objectives of those trading partners and the implications that these agreements could have for broader initiatives such as the Doha Round in the World Trade Organization and the Free Trade Area of the Americas. The papers in the volume were presented during a conference on FTAs and US trade policy sponsored by the Institute in May 2003. The editor Jeffrey Schott summarizes the policy implications drawn from the conference papers and discussions which are organized around several topics: the conceptual case for FTAs and how they have worked in the past; what FTAs imply for the broader global system; the specific agreements that are already being pursued: Australia, Central America, Morocco, southern Africa, or considered: ASEAN, Brazil, Egypt, Korea, and Taiwan. Regional Economic Integration in South Asia Amita Batra, 2012. South Asia today is among the most unstable regions in the world, riddled by both intra and inter state conflict. This book presents a comprehensive technical analysis of the trade conflict relationship within the region and explores how South Asia demonstrates underperformance of its potential for economic integration. Using the gravity model framework, the book highlights quantitative estimates of the cost of conflict in terms of loss of trade for South Asia. Other variables representative of political and economic regimes are also included to make the model comprehensive, and the book goes on to discuss how the analysis reveals the overriding significance of the India-Pakistan relationship in the regional landscape. It looks at how the results of the econometric exercise reveal the extent to which a common border when disputed becomes a barrier rather than a facilitator to trade, and additionally, the extent to which long standing and persistent conflict can debilitate trade relationships. The book is a useful contribution for students and scholars of South Asian studies and international political economy and assists in formulating policy to correct the anti-home bias that is evident in trade patterns of the South Asian economies.

The Strategy of Denial Elbridge A. Colby, 2021-09-14. Why and how America's defense strategy must change in light of China's power and ambition. Elbridge A. Colby was the lead architect of the 2018 National Defense Strategy, the most significant revision of U.S. defense strategy in a generation. Here he lays out how America's defense must change to address China's growing power and ambition. Based firmly in the realist tradition but deeply engaged in current policy, this book offers a clear framework for what America's goals in confronting China must be, how its military strategy must change, and how it must prioritize these goals over its lesser interests. The most informed and in-depth reappraisal of America's defense strategy in decades, this book outlines a rigorous but practical approach showing how the United States can prepare to win a war with China that we cannot afford to lose, precisely in order to deter that war from happening.
