Research Directions in Database Security, II., 1990 This report describes the final results of a workshop on database security held 15-18 May 1989 in Bethlehem New Hampshire The workshop featured several short presentations on technology areas

including trusted applications security checking with Prolog extensions inference aggregation auditing Discretionary Access Control and operating system support Vendor activities and new product developments in multilevel secure database management systems technology were also presented Finally a major portion of the workshop was devoted to discussion and presentation of database design alternatives for multilevel systems with emphasis on graphical presentation inference aggregation context and content dependent classification and modeling of classification constraints Handbook of Database Security Michael Gertz,Sushil Jajodia,2007-12-03 Handbook of Database Security Applications and Trends provides an up to date overview of data security models techniques and architectures in a variety of data management applications and settings In addition to providing an overview of data security in different application settings this book includes an outline for future research directions within the field The book is designed for industry practitioners and researchers and is also suitable for advanced level students in computer science **Database Security IX** David L. Spooner,Steven Demurjian,John Dobson,2016-01-09 This book documents progress and presents a broad perspective of recent developments in database security It also discusses in depth the current state of the art in research in the field A number of topics are explored in detail including current research in database security and the state of security controls in present commercial database systems Database Security IX will be essential reading for advanced students working in the area of database security research and development in for industrial researchers in this technical area Research Directions in Database Security IV. ,1993 This report contains the papers written for the Fourth RADC Database Security Workshop held in Little Compton Rhode Island 22 25 April 1991 The papers reflect a range of research topics from the semantics of polyinstantiation to the problems of actually building trusted database management systems The goal of this workshop was to provide a forum for the discussion of the work in progress to clarify and amplify ideas and to advance the multilevel database security research agenda Multilevel secure database management systems *Data Security And Privacy Protection: A Comprehensive Guide* Anyu Wang,2025-03-05 This book provides a comprehensive overview of data security and privacy protection with expert systematic coverage of related topics It starts with the design of system architecture and key controls under the scope and objectives of data security Then based on an in depth analysis of data security risks and challenges it provides the principles for the regulatory requirements for privacy protection and implementation as well as industry best practices Moving onto applications in networks this book expounds on the data security of information technology IT telecommunications the Cloud and the Internet of Things IoT Emerging technologies such as artificial intelligence AI blockchain and 5G are in turn examined as the frontier of theoretical and technical development in data security This work is a culmination of the author s more than 20 years of experience in the field of cybersecurity and data security As the chief cybersecurity architect of a large Forbes 500 company he possesses a comprehensive knowledge of cybersecurity theory enriched by diverse practical experience This book is a useful textbook for students of cyberspace security computer and

information technology majors in colleges and universities It is also suitable as a reference for practitioners and engineers in information security cloud computing and similar disciplines

Computational and Experimental Simulations in Engineering Kun Zhou,2024-12-02 This book gathers the latest advances innovations and applications in the field of computational engineering as presented by leading international researchers and engineers at the 30th International Conference on Computational bioengineering geotechnical engineering offshore multi scale structural integrity materials design and computer modeling methods in engineering The contributions which were selected by means of a rigorous international peer review process highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaborations

Handbook of Research on Automated Feature Engineering and Advanced Applications in Data Science Panda, Mrutyunjaya,Misra, Harekrishna,2021-01-08 In today s digital world the huge amount of data being generated is unstructured messy and chaotic in nature Dealing with such data and attempting to unfold the meaningful information can be a challenging task Feature engineering is a process to transform such data into a suitable form that better assists with interpretation and visualization Through this method the transformed data is more transparent to the machine learning models which in turn causes better prediction and analysis of results Data science is crucial for the data scientist to assess the trade offs of their decisions regarding the effectiveness of the machine learning model implemented Investigating the demand in this area today and in the future is a necessity The Handbook of Research on Automated Feature Engineering and Advanced Applications in Data Science provides an in depth analysis on both the theoretical and the latest empirical research findings on how features can be extracted and transformed from raw data The chapters will introduce feature engineering and the recent concepts methods and applications with the use of various data types as well as examine the latest machine learning applications on the data While highlighting topics such as detection tracking selection techniques and prediction models using data science this book is ideally intended for research scholars big data scientists project developers data analysts and computer scientists along with practitioners researchers academicians and students interested in feature engineering and its impact on data

