Regulating Risks in the European Union Maria Weimer, Anniek de Ruijter, 2017-10-05 A growing body of EU law and regulation is preoccupied with the protection of EU citizens from health and environmental risks Which chemicals are safe and should be allowed on the market How should the EU respond to public health emergencies such as Ebola and other infectious diseases Regulatory responses to these questions confront deep uncertainty limited knowledge and societal contestation In a time where the use of scientific expertise in EU policy making is particularly contested this book offers a timely contribution to both the academic and policy debate on the role of specialised expertise in EU public decision making on risk and technology as well as on its intertwinement with executive power It draws on insights from law governance political sciences and science and technology studies bringing together leading scholars in this field Contributions are drawn together by a shared theoretical perspective namely by their use of co production as an analytical lens to study the intricate interplay between techno scientific expertise and EU executive power By so doing this collection produces highly original insights into the development of the EU administrative state as well as into the role of regulatory science in its construction This book will be useful to scholars practitioners and policy makers working on risk regulation and the role of expertise in public decision making

Governing Europe Jack Hayward, Anand Menon, 2003-03-20 Governing Europe is intended to be the leading advanced survey of politics in Western Europe It examines in detail all aspects of political life in Western Europe from public protest to core executives social policy to Europe's place in the world It brings together a world class team of leading scholars from the United Kingdom continental Europe and North America The contributions provide not only a sophisticated introduction to the various issues covered but also a detailed discussion of the major theoretical and empirical debates and developments in the field The book therefore provides both a comprehensive overview and a series of original contributions to scholarly debate The focus is on European core executives public administration parties and organised interests democracy and popular participation public policy and the changing European state It will be essential reading to scholars and students alike The volume is intended as a tribute to the late Vincent Wright of Nuffield College Oxford University

Governing Europe's Marine Environment Michael Gilek, 2016-03-03 Governing Europe's Marine Environment is a coherent up to date multidisciplinary analysis of current approaches and challenges to the sustainable governance of Europe's marine environment Structured in three parts Part 1 outlines general theoretical ideas about governance governing and governability and serves as a starting point for analysing the development of marine governance in Europe from the perspective of different disciplines Part 2 includes studies of EU marine governance Part 3 focuses on Europe's regional seas namely the Baltic Sea the North Sea the Black Sea and the Mediterranean Sea This book

presents a better understanding of the fragmented governance of marine governance in Europe and in particular the tension between the Europeanization of regional seas and the regionalization of EU policies **Governing Finance in Europe**

Adrienne Héritier, Magnus G. Schoeller, 2020-08-28 How do regulatory structures evolve in EU financial governance Incorporating insights from a variety of disciplines *Governing Finance in Europe* provides a comprehensive framework to investigate the dynamics leading to centralisation decentralisation and fragmentation in EU financial regulation

Governing Europe Jens Henrik Haahr, William Walters, 2004-08-02 This book uses post structuralist theories of power and discourse to study European integration and the associated forms of governance *The New Old World* Perry

Anderson, 2011-11-07 *The New Old World* looks at the history of the European Union the core continental countries within it and the issue of its further expansion into Asia It opens with a consideration of the origins and outcomes of European integration since the Second World War and how today s EU has been theorized across a range of contemporary disciplines It then moves to more detailed accounts of political and cultural developments in the three principal states of the original Common Market France Germany and Italy A third section explores the interrelated histories of Cyprus and Turkey that pose a leading geopolitical challenge to the Community The book ends by tracing ideas of European unity from the Enlightenment to the present and their bearing on the future of the Union *The New Old World* offers a critical portrait of a continent now increasingly hailed as a moral and political example to the world at large **EU Regulatory Decision Making and the**

