Relays Literature As An Epoch Of The Postal System Pb:

Relays Bernhard Siegert, 1999 This book examines how one aspect of the social and technological situation of literature namely the postal system determined how literature was produced and what was produced within literature Language itself has the structure of a relay where what is transmitted depends on a prior withholding The social arrangements and technologies for achieving this transmission thus have had a particularly powerful impact on the imagination of literature as a medium The book has three parts The first part reconstructs the postal conditions of classic and Romantic literature the invention of postage in the seventeenth century which transformed the postal system into a service meant to be used by the population instead of by the prince alone the sexualization of letter writing which was introduced in the middle of the eighteenth century and changed the reading of a letter into an interpretation of intimate confessions of the soul and Goethe s turning of this new ontology of the letter into a logistics of literature whereby literary authorship was constructed by means of postal logistics with the precision of engineering The second part analyzes nineteenth century postal innovations that facilitated communication through letters and examines how literary works were able to live off such communication These innovations included the reform of the post office the invention of the postage stamp the Universal Postal Union which subjected letter writing to an economy of materials and uniform standards and the telegraph and the telephone which surpassed literature in terms of speed economy and analog signal processing In the third part on the basis of a close reading of Franz Kafka s letters to his typist fianc e the author demonstrates how postal logistics of love and authorship have worked in the era of modern postal systems and technical media Kafka s correspondence is deciphered as a war of nerves waged by means of all available techniques and conditions of transmission **Cumulated Index to the Books** ,1999

The Development of the U.S. Postal System Ella Margaret Greenhalgh, 1923 **"Carry the Mail"**. Gray (James) Inc., New York, 1949 **From Pillar to Post** Laurin Zilliacus, 1956 Story of the world post postman s adventures through the centuries *Romance of the Mails* ,1931* The History of Postal Services from 6,000 Years Ago to the Present Thomas Riley, 2019-12-16 Communication the lifeblood of every society has undergone tremendous advances over the centuries One of the earliest messages as recorded in the Old Testament of the Bible was transported by a dove to Noah in the form of an olive branch Moses inscribed the Ten Commandments in stone tablets to stress their importance and to etch into the memory of his people lasting principles of human conduct The Chinese developed a Post House Relay System that used mounted

couriers to deliver messages on paper The ancient Romans Mayans and Incas developed systems to relay messages This very basic need to communicate over a long distance marks the advent of postal services The ingenuity of man in devising means to communicate over long distance is a tribute to man s imagination Dogs cats camels and reindeer were used at various times until technology improved to the point where steamships railroads and airplanes aided communication As faster means of communication were devised the postal service was quick to make use of them Now computers satellites and fax machines provide even faster means to communicate This fascinating history follows the evolution of the postal system from stone tablet etchings to electronic mail via satellite The book closes with a discussion about stamps and stamp collecting that will make readers look at postage stamps with greater appreciation A wealth of images enhance the narrative
