

A large, weathered stone tablet stands upright in a vast desert landscape. The tablet is covered in ancient, stylized script, possibly cuneiform or a similar early writing system. The desert floor is composed of sand with distinct, wavy ripples. In the background, there are rolling sand dunes under a bright blue sky with wispy white clouds. The lighting suggests a sunny day, with shadows cast across the sand.

Endangered Languages Sarah G. Thomason, 2015-04-23 An introduction to language endangerment What is it How and why does it happen Why should we care *Extinct Languages* Johannes Friedrich, 2021-10-26 A noted linguist examines extinct languages from Egyptian hieroglyphs to the mysteries of as yet undeciphered writings in this scholarly work While certain ancient languages were passed down continuously through the ages many others were ignored for centuries When scholars began to decipher these extinct languages in the early nineteenth century they uncovered previously inaccessible riches of knowledge and history Yet much work remains to be done on undeciphered scripts that continue to tantalize and perplex us today In *Extinct Languages* linguist Johannes Friedrich guides readers through the fascinating world of recovered systems of writing including Egyptian and Hittite hieroglyphs Babylonian cuneiform and others He also explains the methodology and principles behind the deciphering process that will one day crack ancient mysteries such as the Indus Valley script **Endangered Languages in the 21st Century** Eda Derhemi, Christopher Moseley, 2023-02-24 *Endangered Languages in the 21st Century* provides research on endangered languages in the contemporary world the challenges still to be faced the work still to be done and the methods and practices that have come to characterize efforts to revive and maintain disadvantaged indigenous languages around the world With contributions from scholars across the field the book brings fresh data and insights to this imperative but still relatively young field of linguistics While the studies acknowledge the threat of losing languages in an unprecedented way they focus on cases that show resilience and explore paths to sustainable progress The articles are also intended as a celebration of the 25 years work of the Foundation for Endangered Languages and as a parting gift to FEL's founder and quarter century chair Nick Ostler This book will be informative for researchers instructors and specialists in the field of endangered languages The book can also be useful for university graduate or undergraduate students and language activists The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *Lessons from Documented Endangered Languages* K. David Harrison, David S. Rood, Arienne Dwyer, 2008-09-11 This volume represents part of an unprecedented and still growing effort to advance coordinate and disseminate the scientific documentation of endangered languages As the pace of language extinction increases linguists and native communities are accelerating their efforts to speak remember record analyze and archive as much as possible of our common human heritage that is linguistic diversity The window of opportunity for documentation is narrower than the actual lifetime of a language and is now rapidly closing for many languages represented in this volume The authors of these papers unveil newly collected data from previously poorly known and endangered languages They organize highly complex linguistic facts paradigms affixes vowel patterns while pointing out the theoretically challenging aspects of these Beyond this they reflect on the social and human dimensions discussing particular problems of nostalgia and modernity memory and forgetting and

obsolescence and ethics while viewing language as not merely data on a page but as a living creation in the minds and mouths of its speakers

Encyclopedia of the World's Endangered Languages Christopher Moseley, 2008-03-10 The concern for the fast disappearing language stocks of the world has arisen particularly in the past decade as a result of the impact of globalization This book appears as an answer to a felt need to catalogue and describe those languages making up the vast majority of the world's six thousand or more distinct tongues which are in danger of disappearing within the next few decades Endangerment is a complex issue and the reasons why so many of the world's smaller less empowered languages are not being passed on to future generations today are discussed in the book's introduction The introduction is followed by regional sections each authored by a notable specialist combining to provide a comprehensive listing of every language which by the criteria of endangerment set out in the introduction is likely to disappear within the next few decades These languages make up ninety per cent of the world's remaining language stocks Each regional section comprises an introduction that deals with problems of language preservation peculiar to the area surveys of known extinct languages and problems of classification The introduction is followed by a list of all known languages within the region endangered or not arranged by genetic affiliation with endangered and extinct languages marked This listing is followed by entries in alphabetical order covering each language listed as endangered Useful maps are provided to pinpoint the more complex clusters of smaller languages in every region of the world The Encyclopedia therefore provides in a single resource expert analysis of the current language policy situation in every multilingual country and on every continent detailed descriptions of little known languages from all over the world and clear alphabetical entries region by region of all the world's languages currently thought to be in danger of extinction The Encyclopedia of the World's Endangered Languages will be a necessary addition to all academic linguistics collections and will be a useful resource for a range of readers with an interest in development studies cultural heritage and international affairs

