problems sannong wenti was coined which defined the main issues of rural life that needed to be targeted by government action agriculture nongye villages nongcun and farmers nongmin In turn with the launch of the 11th Five Year Plan in 2006 a pledge was made to shift the focus of developmental efforts to the long neglected countryside which is still home to half of the Chinese population This book presents an analysis of adaptive local policy implementation in China in the context of the Building of a New Socialist Countryside BNSC policy framework Based on intensive field work in four counties in Fujian Jiangxi Shaanxi and Zhejiang Provinces between 2008 and 2011 it offers detailed analyses of the form and impact of county governments strategic agency at certain stages and within certain fields of the implementation process for example the design of local BNSC programs the steering of project funding implementation and evaluation the establishment of model villages and the management of public participation Further this study illustrates that BNSC is far more than the empty slogan described by many observers when it was launched in 2005 2006 Instead it has already brought about considerable shifts in terms of the process and outcomes of rural policy implementation Altogether the results of this research challenge existing paradigms by showing how against the background of contemporary approaches to rural development and recent reforms initiated by the central state local bureaucracies strategic agency can actually push forward effective albeit not necessarily optimal policy implementation to some extent which serves the interests of central authorities local implementors and rural residents By tying into the larger debates on China's state capacity and authoritarian adaptability this book enriches our understanding of the inner workings of the Chinese political system As such it will prove invaluable to students and scholars of Chinese politics public policy and development studies more generally

China's Thought Management Anne-Marie Brady, 2012-02-06 China's Thought Management argues that by re-emphasizing and modernizing propaganda and thought work since 1989 the CCP has managed to overcome a succession of local and national level crises the Tiananmen Square protests of 1989 the impact of the collapse Socialism in the Eastern bloc SARS ethnic clashes in Tibet and Xinjiang to name but a few emerging re-strengthened and as dominant in Chinese society as ever The contributors to this book address such crucial issues as the new emphasis on economic propaganda the continued importance of the PLA propaganda system in China's overall propaganda work and political stability how the CCP uses Confucianism in its foreign and domestic propaganda and new approaches to mass persuasion such as campaigns of mass distraction

Each chapter is a case study of the multiple ways in which the CCP has modified and adjusted its propaganda to reflect China's changed economic and political environment. Challenging readers to reconceptualise mainstream understandings of the CCP's hold on power and the means the CCP government adopts to maintain its authority, this book will be invaluable reading for anyone interested in the Chinese media and Chinese politics.

International Aid and China's Environment

Katherine Morton, 2006-05-17 Rapid economic growth in the world's most populous nation is leading to widespread soil erosion, desertification, deforestation, and the depletion of vital natural resources. The scale and severity of environmental problems in China now threaten the economic and social foundations of its modernization. Using case studies, Morton analyzes the relationship between international and local responses to environmental problems in China, challenging the prevailing wisdom that weak compliance is the only constraint upon local environmental management in China. It advances two interrelated discussions: first, it constructs a conceptual framework for understanding the key dimensions of environmental capacity. This is broadly defined to encompass the financial, institutional, technological, and social aspects of environmental management. Second, the book presents the results of an empirical inquiry into the implementation of donor-funded environmental projects in both China's poorer and relatively developed regions. By drawing upon extensive fieldwork, it seeks to explain how and under what conditions international donors can strengthen China's environmental capacity, especially at the local level. It will be of interest to those studying Chinese politics, environmental studies, and international relations.

Young Chinese in Urban China Alex Cockain, 2012-08-21 This book examines the condition of being a young person in China and the way in which changes in various dimensions of urban life have affected Chinese youths' quests to understand themselves. The author examines social factors such as changes in the physical construction of urban neighbourhoods, changes in family life including reduced family size, increasing rates of divorce, and increased physical mobility of the family unit, school life, and mounting pressure to perform well in examinations, and access to foreign and domestic media as well as access to the internet. Drawing on the fields of social and cultural anthropology, Alex Cockain shows that the process of self-understanding in a changing spatial, social, and cultural world involves ongoing, disjointed efforts to achieve a sense of security and belonging on the one hand, and a degree of increased autonomy in their relationships with, for example, parents and teachers on the other. This book will appeal to anyone interested in Chinese Society, Social and Cultural Anthropology, Asian Anthropology, and Youth Studies.

