Competing Risks Martin J. Crowder,2001-05-11 If something can fail it can often fail in one of several ways and sometimes in more than one way at a time There is always some cause of failure and almost always more than one possible cause In one sense then survival analysis is a lost cause The methods of Competing Risks have often been neglected in the survival analysis literature Jean-Christophe Rufin,2002-08-01 The sequel to The Abyssinian finds Jean Baptiste Poncet in Persia

 models incomplete categorical data design the EM algorithm the bootstrap method and the data augmentation algorithm A
 self contained systematic introduction the book shows you how to draw valid statistical inferences from survey data with
 sensitive characteristics It guides you in applying the non randomized response approach in surveys and new non

 It also deals with related problems such as the estimation of unknown ordered parameters A separate chapter is devoted to
 information about several tables available in the literature for carrying out various specific procedures Examples are given in
 another chapter illustrating applications of these procedures in various practical contexts Although several books have
 appeared to date in this area many of them deal with specific aspects of the field and a limited number of topics This book
 contains substantial material not discussed in other books Audience this book can serve as a text for a graduate topics course
 in ranking and selection as it has done at Purdue University for more than 30 years It can also serve as a reference for
