## **Reinhabiting Reality Towards A Recovery Of Culture:**

*Reinhabiting Reality* Freya Mathews, 2005-02-03 Argues that the environmental crisis is symptomatic of much deeper crises in modern civilization

*Reinhabiting Reality* Freya Mathews, 2012-02-01 In this sequel to *For Love of Matter* A Contemporary Panpsychism also published by SUNY Press Freya Mathews argues that replacing the materialist premise of modern civilization with a panpsychist one transforms the entire fabric of culture in profound ways She claims that the environmental crisis is a symptom of deeper issues facing modern civilization arising from the loss of the very meaning of culture To come to grips with this crisis requires a change in the metaphysical premise of modernity deeper than any as yet envisaged even by the radical ecology movement This is a change with profound implications for the full range of existential questions and not merely for questions regarding our relationship with nature

*The Eye of the Crocodile* Val Plumwood, 2012-11-01 Val Plumwood was an eminent environmental philosopher and activist who was prominent in the development of radical ecophilosophy from the early 1970s until her death in 2008 Her book *Feminism and the Mastery of Nature* 1992 has become a classic In 1985 she was attacked by a crocodile while kayaking alone in the Kakadu national park in the Northern Territory She was death rolled three times before being released from the crocodile's jaws She crawled for hours through swamp with appalling injuries before being rescued The experience made her well placed to write about cultural responses to death and predation The first section of *The Eye of the Crocodile* consists of chapters intended for a book on crocodiles that remained unfinished at the time of Val's death The remaining chapters are previously published papers brought together to form an overview of Val's ideas on death predation and nature

*Climate Change and Environmental Ethics* Ved P. Nanda, 2012-09-30 There is a broad consensus that climate change presents the international community with a formidable challenge Yet progress on all fronts prevention mitigation and adaptation has been slow Ved P Nanda finds an explanation for this disparity in the sharp divide between the developed and developing countries Developing countries demand that major industrialized nations provide the necessary resources and technology to address climate change while many developed countries seek firm commitments and timetables on action from the developing countries The result is a stalemate *Climate Change and Environmental Ethics* contains first rate research and thinking from scholars from multiple disciplines ethics ecology philosophy economics political science history and international law What distinguishes this volume from recent work on climate change are two of its special features One is the multi disciplinary backgrounds of the scholars their stellar experiences and the wisdom with which they express not simply their philosophy and theory but also their suggestions for concrete specific action in practical terms The second is the special niche this volume fills in its overarching theme of the need for a renewed environmental ethic that can bring together these disparate but interconnected views This volume explores alternative ways of conceiving our relation to the natural world A spirit of international cooperation and collaboration is needed to meet the challenge The reader is compelled to think anew about our

understanding of the scientific and technical issues as well as our values and ethical responsibilities regarding climate change

**The Denial of Nature** Arne Johan Vetlesen, 2015-02-11 A study of the increasingly precarious relationship between humans and nature this book seeks to go beyond work already contributed to the environmental movement It does so by highlighting the importance of experiencing rather than merely theorizing nature while realizing that such experience is becoming increasingly rare thus reinforcing the estrangement from nature that is a source of its ongoing human caused destruction In his original approach to environmental philosophy the author argues for the reinstatement of nature's value outside of its exploitative usefulness for human ends Such a perspective emphasizes the extent to which the environmental problem is a concrete reality requiring urgent action based on a multi sensuous appreciation of humans dependence on nonhuman lifeforms Designed as an accompaniment to undergraduate and postgraduate research *The Denial of Nature* draws on empirically informed literature from the social sciences to examine what life is really like for humans and nature in the era of global capitalism The book contends that capitalist society exploits nature both in the form of human capital and natural capital more relentlessly than any other and offers an environmental philosophy which actively opposes current developments Through discussions of the work of Teresa Brennan Theodor Adorno Martin Heidegger and Hans Jonas and through a radical critique of the nature deficit in Jürgen Habermas theory of capitalist modernity *The Denial of Nature* relies on insights from Critical Realism to bring together several seldom linked philosophies and suggest a new approach to the heavily discussed question of environmental ethics Arne Johan Vetlesen is Professor of Philosophy at the University of Oslo Norway and the author of twenty books among them *Perception Empathy and Judgment An Inquiry into the Preconditions of Moral Performance* 1994 *Closeness An Ethics with Heidegger* 1997 *Evil and Human Agency* 2005 and *A Philosophy of Pain* 2010