Role of the United States Oliver Ziegler, 2012-09-05 Oliver Ziegler raises the question of what role economic interests of the United States play in the regulatory decision making process of the European Union Critics often assume that U S dominance in the world economy fueled by a powerful business elite has significantly affected EU regulations at the expense of environmental and consumer protection standards The author falsifies this proposition He shows first that the EU often adopts regulations against the explicit opposition of the U S thereby ignoring the principles of transatlantic regulatory cooperation Second he demonstrates that business interests in the EU are usually not homogenous and often come second to environmental and consumer concerns In addition the author shows the increasing role of the European Parliament in EU regulatory decision making **Beyond the EU Regulatory State** Andrea Prontera, 2019-08-16 The EU s growing

dependence on natural gas and Russian resources energy security has become a hot discussion topic in academia and in policy circles in Brussels Washington and many European capitals However most of the books on the subject use a very descriptive and or normative approach and very few attempt to theorise EU energy security outside of mainstream conceptualisations of the EU as an international actor This book closes an important gap in the literature and offers a fresh perspective on EU energy studies and it will be an important contribution to the debate on the development of European integration and the EU s role in international relations in the wake of the crisis in EU politics and in light of the EU s increasingly complex external environment Due to its interdisciplinary features the book combines EU studies international

affairs political economy and energy studies and the topics covered this book will be of special interest to scholars of the international political economy of energy and to those interested in European politics and EU international relations

Governing European Communications Maria Michalis, 2007-10-08 The liberalization of communications markets especially from the 1980s onward has witnessed increased regulatory activity within but also above the national state By examining the European case concentrating on the European Union the most advanced example of regionalism Governing European Communications enhances understanding of the trend toward above the national state regulation its drivers and its limitations Analyzing in detail the origins dynamics and evolution of European level communications governance in the postwar era Michalis offers a single comprehensive and up to date account of telecommunications and television policies and regulation and their technological convergence *Regulatory Delegation in the European Union* Emmanuelle

Mathieu, 2016-09-08 This book addresses the regulatory capacity of the EU as it responds to the huge challenge of realizing the single market It explores its weaknesses the EU regulatory networks expert committees and EU agencies formed in response and the exceptionally large and complex transnational regulatory system which has resulted It defines the EU regulatory space as a multi faceted phenomenon of institutional expansion whose shape varies across sectors and changes over time Empirically based on the exploration of how regulatory delegation has emerged and evolved in three key EU policies food safety electricity and telecommunications the book disentangles and links together the functional institutional and power distributional factors and their interplay over time into a unified explanation of the many faces of the EU regulatory space *Regulatory Convergence in EU Securities Regulation* Iris H.-Y. Chiu, 2008-01-01 Offers a new approach to the legal issues raised by the drive for convergence in securities regulation The author offers an informed and insightful examination of the implications for regulatory and policy design if regulatory convergence were to be rigorously implemented

European Regulatory Agencies in EU Decision-Making Christoph Ossege, 2016-01-06 European Regulatory Agencies ERAs have become increasingly important features in EU decision making They aim to provide expert advice independent of political or economic considerations This book explains whether and under what conditions ERAs comply with this scientific mandate Expanding on rational institutionalism Ossege provides novel insights into the behaviour of ERAs their autonomy from undue external influence and their impact on EU policy making The empirical comparison of three major ERAs the European Medicines Agency the European Food Safety Authority and the European Chemicals Agency not only shows that agencies capitalise on their expertise and rule making competences to protect their autonomy Rather in making strategic use of their expertise the ERAs also guard their autonomy in areas of high political salience though their policy influence in these areas is partially circumscribed Based on these insights European Regulatory Agencies in EU Decision Making locates its subject in the wider system of European Governance and considers the perennial question of how to reconcile the need for expert advice with democratic decision making **European Telecommunications Liberalisation** Kjell A. Eliassen, Marit