NGO Governance and Management in China Reza Hasmath, Jennifer Y. J. Hsu, 2015-07-16 As China becomes increasingly integrated into the global system, there will be continuing pressure to acknowledge and engage with non-governmental organizations (NGOs). Suffice to say without a clear understanding of the state's interaction with NGOs, and vice versa, any political, economic, and social analysis of China will be incomplete. This book provides an urgent insight into contemporary state-NGO relations. It brings together the most recent research covering three broad themes: namely, the conceptualizations and subsequent functions of NGOs, state-NGO

engagement and NGOs as a mediator between state and society in contemporary China The book provides a future glimpse into the challenges of state NGO interactions in China s rapidly developing regions which will aid NGOs strategic planning in both the short and long term In addition it allows a measure of predictability in our assessment of Chinese NGOs behaviour notably when they eventually move their areas of operation from the domestic sphere to an international one The salient themes concepts theories and practice discussed in this book will be of acute interest to students scholars and practitioners in development studies public administration and Chinese and Asian politics Reza Hasmath is a Lecturer in Chinese Politics at the University of Oxford UK and an Associate Professor in Political Science at the University of Alberta Canada His research looks at state society relationships the labour market experiences of ethnic minorities and development theories and practices Jennifer Y J Hsu is an Assistant Professor in Political Science at the University of Alberta Canada Her recent publications include a co authored book HIV AIDS in China The Economic and Social Determinants Routledge 2011 and a co edited book The Chinese Corporatist State Adaption Survival and Resistance Routledge 2012

China's Cotton Industry Björn Alpermann, 2010-04-05 This book examines the political economy of the cotton processing industry analyzes the process of cotton policy making and looks at how local governments and the former monopolist cope with the changes brought about by marketization

State and Laid-off Workers in Reform China Yongshun Cai, 2006 This study examines the variation in Chinese workers collective action after the Chinese government launched its 1990 reform of state enterprises putting tens of millions of people out of work

Elites and Governance in China Xiaowei Zang, Chien-wen Kou, 2013-09-13 This book reveals the complex relationship between elite perceptions and behaviour and governance in China It moves away from existing scholarship by focusing on functionaries grass roots elites leading intellectuals and opinion makers in China and by looking beyond the top leadership makes a significant contribution to our understanding of shared governance and broadened political participation in China The chapters in this collection explore the elites role as opinion makers technical experts producers of knowledge and executives or managers and pose a number of questions the answers to which are crucial to understanding future political and economic development in China What are elite perceptions of governance inequality and justice what do the elites mean by good governance what is the influence of non Chinese Communist Party elites in policy making and implementation in China how have they exerted their influence in the PRC and influenced its direction of future development and what have grass roots elites contributed to governance in local communities Providing a keen insight into the role elites have played in governing China since 1978 this book is a pioneering effort to bring together elite studies and governance studies As such it will be highly relevant for policy makers within international organizations governments and NGOs outside China as well as appealing to scholars and students interested in Chinese politics and governance

Rural Tax Reform in China Linda Chelan Li, 2012-03-15 This book examines questions of change and inertia in the context of the longstanding grievances over excessive taxation in rural China How can some changes be

sustained whilst others cannot How can a longstanding administrative practice be changed or even terminated especially when previous attempts at change have failed Using extensive interview data with local and central bureaucrats Li's findings highlight the role of parallel developments and agency in the change process as well as the prevalence of contingency and uncertainty It also elegantly blends the narrative of the rural tax and administrative reforms with theoretical discussions to deepen our understanding of policy process and institutional change in 21st century China Despite the authoritarian political system the Chinese state in action which emerges from this book sees actions stemming from both the central and local levels mediated by strategic design as well as contingency This book will be of interest to students and scholars of Chinese Studies political science and policy and development studies *China's Embedded Activism* Peter Ho, Richard Edmonds, 2007-10-19 In recent years China has been remarkable in achieving extraordinary economic transformation yet without fundamental political change To many observers this would seem to imply a weakness in Chinese civil society However though the idea of democracy as multitudes of citizens taking to the streets may be attractive it is simultaneously misleading as it disregards the nature of political change taking place in China today a gradual shift towards a polity adapted to a pluralist society At the same time one may wonder what the limited political space implies for the development of a social movement in China This book explores this question by focusing on one of the most active areas of Chinese civil society the environment China's Embedded Activism argues that China's semi authoritarian limitations on the freedom of association and speech coupled with increased social spaces for civic action has created a milieu in which activism occurs in an embedded fashion The semi authoritarian atmosphere is restrictive of but paradoxically also conducive to nationwide collective action with less risk of social instability and repression at the hand of the governing elite Rich in case studies about environmental civic organizations in China and written by a team of international experts on social movements NGOs democratization and civil society this book addresses a wide readership of students scholars and professionals interested in development geography and environment political change and contemporary Chinese society
