Regulatory Politics in Japan Louis W. Pauly,1987

International Relations of Japan Kathleen Newland,2016-07-27 In this work nine scholars from Britain the US and Japan examine aspects of Japan s international role ranging from its bilateral relations with China and the Soviet Union through its direct investment in the American market to the evolution of its aid to the Third World *Banking on Stability* Saori N.

The Domestic Politics of International Regulatory Policy John E. Richards,1997 **States and the Reemergence of Global Finance**

Eric Helleiner,2015-07-14 Most accounts explain the postwar globalization of financial markets as a product of unstoppable technological and market forces Drawing on extensive historical research Eric Helleiner provides the first comprehensive political history of the phenomenon one that details and explains the central role played by states in permitting and encouraging financial globalization Helleiner begins by highlighting the commitment of advanced industrial states to a restrictive international financial order at the 1944 Bretton Woods conference and during the early postwar years He then explains the growing political support for the globalization of financial markets after the late 1950s by analyzing five sets of episodes the creation of the Euromarket in the 1960s the rejection in the early 1970s of proposals to reregulate global financial markets four aborted initiatives in the late 1970s and early 1980s to implement effective controls on financial movements the extensive liberalization of capital controls in the 1980s and the containment of international financial crises at three critical junctures in the 1970s and 1980s He shows that these developments resulted from various factors including the unique hegemonic interests of the United States and Britain in finance a competitive deregulation dynamic ideological shifts and the construction of a crisis prevention regime among leading central bankers In his conclusion Helleiner addresses the question of why states have increasingly embraced an open liberal international financial order in an era of considerable trade protectionism *Multinationals and the National Interest* United States. Congress. Office of Technology

Assessment,1993 *Strategic Capitalism* Kent E. Calder,2021-02-09 Was Japan s economic miracle generated primarily by the Japanese state or by the nation s dynamic private sector In addressing this question Kent Calder s richly detailed study offers a distinctive reinterpretation of Japanese government business relations Calder challenges popular opinion to demonstrate how Japanese private enterprise has complemented the state in achieving the national purpose of industrial transformation **Foreign Banks in Japan** ,1991 Might, right, prosperity and consent Helen Thompson,2013-07-19

This book offers an original analysis of the problem of the authority of the state in democracies Unlike many discussions of democracy that treat authority as a problem primarily of domestic politics or normative values this book puts the international economy at the centre of the analysis This volume shows how changes in the international economy from the inter war years to the end of the twentieth century impacted upon the success and failures of democracy It makes the

argument by considering a range of different cases and it traces the success and failure of democracies over the past century. It includes detailed studies of democracies in both developed and developing countries and offers a comparative analysis of their fate. It will appeal to all those interested in democracy, the future of the state and the impact of the international economy on domestic politics.

Regulating International Financial Markets: Issues and Policies Franklin R. Edwards, Hugh T. Patrick, 2012-12-06

Franklin R. Edwards, Hugh T. Patrick

As the 1990s unfold we stand on the threshold of a new age of global financial markets. The seemingly inevitable market driven dynamic of the international integration of banking, securities and futures markets is bringing about a profound transformation of financial flows and the efficiency and effectiveness of the domestic and international markets serving them. Propelled in the 1980s by a variety of forces technological, economic, political and de-regulatory the implications of international financial market integration are pervasive. This new era promises to raise a host of new public and business policy issues as well as opportunities. These include issues of financial market integrity, international competitiveness and regulatory harmony. What will the rules of the game be? How will prudential concerns for the safety as well as the efficiency of international financial markets and their national counterparts be met? What are the appropriate new institutional arrangements? How and to what degree will international financial markets be supervised, harmonized and regulated and for what purposes? Who will be making these decisions and implementing them? These are the issues that confront and bedevil policymakers, practitioners and scholars alike.

1.2 INTRODUCTION: The Context

The 1980s were witness to major transformations of the international political, economic and financial environment. Among the major developments was rapidly increasing international financial market integration across major nations and across financial product markets. The major sources of financial change were several interrelated and reinforcing.

The Politics of Financial Markets and Regulation S. Konoe, 2014-01-28

Sara Konoe looks into the politics of financial regulatory developments in the United States, Japan and Germany. These case studies highlight systemic interaction between institutions and political contexts and provide broader implications for global financial governance.

Dynamic and Immobilist Politics in Japan Martin Collick, Aurelia George, James Horne, Daiichi It, Alan Rix, J.A.A. Stockwin, 1988-05-17

Over the past thirty years Japan has shown that it is a highly dynamic society and its economic policy making has often astonished the world. Japanese politics, however, though sometimes showing dynamism, are very stable and frequently strangely immobilist. In this book six specialists on Japanese politics seek to find out why.

International Harmonization of Financial Regulation? Hyoungh-kyu Chey, 2014-01-02

It is often argued that international financial regulation has been substantially strengthened over the past decades through the international

harmonization of financial regulation There are however still frequent outbreaks of painful financial crises including the recent 2008 global financial crisis This raises doubts about the conventional claims of the strengthening of international financial regulation This book provides an in depth political economy study of the adoptions in Japan Korea and Taiwan of the 1988 Basel Capital Accord the now so called Basel I which has been at the center of international banking regulation over the past three decades highlighting the domestic politics surrounding it The book illustrates that despite banks formal compliance with the Accord in these countries their compliance was often cosmetic due to extensive regulatory forbearance that allowed their real capital soundness to weaken Domestic politics thus ultimately determined national implementations of the Accord This book provides its novel innovative study of the Accord through scores of interviews with bank regulators and analysis of various primary documents It suggests that the actual effectiveness of international financial regulation relies ultimately on the domestic politics surrounding it It implies as well that the past trend of international harmonization of financial regulation may be illusory to at least some extent in terms of its actual effectiveness This book may interest not only political economists but also scholars working on the intersection of law economics and institutions

International competition in services : banking building software know-how--. ,1987 Service Industries and Asia Pacific Cities

Peter W. Daniels,Kong Chong Ho,Tom Hutton,2005-04-01 During the second half of the twentieth century development in the Asia Pacific region has been dominated by industrialization However at the beginning of the twenty first century services in particular finance information and creative services have become deeply embedded in the processes of urban growth In Asia Pacific the rise of service industries has lead to national modernization programmes and globalization strategies Services are also driving change in the internal form of city regions and are being actively deployed as instruments of metropolitan reconfiguration and land use changes These changes have created problems such as social polarization and the displacement of traditional industries and residential districts Also there are tensions between local and global processes in the development of service industries and between the imperatives of competitive advantage and sustainable development Service Industries and Asia Pacific Cities brings together a multi disciplinary team of experts to explore and illustrate the theoretical conceptual and practical issues arising from the transformation of Asia Pacific cities by service industries
