Roman Economy Studies In Ancient Economic And Administrative History:

The Roman Economy, 1974 **Зборник радова Византолошког института**, 1980 **The Upside of Down**
Thomas Homer-Dixon, 2010-04-16 Environmental disasters Terrorist wars Energy scarcity Is this the world's fate a downward spiral that ultimately spells the collapse of society Perhaps says acclaimed author Thomas Homer Dixon or perhaps these crises can actually lead to renewal for ourselves and planet earth The Upside of Down takes the reader on a mind stretching tour of societies management or mismanagement of disasters over time From the demise of ancient Rome to contemporary climate change this spellbinding book analyzes what happens when multiple crises compound to cause what the author calls synchronous failure But crisis doesn't have to mean total calamity Through catagenesis or creative bold reform in the wake of breakdown it is possible to reinvent our future Drawing on the worlds of archeology poetry politics science and economics The Upside of Down is certain to provoke controversy and stir imaginations across the globe The author's wide ranging expertise makes his insights and proposals particularly acute as people of all nations try to grapple with how we can survive tomorrow's inevitable shocks to our global system There is no guarantee of success but there are ways to begin thinking about a better world and The Upside of Down is the ideal place to start thinking Vandals to Visigoths Karen Eva Carr, 2002 Sheds light on settlement patterns in early medieval Spain and demonstrates the local effect of the collapse of Roman Government The Way the Wind Blows Roderick J. McIntosh, Joseph A. Tainter, Susan Keech McIntosh, 2012-07-24 Robert W Harms Yale University *The First Urban Churches 5* James R. Harrison, L. L. Welborn, 2019-11-23 A fresh examination of early Christianity by an international team of New Testament and classical scholars Volume 5 of The First Urban Churches investigates the urban context of Christian churches in first century Roman Colossae Hierapolis and Laodicea Building on the methodologies introduced in the first volume and supplementing the in depth studies of Corinth Ephesus and Philippi vols 2-4 essays in this volume challenge readers to reexamine preconceived understandings of the early church and to grapple with the meaning and context of Christianity in its first century Roman colonial context Features Analysis of urban evidence found in inscriptions papyri archaeological remains coins and iconography Proposed reconstructions of the past and its social religious and political significance A nuanced informed portrait of ancient urban life in the cities of the Lycus Valley *The Poverty of Clio* Francesco Boldizzoni, 2011-07-05 The Poverty of Clio challenges the hold that cliometrics an approach to economic history that employs the analytical tools of economists has exerted on the study of our economic past In this provocative book Francesco Boldizzoni calls for the reconstruction of economic history one in which history and the social sciences are brought to bear on economics and not the other way around Boldizzoni questions the appeal of economics over history which he identifies as a distinctly American attitude exposing its errors and hidden ideologies and revealing how it fails to explain economic behavior itself He shows how the misguided reliance on economic reasoning to interpret history has come at the expense of insights from the humanities and has led to a rejection of valuable

past historical research Developing a better alternative to new institutional economics and the rational choice approach Boldizzoni builds on the extraordinary accomplishments of twentieth century European historians and social thinkers to offer fresh ideas for the renewal of the field Economic history needs to rediscover the true relationship between economy and culture and promote an authentic alliance with the social sciences starting with sociology and anthropology It must resume its dialogue with the humanities but without shrinking away from theory when constructing its models The Poverty of Clio demonstrates why history must exert its own creative power on economics

Time of Troubles Roland Boer, Christina Petterson, 2017-05 Economic realities have been increasingly at the center of discussion of the New Testament and early church Studies have tended to be either apologetic in tone or haphazard with regard to economic theory or both either imagining the ancients as involved in primitive economic relationships or else projecting the modern capitalist preoccupation with markets and the enterprising individual back onto first century realities Roland Boer and Christina Petterson blaze a new trail relying on the expansive work on the Roman economy of G E M de Ste Croix who was relatively uninterested in the New Testament however and on the theoretical framework of the Regulation school Theoretically flexible and responsive to historical data Regulation theory gives appropriate regard to the centrality of agriculture in the ancient world and finds economic instability to be the norm except for brief episodes of imposed stability Boer and Petterson find the Roman world in crisis as slavery expands transforming the agricultural economy so that slave estates could supply the needs of the polis Successive chapters describe aspects of the economic crisis in the first century and turn at last to understand the ideological role played by nascent Christianity

The ^AGreat Wave David Hackett Fischer, 1996-11-07 David Hackett Fischer has gained a reputation for making history come alive even stories as familiar as Paul Revere s ride or as complex as the transit of British culture to America Now he has done it again in The Great Wave a history of price movements and cultural change from the middle ages to the present Fischer examines price records in many nations and finds our great waves of rising prices in the thirteenth sixteenth eighteenth and twentieth centuries All were marked by price swings of increasing volatility falling real wages a growing gap between rich and poor and an increase in violent crime family disintegration and cultural despair Each long wave reached its climax in a period of political revolution demographic contraction and economic collapse Every crisis was followed by sharp deflation and then by a long era of price equilibrium rising real wages falling returns to capital growing equality and accelerating population growth

Aggregate demand increased and another wave began Fischer concludes that we are living in the late stages of the twentieth century price revolution He does not predict what will happen next Rather he ends with an analysis of where we might go from here and what our choices are now
