Regulatory Politics In The European Union Weighing Civic And Producer Interests:

Regulatory Politics in the Enlarging European Union Alasdair R. Young, 2000 This book is the second in the three volume set *The Labour governments 1964 1970* and concentrates on Britain's international policy under the Labour governments in the 1960s and is available for the first time in paperback The coverage ranges from defence policy and the government machine to European integration NATO and the Vietnam war Harold Wilson and his ministers have often been accused of betraying the sense of promise that greeted their victory in 1964 Using recently released archival evidence John Young argues that a more balanced view of the government will recognise the real difficulties that surrounded decision making not only on Vietnam but also on Aden the Nigerian civil war and Rhodesia Economic weakness waning military strength Cold War tensions and the need to placate allies all placed limits on what a once great but now clearly declining power could achieve Furthermore the government proved of pivotal importance in the history of Britain's international role in that it presided over a major shift from positions East of Suez to a focus on European concerns a focus that has remained until the present day The book will be of vital importance to students of British history and international relations during this exciting period Together with the other books in the series on domestic policy and economic policy it provides a complete picture of the development of Britain under the premiership of Harold Wilson

EU Lobbying: Empirical and Theoretical Studies David Coen, 2013-10-31 *EU Lobbying Empirical and Theoretical studies* offers an analysis of large empirical studies of interest group politics and Lobbying in Europe Recognising the continued European economic integration globalisation and the changing role of the state it observes significant adaptations in interest mobilisation and strategic behaviour This book assesses the logic of collective and direct action the logic of access and influence the logic of venue shopping and alliance building It addresses specific issues such as the emergence of elite pluralism in EU institutions the pump priming of political action by EU institutions and the growing political sophistication of private and public interests in Brussels Through these issues the book explores how interest groups lobby different European institutions along the policy process and how the nature of policy dictates the style and level of lobbying This book was previously published as a special issue of *Journal of European Public Policy*

Policy-making in the European Union Helen Wallace, Mark A. Pollack, Alasdair R. Young, 2015 The policies of the European Union profoundly affect the lives of people in Europe and around the world The new edition of this highly successful textbook outlines how and why such decisions are made as well as the key challenges faced by policy makers in the current political and economic climate

Interest Group Politics in Europe Jan Beyers, Rainer Eising, William A. Maloney, 2013-09-13 Interest organizations have always assumed a prominent place in European politics because they link states with citizens institutionalize the resolution of social conflicts regulate important sectors of the economy and society contribute to workable policy outcomes and socialize members into democratic politics However the plethora of interest group studies that exist have not consolidated our understanding of these actors These analyses have been subject to the

vagaries of different theoretical perspectives and vary greatly in their conceptual and methodological frameworks. Consequently a not always complementary and fragmented series of findings has emerged. This book is a systematic and comprehensive effort at investigating and integrating the state of the art in European interest group research. Combining the analysis of interest group politics in the EU with the comparative study of interest organizations the book seeks to identify the areas about which there is consolidated knowledge that are marked by controversies in which considerable uncertainty exists that have been omitted from research programs and that ought to be part of future studies. Thereby it provides a general reflection on how the study of interest group politics can be improved by linking it to the comparative study of governance. This book was published as a special issue of *West European Politics*. *Interest Representation in the European Union* Justin Greenwood, 2017-09-16. Why is the EU so reliant upon exchanges with interest organisations? What safeguards have been developed to prevent capture by special interests and how effective are these? How does the EU system of interest representation compare with those of other systems and what are its unique features? The fully revised fourth edition of this highly acclaimed book provides an authoritative and comprehensive assessment of the role of organized interests in the EU. Showing that interest representation is a key aspect of the European project it examines the significance of interests for everyday policy making for European integration and for the democratic legitimacy of the EU. Accessibly written and thoroughly updated the new edition contains additional material on the regulation of lobbying and the European Transparency Register. *Data Protection and Privacy, Volume 10* Ronald Leenes, Rosamunde van Brakel, Serge Gutwirth, Paul De Hert, 2017-12-28. The subjects of Privacy and Data Protection are more relevant than ever with the European General Data Protection Regulation (GDPR) becoming enforceable in May 2018. This volume brings together papers that offer conceptual analyses, highlight issues, propose solutions and discuss practices regarding privacy and data protection. It is one of the results of the tenth annual International Conference on Computers Privacy and Data Protection (CPDP) 2017 held in Brussels in January 2017. The book explores Directive 95/46/EC and the GDPR moving from a market framing to a treaty base, games frame the GDPR requirements regarding machine learning, the need for transparency in automated decision making systems to warrant against wrong decisions and protect privacy, the risk revolution in EU data protection law, data security challenges of Industry 4.0, new types of data introduced in the GDPR, privacy design implications of conversational agents and reasonable expectations of data protection in Intelligent Orthoses. This interdisciplinary book was written while the implications of the General Data Protection Regulation 2016/679 were beginning to become clear. It discusses open issues and daring and prospective approaches. It will serve as an insightful resource for readers with an interest in computers, privacy and data protection. *The European Union as a Global Regulator?* Alasdair Young, 2017-10-02. The European Union is often depicted as a dominant global regulator. The purpose of this volume is to move beyond establishing that the EU influences global regulation to being to identify under what conditions it exerts that influence.

