Cox, 2016-10-12 Although all advanced industrial societies have urban and regional development policies such policy in the United States historically has taken on a very distinct form Compared with the more top down centrally orchestrated approaches of Western European countries US cities and to a lesser degree states take the lead spurred on by developers and those with interest in rent This bottom up policy creates conflict as one city battles with another for new investments and as real estate developers fight over the spoils resulting in highly contentious politics In *The Politics of Urban and Regional Development and the American Exception* Cox addresses the question of why US policy is so unique In doing so he illustrates the essential characteristics of American regional development through a series of case studies including housing politics in Silicon Valley the history of the Dallas Fort Worth International Airport and a major redevelopment project that was rebuffed in Columbus Ohio Cox contrasts these examples with Western Europe s tradition of centralized governmental involvement and stronger labor movements that historically have been more concerned with creating what he calls the good geography than profits for developers whatever the shortfalls in policy outcomes might be The differences illuminate the peculiar nature of political engagement and local competition in shaping the way US urban development has evolved **Governing Metropolitan**