*Depth Psychology and Climate Change* Dale Mathers, 2020-11-29 *Depth Psychology and Climate Change* offers a sensitive and insightful look at how ideas from depth psychology can move us beyond psychological overwhelm when facing the ecological disaster of climate change and its denial Integrating ideas from disciplines including anthropology politics spirituality mythology and philosophy contributors consider how climate change affects psychological well being and how we can place hope and radical uncertainty alongside rage and despair The book explores symbols of transformation myths and futures and is structured to encourage regular reflection Each contributor brings their own perspective green politics change and loss climate change denial consumerism and our connection to nature suggesting responses to mental suffering arising from an unstable and uncertain international outlook They examine how subsequent changes in consciousness can develop This book will be essential reading for analytical psychologists Jungian analysts and psychotherapists as well as academics and students of Jungian and post Jungian studies It will also be of great interest to academics and students of the politics and policy of climate change anthropology myth and symbolism and ecopsychology and to anyone seeking a new perspective on the climate emergency

*In Search of Grace* Peter Reason, 2017-10-27 To recover from ecological disaster we humans must

transform the sense of who we are in relation to the Earth In Search of Grace is the story of an ecological pilgrimage undertaken by the author in his small yacht Coral from the south of England and round the west coast of Ireland to the far north of Scotland It explores themes of pilgrimage the overall pattern of separation from the everyday venturing forth and returning home It tells of meeting wildlife visiting sacred places confronting danger expanding and deepening the experience of time of silence and of fragility

Roots, Routes and a New Awakening Ananta Kumar Giri, 2021-03-01 This book seeks to find creative and transformative relationship among roots and routes and create a new dynamics of awakening so that we can overcome the problems of closed and xenophobic roots and rootless cosmopolitanism The book draws upon multiple philosophical and spiritual traditions of the world such as Siva Tantra Buddhist phenomenology and Peircean Semiotics and discusses the works of Ibn Arabi Thoreau Tolstoy Gandhi and Raimon Panikkar among others The book is transdisciplinary building on creative thinking from philosophy anthropology political studies and literature It is a unique contribution for forging a new relationship between roots and routes in our contemporary fragile and complex world

**Rethinking Wilderness and the Wild** Robyn Bartel, Marty Branagan, Fiona Utey, Stephen Harris, 2020-10-29

Rethinking Wilderness and the Wild Conflict Conservation and Co existence examines the complexities surrounding the concept of wilderness Contemporary wilderness scholarship has tended to fall into two categories the so called fortress conservation and co existence schools of thought This book contending that this polarisation has led to a silencing and concealment of alternative perspectives and lines of enquiry extends beyond these confines and in particular steers away

from the dilemmas of paradise or paradox in order to advance an intellectual and policy agenda of plurality and diversity rather than of prescription and definition Drawing on case studies from Australia Aotearoa New Zealand the United States and Iceland and explorations of embodied experience creative practice philosophy and First Nations land management approaches the assembled chapters examine wilderness ideals conflicts and human nature dualities afresh and examine co existence and conservation in the Anthropocene in diverse ontological and multidisciplinary ways By demonstrating a strong commitment to respecting the knowledge and perspectives of Indigenous peoples this work delivers a more nuanced ethical and decolonising approach to issues arising from relationships with wilderness Such a collection is immediately appropriate given the political challenges and social complexities of our time and the mounting threats to life across the globe The abiding and uniting logic of the book is to offer a unique and innovative contribution to engender transformations of wilderness scholarship activism and conservation policy This text refutes the inherent privileging and exclusionary tactics of dominant modes of enquiry that too often serve to silence non human and contrary positions It reveals a multi faceted and contingent wilderness alive with agency diversity and possibility This book will be of great interest to students and scholars of conservation environmental and natural resource management Indigenous studies and environmental policy and planning It will also be of interest to practitioners policymakers and NGOs involved in conservation protected environments and environmental governance

