greyhound racing in America charts the sport's meteoric rise and equally meteoric decline against the backdrop of changes in American culture during the last century Gwyneth Anne Thayer takes us from its origins in coursing in England through its postwar heyday and up to its current state of near extinction Her entertaining account offers fresh insight into the development of American sport and leisure the rise of animal advocacy and the unique place that dogs hold in American life Thayer describes greyhound racing's dynamic growth in the 1920s in places like Saint Louis Chicago and New Orleans then explores its phenomenal popularity in Florida where promoters exploited its remote association with the upper class and helped foster a celebrity culture around it By the end of the century media reports of alleged animal cruelty had surfaced as well as competition from other gaming pursuits such as state lotteries and Indian casinos Greyhound racing became so suspect that even Homer Simpson derided it In exploring the socioeconomic political and ideological factors that fueled the rise and fall of dog racing in America Thayer has consulted participants and critics alike in order to present both sides of a contentious debate She examines not only the impact of animal protectionists but also suspected underworld ties longstanding tensions between dogmen and track owners over racing contracts and the evolving relationship between consumerism and dogs She captures the sport's glory days in dozens of photographs that recall its coursing past or show celebrities like Frank Sinatra and Babe Ruth with winning racing hounds Thayer also records the growth of the adoption movement that rescues ex racers from possible euthanasia Today there are fewer than half as many greyhound tracks in half as many states as there were 10 years ago and half of them are in Florida Thayer's in depth meticulously balanced account is an intriguing look at this singular activity and will teach readers as much about American cultural behavior as about racing greyhounds

Cummins,2013-11-07 When Homo sapiens sapiens met Canis lupus lupus millennia ago the result was Canis lupus familiaris the domestic dog Since that fateful encounter the dog has become arguably humankind s greatest creation The domestic dog is the most widely distributed species other than ourselves in the world being found virtually wherever people live and is also the most diversified of species with literally hundreds of recognized breeds While we have shaped the dog it too has helped shape human history in innumerable ways Our Debt to the Dog is a critical historical and cross cultural examination through the use of case studies of this most improbable 15 000 year relationship and an exploration of how this relationship shaped the history of the world It is also very much an apology to the dog because over the course of the partnership horrific acts were perpetrated against it intentionally and otherwise Our Debt to the Dog enriches our understanding of the dog and extends our appreciation for the profound complexity of past and present human canine relationships and the dog s contributions to our lives and our world [In Dogs We Trust](#) Jacob F. Dogs We Trust is the first comprehensive anthology of American dog literature. It features stories, anecdotes, and poetry that celebrate the many sterling virtues of the canine species. By mining the vast American literary archive of nineteenth and early twentieth century periodicals, Jacob F. Rivers III and Jeffrey Makala reveal the mystique and magic of the human-canine relationship and what they believe is one of the best connections humans have to the mysteries of the natural world. This grand anthology features a rich harvest of fiction and nonfiction in which the canine heroes and heroines think and act in ways that illuminate their unquestioning loyalty and devotion. By taking dog literature seriously, Rivers and Makala believe we can learn more about our animal companions, ourselves, and our national literature. For them, dog literature is American literature; it helps us explore and explain who we are and who we wish to be.

Canines Lauryn E. DeGreeff, Craig A. Schultz, 2022-01-30

Detection canines have been utilized throughout the world for over a century, and while numerous attempts have been made to replicate the canine's ability to detect substances by mechanical means, none has been as successful. The olfactory system is a highly intricate and sophisticated design for chemical sensing, and the olfactory capacity of many animals, including canines, is considered unmatched by machine due to not only their great sensitivity and superior selectivity but also their trainability and mobility. These unique features have led to the use of such animals as whole-animal biosensors. Amplifying the benefits and diminishing the limitations of detection canines, interdisciplinary research is crucial to understanding canine olfaction and detection and enhancing this powerful and complex detector. The past 50 years have produced vast advancements in animal behavior training technology to develop canines into more proficient and reliable sensors, while scientific research has provided tremendous support to help practitioners better understand how to utilize this powerful sensor. This book assembles a diverse group of authors with expertise in a variety of fields relating to detection canines and the chemical sensing industry, including both research and operational perspectives on detection canines. It illustrates how science enhances our understanding of how canines are employed for solving some of the world's leading detection challenges.

Dog's Best Friend? John Sorenson, Atsuko Matsuoka, 2019-11-14

In almost 40 per cent of households in North America, dogs are kept as companion animals. Dogs may be man's best friends, but what are humans to dogs? If these animals' loyalty and unconditional love have won our hearts, why do we so often view closely related wild canids, such as foxes, wolves, and coyotes, as pests, predatory killers, and demons? Re-examining the complexity and contradictions of human attitudes towards these animals, *Dog's Best Friend* looks at how our relationships with canids have shaped and also been transformed by different political and economic contexts. Journeying from ancient Greek and Roman societies to Japan's Edo period to eighteenth-century England, essays explore how dogs are welcomed as family, consumed in Asian food markets, and used in Western laboratories. Contributors provide glimpses of the lives of street dogs and humans in Bali, India, Taiwan, and Turkey, and illuminate historical and current interactions in Western societies. The book delves into the fantasies and fears that play out in stereotypes of coyotes and wolves, while also acknowledging that events such as the Wolf Howl in

Canada's Algonquin Park indicate the emergence of new popular perspectives on canids Questioning where canids belong how they should be treated and what rights they should have Dog's Best Friend reconsiders the concept of justice and whether it can be extended beyond the limit of the human species **American Dog** Paula Harrington, 2002 **Empire of Dogs** Aaron Skabelund, 2011-12-15 In 1924 Professor Ueno Eizaburo of Tokyo Imperial University adopted an Akita puppy he named Hachiko Each evening Hachiko greeted Ueno on his return to Shibuya Station In May 1925 Ueno died while giving a lecture Every day for over nine years the Akita waited at Shibuya Station eventually becoming nationally and even internationally famous for his purported loyalty A year before his death in 1935 the city of Tokyo erected a statue of Hachiko outside the station The story of Hachiko reveals much about the place of dogs in Japan's cultural imagination In the groundbreaking *Empire of Dogs* Aaron Herald Skabelund examines the history and cultural significance of dogs in nineteenth and twentieth century Japan beginning with the arrival of Western dog breeds and new modes of dog keeping which spread throughout the world with Western imperialism He highlights how dogs joined with humans to create the modern imperial world and how in turn imperialism shaped dogs' bodies and their relationship with humans through its impact on dog breeding and dog keeping practices that pervade much of the world today In a book that is both enlightening and entertaining Skabelund focuses on actual and metaphorical dogs in a variety of contexts the rhetorical pairing of the Western colonial dog with native canines subsequent campaigns against indigenous canines in the imperial realm the creation maintenance and in some cases restoration of Japanese dog breeds including the Shiba Inu the mobilization of military dogs both real and fictional and the emergence of Japan as a pet superpower in the second half of the twentieth century Through this provocative account Skabelund demonstrates how animals generally and canines specifically have contributed to the creation of our shared history and how certain dogs have subtly influenced how that history is told Generously illustrated with both color and black and white images *Empire of Dogs* shows that human canine relations often expose how people especially those with power and wealth use animals to define regulate and enforce political and social boundaries between themselves and other humans especially in imperial contexts
