Regulating Law:

Regulating Law Christine Parker, 2004 Regulating Law explores how the goals and policies of the new regulatory state are fundamentally reshaping jurisprudence in the domains of public law private law and the regulation of work and business Fourteen areas of the core legal curriculum are reassessed from the standpoint of the impact of regulation on mainstream legal doctrine The volume examines the collision of regulation by law with regulation by other means and provides an innovative regulatory perspective for the whole of law To date regulatory scholarship has mainly been applied to specific legislative programs and or agencies for the social and economic regulation of business In this volume a cast of internationally renowned legal scholars each apply a regulatory perspective to their own area of law Their contributions provide a rich analysis of the limits and potential of legal doctrine as an instrument of control both in regulatory settings and in settings traditionally immune from regulatory analysis The result is an examination of the regulation of the doctrines of law itself and of the way in which law regulates other forms of regulation and social ordering law as subject and object of regulation

Law as Punishment / Law as Regulation Austin Sarat, Lawrence Douglas, 2011-08-29 This book considers the problem of law's physical control of persons and it illuminates competing visions of the law as both a tool of regulation and as an instrument of coercion or punishment

Governing Law and Dispute Resolution in the Oil and Gas Industry Pereira, Eduardo G., Timonen, Tuuli, Aleynikova, Elina, 2022-08-23 The oil and gas industry's wide international exposure and constantly changing landscape leave it particularly vulnerable to disputes As this practical book demonstrates the risks associated with disputes can be mitigated by parties utilising governing law and dispute resolution clauses in contractual agreements within the sector Examining a global range of jurisdictions the book offers clear guidance on the most appropriate choice of law and choice of dispute resolution forum for oil and gas contracts analysing the key issues and defining the legal contours involved

Legal Regulation of Corporate Social Responsibility Mia Mahmudur Rahim, 2013-11-27 Even though Corporate Social Responsibility CSR has become a widely accepted concept promoted by different stakeholders business corporations internal strategies known as corporate self regulation in most of the weak economies respond poorly to this responsibility Major laws relating to corporate regulation and responsibilities of these economies do not possess adequate ongoing influence to insist on corporate self regulation to create a socially responsible corporate culture This book describes how the laws relating to CSR could contribute to the inclusion of CSR principles at the core of the corporate self regulation of these economies in general without being intrusive in normal business practice It formulates a meta regulation approach to law particularly by converging patterns of private ordering and state control in contemporary corporate law from the perspective of a weak economy It proposes that this approach is suitable for alleviating regulators limited access to information and expertise inherent limitations of prescriptive rules ensuring corporate commitment and enhance the self regulatory capacity of companies This book describes various meta regulation strategies

for laws to link social values to economic incentives and disincentives and to indirectly influence companies to incorporate CSR principles at the core of their self regulation strategies It investigates this phenomenon using Bangladesh as a case study

Research Handbook on Art and Law Jani McCutcheon,Fiona McGaughey,2020-01-31 Featuring international contributions from leading and emerging scholars this innovative Research Handbook presents a panoramic view of how law sees visual art and how visual art sees law It resists the conventional approach to art and law as inherently dissonant one a discipline preoccupied with rationality certainty and objectivity the other a creative enterprise ensconced in the imaginary and inviting multiple unique and subjective interpretations Blending these two distinct disciplines this unique Research Handbook bridges the gap between art and law

Regulation and Regulators after Global Financial Crises Aleksandra Jordanoska,2024-12-31 This book provides an original theoretically and empirically grounded analysis of regulatory enforcement activism in post crisis periods and the ensuing regulatory interactions It critically addresses the more regulation enforcement agenda relating to financial misconduct in the aftermath of the 2008 financial crisis showing how misconduct was constructed through the enforcement policies and practices of the powerful UK financial conduct regulator and its interactions with the subjects of enforcement proceedings and their legal representatives during a tumultuous time in the financial markets Drawing from interviews with regulators professional intermediaries and markets participants documentary analysis of enforcement decisions and speeches and observations the volume adopts an interdisciplinary approach grounded in social constructivist perspectives on compliance and deviance regulation theory and socio legal research Through a multi dimensional analytical framework of regulatory enforcement activism that links shifts in regulatory policymaking experimentations with legal powers in information gathering legal and extra legal penalties and individual accountability and the use of enforcement tools in micro level interactions the book documents a more interventionist and punitive post crisis enforcement agenda The findings challenge current thinking in the scandal and reform literature The work argues that despite the increased focus on enforcement it is not necessarily the case that the power has tilted more towards the regulator This fine grained socio legal enquiry makes innovative and timely theoretical contributions to our understanding of the limitations of regulatory activism and regulatory control regulatory relationships the governance of financial markets and broader thinking on regulating corporations and the individuals within them It will appeal to academics researchers regulators and policymakers working in regulation across law criminology sociology and politics

Environmental Water Markets and Regulation Katherine Owens,2016-11-18 River systems around the world are degraded and are being used unsustainably Meeting this challenge requires the development of flexible regimes that have the potential to meet essential consumptive needs while restoring environmental flows This book focuses on how water

trading frameworks can be repurposed for environmental water recovery and aims to conceptualise the most appropriate role for law in supporting recovery through these frameworks The author presents a comprehensive study of the legal frameworks in four jurisdictions the States of Oregon and Colorado in the western United States the province of Alberta in Canada and the Murray Darling Basin in Australia Basin State of New South Wales A close comparative analysis of these four jurisdictions reveals a variety of distinctive regulatory arrangements and collaborations between public and private actors In all cases the law has been deployed to steer and coordinate these water governance activities The book argues that each regime is based on a particular regulatory strategy with different conceptions of the appropriate roles for and relationships between various actors and institutions Legal frameworks do not have the capacity to rationalise and provide an overarching and absolute solution to the complex environmental and governance issues that arise in the context of environmental water transactions Rather the role of law in this context needs to be reconceptualised within the paradigm of regulatory capitalism as establishing and maintaining the limits within which regulatory participants can operate innovate and collaborate "The Argus" Law Reports ,1909 Up to the end of 1959 the Argus law reports contained reports of the Supreme court of Victoria

Regulation:Dispute Resolution Through International Commercial Arbitration Mahmood Bagheri,2000-12-06 The growth of national economic regulation and the process of globalisation increasingly expose international transactions to an array of regulations from different jurisdictions These developments often contribute to widespread international contractual failures when parties claim the incompatibility of their contractual obligations with regulatory laws The author challenges conventional means of dispute resolution and argues for an interdisciplinary approach whereby disciplines such as international economic law conflict of laws contract law and economic regulations are functionally united to resolve international and multifaceted regulatory disputes He identifies the normative foundation of contract law as an important determinant in this process contending that contract law is essentially neutral and underpinned by the concept of corrective justice while economic regulations are mainly prompted by distributive justice Applying this corrective distributive justice dichotomy to international contracts the author critically assesses major conflict of laws approaches such as proper law the Rome Convention and governmental interest analysis which could disregard either public interest or private rights The author taking these theories into account proposes an alternative two dimensional interest analysis approach He tests the viability of this approach with reference to arbitral awards and court decisions in various jurisdictions and concludes that it uniquely fits into the structure of international commercial arbitration In adopting this approach arbitrators would take into account both corrective and distributive justice and to the extent that corrective justice prevails would be able to avert a total failure of the contract
