Religion And International Responsibility:

Religion and International Responsibility Robert Gordis, Council on Religion and International Affairs, 1969 Good Faith in International Law Robert Kolb, 2017-07-13 There is a great degree of controversy on the proper complexion and role of general principles of law in the international legal order Opinions range from total rejection of some types of principles to the most enthusiastic endorsement of principles as the necessary oil for the many complex wheels of the legal order In this book one of the leading public lawyers of his generation explores the concept of good faith and its role in international law Rather than offer a detailed comprehensive examination Kolb aims to map the true points of gravity of the principle of good faith in the international legal order In so doing he illustrates how the various legal institutions who operate in the sphere of public international law allow the principle of good faith to unfold *Theory of Obligations in International Law* Cezary Mik, 2024-05-07 Examining the fulfilment of international obligations by subjects of this law this book explores the normative and functional links between the sources and rules of international law on the one hand and the responsibility for violating international law on the other In the sphere of law making the theory of obligations allows for a more precise and considered formulation of international obligations It has the potential to enable subjects of international law to behave more rationally allowing deeper reflection on whether to take on obligations and how to properly perform them This book proposes a new approach to the issue of the proper operation of international law with the theory of obligations at its heart Linking the institutions and concepts of international law into a rational whole the book offers an analysis of the operation of international law and the behaviour of its subjects to develop a framework for ensuring the ultimate effectiveness of international law Analysing sources of law including treaties and common law alongside the resolutions of international organisations this book demonstrates the practical application of the subject with reference to the jurisprudence of international courts and other bodies The volume will be of interest to scholars students and practitioners concerned with international law its creation performance application compliance and enforcement Human Rights and Responsibilities in the World Religions Joseph Runzo, Arvind Sharma, Nancy M. Fitzmaurice, Malgosia Fitzmaurice, Dan Sarooshi, 2004-06 The book contains papers presented at a conference which cover issues of State Responsibility before various international judicial institutions *The Law of International Responsibility* James Crawford, Alain Pellet, Simon Olleson, Dr Kate Parlett, 2010-05-20 The law of international responsibility is one of international law's core foundational topics Written by international experts this book provides an overview of the modern law of international responsibility both

Allocating International Responsibility Between Member States and International Organisations Nikolaos Voulgaris, 2019-05-16 The ever growing interaction between member States and international organisations results all too often in situations of non conformity with international law eg peacekeeping operations international economic adjustment programmes counter terrorism sanctions Seven years after the finalisation of the International Law Commission's Articles on the Responsibility of International Organisations ARIO international law on the allocation of international responsibility between these actors still remains unsettled The confusion around the nature and normative calibre of the relevant rules the paucity of relevant international practice supporting them and the lack of a clear and principled framework for their elaboration impairs their application and restricts their ability to act as effective regulatory formulas This study aims to offer doctrinal clarity in this area of law and purports to serve as a point of reference for all those with a vested interest in the topic For the first time since the publication of the ARIO all international responsibility issues dealing with interactions between member States and international organisations are put together in one book under a common approach Structured around a systematisation of the interactions between these actors the study provides an analytical framework for the regulation of indirect responsibility scenarios Based on the ideas of the intellectual fathers of international law such as Scelle's doublement fonctionnel theory and Ago's derivative responsibility model the book employs old ideas to add original argumentation to a topic that has been dealt with extensively by recent commentators

Good Faith in International Investment Arbitration Emily Sipiorski, 2019 Written by a leading legal researcher this book offers a comprehensive study of the principle a frequently invoked but rarely analysed aspect of investment arbitration It is a thorough and expansive study that considers the application of good faith by arbitral tribunals and parties in international investment disputes encompassing both procedural and substantive aspects of good faith Expertly negotiating a complex principle this book diligently follows the arbitral process from jurisdiction through merits and to cost decisions identifying the various applications of good faith in investment disputes The author offers detailed analyses of the role of good faith in defining nationality and investor as well as in pre dispute admissibility requirements The study then delves into the ways the principle guides parties arguments and informs tribunals decisions regarding evidence substantive protections and costs It further addresses the role of good faith in the behaviour of arbitrators and other actors This is a guide for anyone wishing to understand this important principle that has accompanied the developing system of international investment law

