Developments in Primary Mathematics Teaching Ann Sawyer,2020-03-13 This book originally published in 1993 addresses the issues surrounding the teaching of mathematics in primary school at the time The author considers the issues that had arisen through the introduction of the National Curriculum both in terms of the current state of the art and new developments

The Mathematical Gazette ,1988 Struggle ,1993 **The New Strategic Direction and Development of the School** Brent Davies,Linda Ellison,2003 Schools will not be able to continue to improve unless they move away from an over concentration on the short term and focus on the strategic nature of planning and development The more targets the less the effects what we need is strategy and sustainability This book links school improvement planning and strategic development for leadership enhancement as well as for management accountability Short term planning in the form of target setting plans aimed at improving standards has gained increasing importance While the book agrees that this is necessary it puts forward the view that short term planning is not sufficient for the longer term development of the school
