Interfaces in Functional Discourse Grammar Lucía Contreras-García, Daniel García Velasco, 2021-08-23 In grammar design a basic distinction is made between derivational and modular architectures This raises the question of which organization of grammar can deal with linguistic phenomena more appropriately The studies contained in the present volume explore the interface relations between different levels of linguistic representation in Functional Discourse Grammar as presented in Hengeveld and Mackenzie 2008 and Keizer 2015 This theory analyses linguistic expressions at four linguistic levels interpersonal representational morphosyntactic and phonological The articles address issues such as the possible correspondences and mismatches between those levels as well as the conditions which constrain the combinations of levels in well formed expressions Additionally the theory is tested by examining various grammatical phenomena with a focus both on the English language and on typological adequacy anaphora raising phonological reduction noun incorporation reflexives and reciprocals serial verbs the passive voice time measurement constructions coordination nominal modification and connectives Overall the volume provides both theoretical and descriptive insights which are of relevance to linguistics in

general **Agency and Consciousness in Discourse** Paul Thibault, 2004-12-01 In the past two decades there has been considerable interest in the ways in which subjects are positioned in discursive practice This interest has entailed a focus on the role of language and discourse in the processes in and through which subjects are constituted in discourse However questions of agency and how it relates to consciousness have received less attention This book explores the ways in which agency and consciousness are created through transactions between self and other The book argues that it is necessary to regard body brain interactions in the context of the social and discursive practices which act upon human bodies These issues of agency and individuation are explored in relation to infant semiosis as well as in relation to children's symbolic play Thibault looks at the importance of the self referential moral conscience in relation to the interpersonal dimension of all acts of meaning making This conscience is also connected to the development of a self referential viewpoint which the book argues is connected to the ecosocial semiotic systems of thinking about consciousness as a complex system operating on many different levels The author discusses and evaluates the work of linguists psychologists biologists semioticians and sociologists such as Basil Bernstein Mikhail Bakhtin J J Gibson M A K Halliday Walter Kauffman Lakoff Johnson Jay Lemke Jean Piaget and Stanley Salthe to develop a new theory of agency and consciousness **Empirical Linguistics** Geoffrey Sampson, 2002-09-12 Linguistics has become an empirical science again after several decades when it was preoccupied with speakers' hazy intuitions about language structure With a mixture of English language case studies and more theoretical analyses Geoffrey Sampson gives an overview of some of the new findings and insights about the nature of language which are emerging from investigations of real life speech and writing often although not always using computers and electronic language samples corpora Concrete evidence is brought to bear to resolve long standing questions such as Is there one English language or many Englishes and Do different social groups use characteristically elaborated or restricted language codes Sampson shows readers how to use some of the new techniques for themselves giving a step by step recipe book method for applying a quantitative technique that was invented by Alan Turing in the World War II code breaking work at Bletchley Park and has been rediscovered and widely applied in linguistics fifty years later **Brain, Mind and the Signifying Body** Paul Thibault, 2006-09-17 Brain Mind and the Signifying Body is an exploration of a multimodal theory of cognitive science Using linguistic theories first developed by Saussure and more latterly by M A K Halliday Paul Thibault analyses how social and biological systems interact to produce meaning This fascinating study will be of interest to undergraduates and academics researching cognitive linguistics and advanced semiotics The book engages with the current dialogue between the human and life sciences to ask questions about the relationship between the physical biological aspects of a human being and the sociocultural framework in which a human being exists Paul J Thibault argues that we need to understand both the semiotic discursive nature of meaning making and the physical context in which this activity takes place The two are inseparable and hence the only way we can understand our subjective experience of our environment and our

perceptions of our inner states of mind is by giving equal weight to both frameworks This ecosocial semiotic theory engages with linguistics semiotics activity theory biology and psychology In so doing the book produces a new way of looking at how a human being makes sense of his or her environment but also how this environment shapes such meanings *Pragmatics of Discourse* Klaus P. Schneider, Anne Barron, 2014-06-18 Discourse is language as it occurs in any form or context beyond the speech act It may be written or spoken monological or dialogical but there is always a communicative aim or purpose The present volume provides systematic orientation in the vast field of studying discourse from a pragmatic perspective It first gives an overview of a range of approaches developed for the analysis of discourse including among others conversation analysis systemic functional analysis genre analysis critical discourse analysis corpus driven approaches and multimodal analysis The focus is furthermore on functional units in discourse such as discourse markers moves speech act sequences discourse phases and silence The final section of the volume examines discourse types and domains providing a taxonomy of discourse types and focusing on a range of discourse domains e g classroom discourse medical discourse legal discourse electronic discourse Each article surveys the current state of the art of the respective topic area while also presenting new research findings
