Handbook of Normative Data for Neuropsychological Assessment Maura Mitrushina,Kyle B. Boone,Jill Razani,Louis F. D'Elia,2005-02-10 When Handbook of Normative Data for Neuropsychological Assessment was published in 1999 it was the first book to provide neuropsychologists with summaries and critiques of normative data for neuropsychological tests The Second Edition which has been revised and updated throughout presents data for 26 commonly

used neuropsychological tests including Trailmaking Color Trails Stroop Color Word Interference Auditory Consonant Trigrams Paced Auditory Serial Addition Ruff 2 and 7 Digital Vigilance Boston Naming Verbal Fluency Rey Osterrieth Complex Figure Hooper Visual Fluency Design Fluency Tactual Performance Wechsler Memory Scale Revised Rey Auditory Verbal learning Hopkins Verbal learning WHO UCLA Auditory Verbal Learning Benton Visual Retention Finger Tapping Grip Strength Dynamometer Grooved Pegboard Category and Wisconsin Card Sorting tests In addition California Verbal learning CVLT and CVLT II CERAD List Learning and selective Reminding Tests as well as the newest version of the Wechsler Memory Scale WMS III and WMS IIIA are reviewed Locator tables throughout the book guide the reader to the sets of normative data that are best suited to each individual case depending on the demographic characteristics of the patient and highlight the advantages associated with using data for comparative purposes Those using the book have the option of reading the authors critical review of the normative data for a particular test or simply turning to the appropriate data locator table for a quick reference to the relevant data tables in the Appendices The Second Edition includes reviews of 15 new tests The way the data are presented has been changed to make the book easier to use Meta analytic tables of predicted values for different ages and education where relevant are included for nine tests that have a sufficient number of homogeneous datasets No other reference offers such an effective framework for the critical evaluation of normative data for neuropsychological tests Like the first edition the new edition will be welcomed by practitioners researchers teachers and graduate students as a unique and valuable contribution to the practice of neuropsychology

Risk Assessment Marvin Rausand, 2013-06-12 An introduction to risk assessment that utilizes key theory and state of the art applications With its balanced coverage of theory and applications along with standards and regulations Risk Assessment Theory Methods and Applications serves as a comprehensive introduction to the topic The book serves as a practical guide to current risk analysis and risk assessment emphasizing the possibility of sudden major accidents across various areas of practice from machinery and manufacturing processes to nuclear power plants and transportation systems The author applies a uniform framework to the discussion of each method setting forth clear objectives and descriptions while also shedding light on applications essential resources and advantages and disadvantages Following an introduction that provides an overview of risk assessment the book is organized into two sections that outline key theory methods and applications Introduction to Risk Assessment defines key concepts and details the steps of a thorough risk assessment along with the necessary quantitative risk measures Chapters outline the overall risk assessment process and a discussion of accident models and accident causation offers readers new insights into how and why accidents occur to help them make better assessments Risk Assessment Methods and Applications carefully describes the most relevant methods for risk assessment including preliminary hazard analysis HAZOP fault tree analysis and event tree analysis Here each method is accompanied by a self contained description as well as workflow diagrams and worksheets that illustrate the use of discussed techniques Important problem areas in risk assessment such as barriers and

barrier analysis human errors and human reliability are discussed along with uncertainty and sensitivity analysis Each chapter concludes with a listing of resources for further study of the topic and detailed appendices outline main results from probability and statistics related formulas and a listing of key terms used in risk assessment A related website features problems that allow readers to test their comprehension of the presented material and supplemental slides to facilitate the learning process Risk Assessment is an excellent book for courses on risk analysis and risk assessment at the upper undergraduate and graduate levels It also serves as a valuable reference for engineers researchers consultants and practitioners who use risk assessment techniques in their everyday work

Offshore Risk Assessment Jan-Erik Vinnem,2013-03-14 Offshore Risk Assessment is the first book to deal with quantified risk assessment QRA as applied specifically to offshore installations and operations Risk assessment techniques have been used for some years in the offshore oil and gas industry and their use is set to expand increasingly as the industry moves into new areas and faces new challenges in older regions The book starts with a thorough discussion of risk analysis methodology Subsequent chapters are devoted to analytical approaches to escalation escape evacuation and rescue analysis of safety and emergency systems Separate chapters analyze the main hazards of offshore structures Fire explosion collision and falling objects Risk mitigation and control are then discussed followed by an outline of an alternative approach to risk modelling that focuses especially on the risk of short duration activities Not only does the book describe the state of the art of QRA it also identifies weaknesses and areas that need development Readership Besides being a comprehensive reference for academics and students of marine offshore risk assessment and management the book should also be owned by professionals in the industry contractors suppliers consultants and regulatory authorities