Toward that end it focuses on the EU's active efforts both bilateral and multilateral to shape regulations beyond its borders. The empirical chapters in this volume are explicitly comparative among foreign partners across international contexts over time and across issues. The more conceptual contributions posit an explanation for the EU's choice of regulatory cooperation strategy and take stock of Market Power Europe as a dynamic conceptual framework for understanding and researching the EU as a power. Collectively this volume advances three arguments: the utility of the EU's regulatory power resources is context specific; debates about what kind of power the EU is at least as currently conceived are unproductive; and that the EU's engagement in the world is better explained through general theories of international political economy. This book was published as a special issue of the *Journal of European Public Policy*. [The Judiciary, the Legislature and the EU Internal Market](#) Philip Syrpis, 2012-05-03 By tracing the way in which the CJEU and national courts react to legislation and Treaty reform and the way in which the Member States Commission and other actors in the legislative process react to judicial interventions this collection of essays explores the nature of the dynamic relationship between courts and legislatures within the EU. It is clear that the boundaries between the legal and political realms are contested and that the judiciary and the legislature are engaged in a struggle not so much about the substantive contours of the internal market project but rather about their relative institutional positions. The contributors consider all aspects of the internal market project from goods to capital and citizenship examining areas where there has been significant Treaty change as well as those in which the Treaty framework has remained substantially unaltered. **Understanding the European Union's External Relations** Michèle Knodt, Sebastiaan Princen, 2003-09-02 The European Union is one of the world's biggest economies. However its role as an international actor is ambiguous and it's not always able to transform its political power into effective external policies. The development of an assertive European Union challenges the image of an internal project aimed at economic integration and international relations theories based on unitary state actors. This book systematically links the EU's external relations to existing political theories showing how existing theories need to be modified in order to deal with specific characteristics of the EU as an international actor. [The Politics of Precaution](#) David Vogel, 2012-04-29 The Politics of Precaution examines the politics of consumer and environmental risk regulation in the United States and Europe over the last five decades explaining why America and Europe have often regulated a wide range of similar risks differently. It finds that between 1960 and 1990 American health safety and environmental regulations were more stringent risk averse comprehensive and innovative than those adopted in Europe. But since around 1990 the book shows global regulatory leadership has shifted to Europe. What explains this striking reversal? David Vogel takes an in depth comparative look at European and American policies toward a range of consumer and environmental risks including vehicle air pollution ozone depletion climate change beef and milk hormones genetically modified agriculture antibiotics in animal feed pesticides cosmetic safety and hazardous substances in electronic products. He traces how concerns over such risks and pressure on political leaders to do something

about them have risen among the European public but declined among Americans Vogel explores how policymakers in Europe have grown supportive of more stringent regulations while those in the United States have become sharply polarized along partisan lines And as European policymakers have grown more willing to regulate risks on precautionary grounds increasingly skeptical American policymakers have called for higher levels of scientific certainty before imposing additional regulatory controls on business

EU Policies in a Global Perspective Gerda Falkner,Patrick Müller,2013-11-20 Recent decades have seen a rise in the significance of governance layers beyond the nation state and even Europe Nonetheless few efforts have been made thus far to systematically examine the EU s interaction with global policy regimes This book maps the relative importance of EU policies in the multi level global governance system in comparison with national and global activities It provides a unique comparative analysis of the EU s capacity for projecting its policies outward Focusing on trade policy agriculture food safety competition social rights environmental policy transport migration nuclear non proliferation or financial regulation each chapter contributes to a better understanding of the EU s role in shaping global policies the mechanisms it uses and the conditions leading to success or failure The contributors comparative research highlights that policy export is a demanding phenomenon that faces severe limitations and frequently comes with drawbacks Still EU policy export played a key role in shaping the rules of the global trade regime and influenced global policy outcomes at least to a minor extent or in technical aspects in the majority of the covered policy areas Overall however

this book reveals that the EU not only aims to export its policies but interacts with its global environment in a number of distinct ways including policy import and policy protection to shield it from global pressures Concluding with a comparison of all policies on the meta level and relevant policy recommendations this book will be of interest to students scholars and practitioners of European politics European public policy global governance and international relations

Social Capital and Governance Frane Adam, 2007 The intention of this book's contributions is to focus on some key aspects of social capital in the context of civic participation governance and civil society at both national and EU levels The role of new EU members is particularly stressed The texts aim to demonstrate how social capital in the form of co-operative norms and actions facilitates the self-organisation of civil society and its internal ability to articulate policy relevant alternative proposals The efficiency and responsiveness of governance at different local national transnational levels are also addressed Besides theoretical reconsiderations the book draws attention to the issue of the quality of data and greater methodological reflexivity