Knowing Places Elizabeth Moores, 2012 *Understanding Environmental Philosophy* Andrew Brennan, Y.S. Lo, 2014-12-05 Environmental philosophy is one of the exciting new fields of philosophy to emerge in the last forty years Understanding Environmental Philosophy presents a comprehensive critical analysis of contemporary

philosophical approaches to current ecological concerns Key ideas are explained placed in their broader cultural religious historical political and philosophical context and their environmental policy implications are outlined Central ideas and concepts about environmental value individual wellbeing ecological holism and the metaphysics of nature set the stage for a discussion of how to establish moral rules and priorities and whether it is possible to transcend human centred views of the world The reader is also helped with an annotated guide to further reading questions for discussion and revision as well as boxed studies highlighting key concepts and theoretical material A clear and accessible introduction to this most dynamic of subjects Understanding Environmental Philosophy will be invaluable for a wide range of readers Utopia: Social Theory and the Future Keith Tester, Michael Hviid Jacobsen, 2016-02-17 In the light of globalization's failure provide the universal panacea expected by some of its more enthusiastic proponents and the current status of neo liberalism in Europe a search has begun for alternative visions of the future alternatives to the free market and to rampant capitalism Indeed although these alternatives may not be conceived of in terms of being a perfect order there does appear to be a trend towards utopian thinking as people including scholars and intellectuals search for inspiration and visions of better futures If as this search continues it transpires that politics has little to offer then what might social theory have to contribute to the imagination of these futures Does social theory matter at all What resources can it offer this project of rethinking the future Without being tied to any single political platform Utopia Social Theory and the Future explores some of these questions offering a timely and sustained attempt to make social theory relevant through explorations of its resources and possibilities for utopian imaginations It is often claimed that utopian thought has no legitimate place whatsoever in sociological thinking yet utopianism has remained part and parcel of social theory for centuries As such in addition to considering the role of social theory in the imagination of alternative futures this volume reflects on how social theory may assist us in understanding and appreciating utopia or utopianism as a special topic of interest a special subject matter a special analytical focus or a special normative dimension of sociological thinking Bringing together the latest work from a leading team of social theorists this volume will be of interest to sociologists social and political theorists anthropologists and philosophers **The Pedagogies of Cultural Studies** Andrew Hickey, 2016-03-31 This volume provides an exploration of the manifold ways pedagogy is enacted in cultural studies practice Pedagogy in the book comes to stand as far more than simply the art of teaching contributors explore how pedagogy defines and shapes their practice as cultural studies scholars Chapters variously highlight the role of pedagogy in cultural studies practice including formal classroom situations where cultural studies is deployed to teach as part of degree or coursework programs but importantly also as something removed from the formal classroom as situated within the research act via public engagement or through social activism as a public pedagogy In so doing the book charts a course for understanding cultural studies as an active and engaged discipline interested in understanding cultural flows and production as sites of learning and exchange The US and the World We Inhabit

Anastasia Cardonem, Paola Loreto, Adele Tiengo, 2019-11-29 Environmental and global outlooks are currently at the center of the most lively and urgent international scholarship This volume serves to overcome the self referentiality of American studies by intersecting the study of American literature and history with the questions and concerns raised by these perspectives It re conceptualizes the mutual and shifting positions of center s and margin s and subject s and object s in terms of relation and an inclusive structure of relations based on an ecological ethics The contributions here explore many methodological hypotheses ranging from Christa Greve Vollp s work on eco cosmopolitanism to Peter Bardaglio s report on US climate activism as well as the ecocritical and ecofeminist viewpoints of Scott Slovic and Greta Gaard respectively In addition to contributing to academic discourse the essays written by both young and established international scholars and coherently arranged into four thematic sections explore topics that are of interest to the broader public The issues discussed here include identity and new forms of belonging migration and the environment ecolanguage ecopoetry and ecopoetics translation and multilingualism animal studies environmental activism shifting geographies and ecofeminism