Big Data Analytics for Internet of Things Tausifa Jan Saleem,Mohammad Ahsan Chishti,2021-04-20 BIG DATA ANALYTICS FOR INTERNET OF THINGS Discover the latest developments in IoT Big Data with a new resource from established and emerging leaders in the field Big Data Analytics for Internet of Things delivers a comprehensive overview of all aspects of big data analytics in Internet of Things IoT systems The book includes discussions of the enabling technologies of IoT data analytics types of IoT data analytics challenges in IoT data analytics demand for IoT data analytics computing platforms analytical tools privacy and security The distinguished editors have included resources that address key techniques in the analysis of IoT data The book demonstrates how to select the appropriate techniques to unearth valuable insights from IoT data and offers novel designs for IoT systems With an abiding focus on practical strategies with concrete applications for data analysts and IoT professionals Big Data Analytics for Internet

of Things also offers readers A thorough introduction to the Internet of Things including IoT architectures enabling technologies and applications An exploration of the intersection between the Internet of Things and Big Data including IoT as a source of Big Data the unique characteristics of IoT data etc A discussion of the IoT data analytics including the data analytical requirements of IoT data and the types of IoT analytics including predictive descriptive and prescriptive analytics A treatment of machine learning techniques for IoT data analytics Perfect for professionals industry practitioners and researchers engaged in big data analytics related to IoT systems Big Data Analytics for Internet of Things will also earn a place in the libraries of IoT designers and manufacturers interested in facilitating the efficient implementation of data analytics strategies

Cybersecurity Issues and Challenges in the Drone Industry Shah, Imdad Ali,Jhanjhi, Noor Zaman,2024-02-26 Cybersecurity Issues and Challenges in the Drone Industry is a comprehensive exploration of the critical cybersecurity problems faced by the rapidly expanding drone industry With the widespread adoption of drones in military commercial and recreational sectors the need to address cybersecurity concerns has become increasingly urgent In this book cybersecurity specialists collaborate to present a multifaceted approach to tackling the unique challenges posed by drones They delve into essential topics such as establishing robust encryption and authentication systems conducting regular vulnerability assessments enhancing software security advocating industry wide standards and best practices and educating drone users about the inherent cybersecurity risks As drones or unmanned aerial vehicles UAVs gain popularity and are deployed for various applications ranging from aerial photography and surveillance to delivery services and infrastructure inspections this book emphasizes the criticality of safeguarding the security integrity and privacy of drone systems and the data they handle It highlights the growing vulnerability of drones to cybersecurity threats as these devices become increasingly connected and integrated into our everyday lives This book is an invaluable resource for drone manufacturers government agencies regulators cybersecurity professionals and academia and research institutions invested in understanding and mitigating the cybersecurity risks in the drone industry

Big Data and Security Yuan Tian,Tinghuai Ma,Muhammad Khurram Khan,Victor S. Sheng,Zhaoqing Pan,2022-03-09 This book constitutes the refereed proceedings of the Third International Conference on Big Data and Security ICBDS 2021 held in Shenzhen China in November 2021 The 46 revised full papers and 13 short papers were carefully reviewed and selected out of 221 submissions The papers included in this volume are organized according to the topical sections on cybersecurity and privacy big data blockchain and internet of things and artificial intelligence machine learning security

Advanced Cyber Security Techniques for Data, Blockchain, IoT, and Network Protection Chaubey, Nirbhay Kumar,Chaubey, Neha,2024-11-29 In a world where cyber threats are becoming increasingly sophisticated the need for robust protection of our digital assets has never been more crucial As blockchain IoT and network infrastructures technologies expand so do new avenues for exploitation by malicious actors Protecting sensitive data and ensuring the integrity of digital communications are paramount in safeguarding personal

privacy corporate assets and even national security To stay ahead of this unprecedented curve it is essential for professionals and organizations to remain up to date with these technologies Advanced Cyber Security Techniques for Data Blockchain IoT and Network Protection delves into the latest methods and strategies used by industry experts to secure complex digital environments Whether fortifying blockchain frameworks securing IoT devices or protecting vast network infrastructures this resource offers the cutting edge insights necessary to stay one step ahead of cyber threats This volume equips practitioners academics and policymakers with the knowledge to protect the digital frontier and ensure the safety and security of valuable assets