Good Faith and International Economic Law Andrew D. Mitchell, M Sornarajah, Tania Voon, 2015-05-21 The past two decades have seen a significant proliferation of trade and investment treaties around the world States are increasingly negotiating agreements that regulate both trade and investment such as the Trans Pacific Partnership Agreement and the Transatlantic Trade and Investment Partnership The number of investor state dispute settlement cases is rapidly accumulating each year yet states enthusiasm for investor state arbitration

has become more qualified as concern has intensified that the system can be abused by foreign investors Good faith is therefore becoming increasingly important as a principle particularly in the investment context due to disputes about investor conduct such as corporate restructuring in order to gain the protection of a particular investment treaty regarding an existing or foreseeable dispute and States responses to public policy concerns through attempts to modify or terminate investment treaties in the face of ongoing or expected claims Tribunals adjudicating investment disputes have used the principle of good faith in a haphazard and uncoordinated manner causing serious problems of uncertainty and inconsistency In response to these developments this book contains the first comprehensive and integrated analysis of the treatment of good faith in international investment law noting the broader implications of good faith in public international law and international trade law

Ethical Choices and Global Greenhouse Warming Lydia Dotto, 2010-10-30 There are many things we can choose to do about climate change including doing nothing at all All of them have consequences many of which will be unforeseen If we could foretell more accurately what would happen to the climate in the future our choices might be clearer if not necessarily easier to make Unfortunately predicting future climate change is fraught with uncertainty and we will be forced to make choices in the face of that uncertainty To what extent are we motivated in this difficult process by a desire to do the right thing And how do we decide what is the right thing to do The answer to these questions depends on whose ethical interests are considered What is best for a Canadian living in the last decade of the twentieth century even supposing we could discover what that is might not be best for a Somali or for our great grandchildren or for the rain forest of the Amazon or the kangaroos of Australia Decisions about what to do about global warming will therefore be influenced by how much relative weight we give to the ethical interests of Canadians Somalis grandchildren rain forests kangaroos and a host of other variables Weighing these competing interests is an exercise in applied ethics This book examines the role that ethics can and should play in our decisions about how to deal with global warming

[Religious Diversity in Canadian Public Schools](#) Dia Dabby, 2022-02-01 Canadian public schools have long been entrusted with the mandate of socializing children Yet this duty can rest uneasily alongside religious diversity questions Grounding its analysis in three seminal Supreme Court cases involving religion in schools Religious Diversity in Canadian Public Schools reveals legal processes that are unduly linear

compressing multidimensional conversations into an oppositional format and stripping away the voices of children themselves Dia Dabby contends that schools are in fact microsystems worthy of their own consideration and with the power to construct their own rules and relationships This compelling work connects many of the themes that have animated public discourse since multiculturalism was officially enacted in Canada Situating its analysis in relation to concepts of nation education and diversity Religious Diversity in Canadian Public Schools encourages a deeper conversation about how religion is mediated through public schools and invites a critical reassessment of the role of law in education

Constitutionalism and Religion Francois Venter,2015-10-30 This topical book examines how the goals of constitutionalism good and fair government are addressed at a time when the multi religious composition of countries populations has never before been so pronounced How should governments courts and officials deal with this diversity The widely accepted principle of treating others as you wish them to treat you and the universal recognition of human dignity speak against preferential treatment of any religion Faced with severe challenges this leads many authorities to seek refuge in secular neutrality Set against the backdrop of globalized constitutionalism in a post secular era Francois Venter proposes engaged objectivity as an alternative to unachievable neutrality Bringing together the history of church and state the emergence of contemporary constitutionalism constitutional comparison and the realities of globalization this book offers a fresh perspective on the direction in which solutions to difficulties brought about by religious pluralism might be sought Its wide ranging comparative analyses and perspectives based on materials published in various languages provide a clear exposition of the range of religious issues with which the contemporary state is increasingly being confronted Providing a compact but thorough historical and theoretical exposition this book is an invaluable resource for students constitutional scholars judges and legal practitioners

Globalization and Common Responsibilities of States Koen De Feyter,2017-05-15 There is a growing awareness that international law insufficiently protects common global interests and that States and non State actors need to work together to protect global aims The focus of this book is on the different fields of international law where there is a need for global cooperation to achieve common aims for example the law of the sea protection of world cultural heritage sustainable development biological diversity and climate change human rights and international crimes The volume also identifies the legal developments which have taken place for example treaties which use the language of common heritage of mankind or common concern of humanity thereby identifying global concerns and reflecting a global set of values and interests independent of the interests of States