Sjovaag Nfa, Marit Sjovaag, 2013-03-04 This book examines the process and consequences of telecommunications liberalisation in the context of an ever closer European Union The creation of a single market for telecommunications and of a wider European single market mirror one another Telecommunications are also something of a test case for the privatisation process as this sector has traditionally been a state monopoly The volume approaches the European experience from three angles the politics of regulation and the process of liberalisation in the EU including case studies of the UK France and Germany increasing global economic interdependence makes international comparisons essential and the volume compares the EU experience with that of the Czech Republic Israel and Thailand the consequences of technology and continuous innovation *Regulation Through Agencies in the EU* Damien Geradin, University, The Netherlands, Rodolphe Muñoz, Nicolas Petit, 2005-01-01 The past decade has witnessed a proliferation of regulatory agencies at both the national and the EU level This coherent and clearly structured book is the first of its kind to analyse in equal measure and interdependently both national regulatory authorities and European agencies It brings together a select group of highly esteemed contributors authorities in their fields to provide a systematic and over arching view of regulation in the EU Unlike many of the previous attempts to shed light on this increasingly opaque and complex co existence of regulatory systems this book takes a genuinely multi disciplinary approach with integrated perspectives from law politics and economics Utilities Reform in Europe David Coen, Mark Thatcher, 2001 Public utilities constitute a large section of Europe economy and they have historically been at the centre of national states and their industrial strategies However the recent creation of the single market and the liberalisation of European utility sectors have resulted in an expansion of EU EC economic regulation This book examines the interaction among the economic and political actors and raises questions regarding the format regulation The chapters discuss the history of utilities reform assess the nature of the changes and address the issues of institutional modification Four themes emerge from the collection the characteristics of Europe wide reform the nature of national variance cross sectional variations and the institutional arrangements that can emerge to accommodate the regulatory regime **Regulatory Reforms in Italy** Dieter Kerwer, 2018-01-18 This title was first published in 2001 The question this thesis attempts to answer is summarized as follows what accounts for the amazing stability of Italian transport policy in the face of European challenges given the fact that as most national and European policy makers readily believe it is not capable of addressing the problem of the sector This study analyzes the transport policy in Italy from the 1990s into the 21st century It looks at how the two sub sectors of surface transport road haulage and railways have been managed by the public and private actors involved In both sectors the policy appears to have failed either by not offering a remedy to problems or by aggravating them further The author believes that studying transport policy in Italy will shed light on the wider question of how national policy making patterns are influenced by developments in the international environment in this case looking closely at the influence of the European Union **Constructing a European Market** Michelle Egan, 2001-06-14 Efforts to

tackle the trade impeding effects of divergent standards and regulations are at the core of European economic relations This volume draws on literature from several disciplines to develop a comprehensive account of the regulatory strategies and institutional arrangements adopted by the EU in promoting the single market in goods It provides a historical overview and detailed cases studies of the various policy initiatives that have altered the boundaries between the public and private sector in fostering market integration Tackling interstate barriers to trade has relied heavily on European law to shape the framework of relations between states and trade liberalization has been facilitated by legal rulings resolving territorial conflicts over regulatory jurisdiction and authority The European Court of Justice has actively shaped markets acting as a free trade umpire in balancing the goals of market liberalization and market regulation while fostering market compliance Although markets are absolutely dependent on public authority the institutional innovation of the EU has been to use the private sector in an ancillary role to the state By delegating responsibility to set standards for market access the EU has chosen to draw on the resources of private actors resulting in a system of governance that is a distinctive hybrid model of regulation composed of state and non state actors Though the outsourcing of public sector regulatory activity was expected to be more effective than the process of regulatory harmonization progress has been difficult The current deficit in setting standards for European wide market access raises concerns about the efficiency and effectiveness of such a regulatory regime Egan provides a detailed evaluation of that process highlighting regulatory gaps in the single market and the need to focus not only on the process of market integration but also its outcome and impact on European business Comparisons with American efforts to create a national market are made throughout to demonstrate the difficulties of constructing and maintaining a single market American and European efforts to devise a uniform market for commerce and trade have involved both public and private authorities though with different degrees of coordination and centralization as many of the strategies undertaken by the EU echo earlier American market building efforts

European Sovereignty, Legitimacy, and Power Bart M.J. Szewczyk, 2020-12-23 This book shows how the EU's dual sovereignty legitimacy problem can be resolved through the political concept of European citizenship which can serve both to define the scope of European sovereignty and to justify EU power beyond national democracy It reconceptualizes the EU's legitimacy problem and demonstrates how sources of legitimacy can be identified and give rise to European sovereignty It argues that sovereignty should be based on the will of citizens acting through various political bodies within the EU city halls regional entities national governments and EU institutions and develops a general theory arguably applicable to any political order The EU is an unprecedented political project that is in tension with traditional forms of state legitimation based on national democracy as nationalists and populists throughout Europe often make clear Against this backdrop the book fully articulates the notion of European sovereignty and argues that the EU's sources of legitimacy are based on European citizenship and national democracy This book will be of key interest to scholars and students of EU politics European integration international

institutions and international relations
