Evolution and Contextual Behavioral Science David Sloan Wilson, Steven C. Hayes, 2018-09-01. What do evolutionary science and contextual behavioral science have in common? Edited by David Sloan Wilson and Steven C. Hayes, this groundbreaking book offers a glimpse into the histories of these two schools of thought and provides a sound rationale for their reintegration. Evolutionary science (ES) provides a unifying theoretical framework for the biological sciences and is increasingly being applied to the human-related sciences. Meanwhile, contextual behavioral science (CBS) seeks to understand the history and function of human behavior in the context of everyday life where behaviors occur and to influence behavior in a practical sense. This volume seeks to integrate these two bodies of knowledge that have developed largely independently. In *Evolution and Contextual Behavioral Science*, two renowned experts in their fields argue why ES and CBS are intrinsically linked as well as why their reintegration or reunification is essential. The main purpose of this book is to continue to move CBS under the umbrella of ES and to help evolutionary scientists understand how working alongside contextual behavioral scientists can foster both the development of ES principles and their application to practical situations. Rather than the sequential relationship that is typically imagined between these two schools of thought, this volume envisions a parallel relationship between ES and CBS where science can best influence positive change in the real world. [Cognitive Behavior Therapies](#) Ann Vernon, Kristene Anne Doyle, 2017-09-06. This comprehensive book showcases different approaches to cognitive behavior therapy (CBT) and focuses on the implementation of these various theories in real-world practice. Following an overview of cognitive therapy, practitioners and scholars discuss behavior therapy, cognitive therapy, rational emotive behavior therapy, multimodal therapy, acceptance and commitment therapy, dialectical behavior therapy, and mindfulness. Each theory highlighted includes a profile of the theorist, an overview of the theory, a discussion of the therapeutic process, an array of targeted interventions, a verbatim case transcript, an analysis of the limitations of the theory, and reflective sidebars to facilitate learning. The final chapter presents a single case study discussed from the perspective of each particular theory. Requests for digital versions from ACA can be found on www.wiley.com.