Data Protection from Insider Threats Elisa Bertino,2012 The problem of how to protect data from theft and misuse is at the forefront of organisations minds Even though data security techniques are available to protect data and computing infrastructures many such techniques are unable to protect data from attacks posed by those working on an organisation s inside This book discusses techniques that can provide effective protection against attacks posed by people working on the inside of an organisation

Blockchain in Digital Healthcare Malaya Dutta Borah,Roberto Moro Visconti,Ganesh Chandra Deka,2021-12-29 Blockchain is a series of transactions recorded in blocks and secured cryptographically It is immutable decentralized and transparent and has proved to be beneficial across all domains to protect and store data Maintaining privacy integrity and security blockchain is particularly valuable to the healthcare industry of healthcare data Blockchain in Digital Healthcare provides a panoramic review of prospects of blockchain technology in the healthcare domain Users can record transactions in blocks in an immutable distributed ledger that cannot be changed once recorded and or published Blockchain is also decentralized which eliminates dependency on a trusted third party to facilitate transactions enabling clients and other users of the blockchain to take ownership of the data they push on the network Blockchain also makes transactions more secure as clients have their own copies Features Provides systematic and comprehensive understanding of the block chain technology and the potential in healthcare Describes how security and privacy concerns of healthcare data can be addressed using Blockchain Technology Discusses the concept of smart contracts for performing advanced level scripting to create a blockchain network to provide a platform for the development of decentralized applications Includes a chapter on role of blockchain based insurance application using Ethereum Hyperledger Presents cases of blockchain use for various aspects of drug manufacturing and the pharma supply chain This book serves as a reference book for IT professionals scientific investigators and researchers who need to analyze the prospects of blockchain technology in healthcare

Future Data and Security Engineering. Big Data, Security and Privacy, Smart City and Industry 4.0 Applications Tran Khanh Dang,Josef Küng,Tai M. Chung,2022-11-19 This book constitutes the refereed proceedings of the 9th International Conference on Future Data and Security Engineering FDSE 2022 held in Ho Chi Minh City Vietnam during November 23 25 2022 The 41 full papers including 4 invited keynotes and 12 short papers included in this book were carefully reviewed and selected from 170 submissions They were organized in topical sections as follows

invited keynotes big data analytics and distributed systems security and privacy engineering machine learning and artificial intelligence for security and privacy smart city and industry 4 0 applications data analytics and healthcare systems and security and data engineering **Big Data Intelligence and Computing** Ching-Hsien Hsu,Mengwei Xu,Hung Cao,Hojjat Baghban,A. B. M. Shawkat Ali,2023-04-30 This book constitutes the proceedings of the International Conference on Big Data Intelligence and Computing DataCom 2022 which took place in Denarau Island Fiji in December 2022 The 30 full papers included in this volume were carefully reviewed and selected from 88 submissions The papers detail big data analytics solutions distributed computation paradigms on demand services autonomic systems and pervasive applications Security and Privacy for Next-Generation Wireless Networks Sheng Zhong,Hong Zhong,Xinyi Huang,Panlong Yang,Jin Shi,Lei Xie,Kun Wang,2018-11-22 This timely book provides broad coverage of security and privacy issues in the macro and micro perspective In macroperspective the system and algorithm fundamentals of next generation wireless networks are discussed In micro perspective this book focuses on the key secure and privacy techniques in different emerging networks from the interconnection view of human and cyber physical world This book includes 7 chapters from prominent international researchers working in this subject area This book serves as a useful reference for researchers graduate students and practitioners seeking solutions to wireless security and privacy related issues Recent advances in wireless communication technologies have enabled the large scale deployment of next generation wireless networks and many other wireless applications are emerging The next generation of mobile networks continues to transform the way people communicate and access information As a matter of fact next generation emerging networks are exploiting their numerous applications in both military and civil fields For most applications it is important to guarantee high security of the deployed network in order to defend against attacks from adversaries as well as the privacy intrusion The key target in the development of next generation wireless networks is to promote the integration of the human cyber and physical worlds Previous work in Cyber Physical Systems CPS considered the connection between the cyber world and the physical world In the recent studies human involvement brings new channels and initiatives in this interconnection In this integration process security and privacy are critical issues to many wireless network applications and it is a paramount concern for the growth of next generation wireless networks This is due to the open nature of wireless communication and the involvement of humans New opportunities for tackling these security and privacy issues in next generation wireless networks will be achieved by leveraging the properties of interaction among human computers and things