**Religion and Ecology in the Public Sphere** Celia Deane-Drummond, Heinrich Bedford-Strohm, 2011-04-28 A collection of essays from top scholars in the field of Religion and Ecology that stimulates the debate about the religious contribution to ecological debate

**The Future of Ecocriticism** Serpil Oppermann, Ufuk Özdağ, Nevin Özkan, 2011-05-25 As we enter the second decade of the twenty first century environmental concerns dominate the media headlines from rampant poverty in the developing world to nuclear accidents in industrialized nations How did human civilization arrive at its current predicaments and what can we do to temper our habits of mind and mitigate society s environmentally and socially destructive behaviors The field of ecocriticism also sometimes called environmental criticism attempts to grapple with such issues A branch of literary and cultural studies that essentially began in North America in the 1970s ecocriticism is currently one of the most quickly developing areas of environmental research and teaching The Future of Ecocriticism New Horizons brings together thirty two of the latest articles in the field including work by some of the leading scholars from around the world Although ecocriticism has been particularly active in North America Western Europe and East Asia important studies of traditional environmental thought environmental communication strategies and environmental aesthetics have begun to emerge in every region of this world This new book co edited by three prominent Turkish scholars and a leading American ecocritic offers a special cluster of Turkish ecocriticism with a focus on environmental stories and ideas in this culture that bridges Europe and Asia Another unique feature of The Future of Ecocriticism New Horizons is the concluding dialogue among the four editors about the current state of the field

**Mobilities of Self and Place** Mahni Dugan, 2019-11-16 When it comes to migration there is no level playing field Some people are privileged advantaged and supported and others are marginalised persecuted and traumatised The extension of the rights and equalities for which many people advocate and provision of other extrinsic conditions are insufficient for wellbeing This work asks what is sufficient What is it that people do and can do to change their

experience from suffering to wellbeing when handling challenges of migration and other mobilities What helps people when they are migrating What have migrants experienced and learned that could be useful to others facing challenges of mobility and change How can this learning be applied to promote greater social wellbeing and care of environments in an increasingly mobile world Mobilities of Self and Place documents rich conversations with regular migrants and refugees to critically consider migration history human rights place self and mobilities studies The work explores ontological and epistemological questions of sense of self sense of place identity and agency Mahni Dugan helps us understand how the relationship between sense of place and sense of self affects the ability of migrants to relocate with wellbeing The movement from global to local social to personal intellectual to experiential offers a broad societal understanding of the phenomena and challenges of contemporary mobilities

**Learning to Lead Together** Jane Riddiford, 2021-03-01 Never before has there been such strong recognition of the importance of community based green spaces to local communities and urban redevelopment This book is an autoethnographic account of the challenges and breakthroughs of learning to lead together The interwoven stories provide first hand evocative examples of how an ecological and community approach to organisational development and urban regeneration helped shift the business as usual paradigm It will help you identify and step beyond individualistic and heroic notions of leadership and will inspire you to find your own way of embracing natural and shared authority The book focuses on the experiences of developing an environmental education charity in London Global Generation It shows how action research nature practice and storytelling has successfully grown shared purpose trust and collaboration both within Global Generation and in the wider community The style and structure of the book reflects the participatory approach that it presents The author Jane Riddiford deliberately challenges the norms of authorship which is shaped by the dominant Western narrative objective authorless and othered This book goes beyond this narrow framework combining different styles of writing including traditional and autobiographical storytelling diary entries and co writing Along with practice accounts of what happened challenges raised and lessons learned each chapter will also include other people's descriptions of their experience of being involved in the process