Endangered Languages Evangelia Adamou, 2024-08-06 A concise accessible introduction to language endangerment and why it is one of the most urgent challenges of our times 58% of the world's languages or approximately 4 000 languages are endangered When we break this figure down we realize that roughly ten percent of languages have fewer than ten language keepers And if one language stops being used every three months this means that in the next 100 years if we do nothing 400 more languages will become dormant In *Endangered Languages* Evangelia Adamou a specialist of endangered languages and a learner of her own community language Nashta offers a sobering look at language endangerment and what is truly lost when a language disappears from usage Combining recent advances from the Western scientific tradition from the fields of linguistics psycholinguistics neurolinguistics language attrition population genetics and natural language processing and insights from Indigenous epistemology theory and ethics Adamou examines a wealth of issues surrounding endangered languages She discusses where endangered languages are found including how they are faring in a digital world why these languages are no longer used and how

communities can reclaim languages and keep them strong Adamou also explains the impact of language continuity on community and individual health and well being the importance of language transmission in cultural transmission and why language rights are essentially human rights Drawing on varied examples from the Wampanoag Nation to Wales *Endangered Languages* offers a powerful reminder of the crucial role every language has in the vitality and well being of individuals communities and our world

Endangered Languages Lenore A. Grenoble, Lindsay J. Whaley, 1998-03-26 This book provides an overview of the issues surrounding language loss It brings together work by theoretical linguists field linguists and non linguist members of minority communities to provide an integrated view of how language is lost from sociological and economic as well as from linguistic perspectives The contributions to the volume fall into four categories The chapters by Dorian and Grenoble and Whaley provide an overview of language endangerment Grinevald England Jacobs and Nora and Richard Dauenhauer describe the situation confronting threatened languages from both a linguistic and sociological perspective The understudied issue of what beyond a linguistic system can be lost as a language ceases to be spoken is addressed by Mithun Hale Jocks and Woodbury In the last section Kapanga Myers Scotton and Vakhtin consider the linguistic processes which underlie language attrition

Language Diversity Endangered Matthias Brenzinger, 2015-07-31 This book presents a comprehensive overview of endangered languages with a global coverage It features such well known specialists as Michael Krauss Willem F H Adelaar Denny Moore Colette Grinevald Akira Yamamoto Roger Blench Bruce Connell Tapani Salminen Olga Kazakevich Aleksandr Kibrik Jonathan Owens David Bradley George van Driem Nicholas Evans Stephen A Wurm Darrell Tryon and Matthias Brenzinger The contributions are unique in analysing the present extent and the various kinds of language endangerment by applying shared general indicators for the assessment of language endangerment Apart from presenting the specific situations of language endangerment at the sub continental level the volume discusses major issues that bear universally on language endangerment The actual study of endangered languages is carefully examined for example against the ethics and pragmatics of fieldwork Practical aspects of community involvement in language documentation are discussed such as the setting up of local archives and the training of local linguists Numerous case studies illustrate different language shift environments with specific replacing factors such as colonial and religious conquests migrations and governmental language education The book is of interest to students and scholars of linguistics with particular focus on endangered languages and their documentation typology and sociolinguistics as well as to anthropologists and language activists

Endangered Languages of the Caucasus and Beyond , 2016-11-01 According to UNESCO it is believed that at least half of the nearly 7 000 languages spoken around the world will cease to be used within the next 100 years If this issue is neglected people will lose not only their cultural heritage but also invaluable understandings about the history of all humankind *Endangered Languages of the Caucasus and Beyond* includes the manuscripts of 19 papers that were presented at the 1st International CUA Conference on Endangered Languages organized

by the Caucasus University Association CUA at Ardahan Turkey on 13 to 16 October 2014 The articles address issues such as the state of the field of documentation conservation and revitalization of endangered languages with special reference to the endangered languages in the Caucasus region and beyond *Lost Languages from the Mediterranean* Jan G. P. Best, Fred C.. Woudhuizen, 1989 *Endangered Languages and New Technologies* Mari C. Jones, 2014-12-04 At a time when many of the world's languages are at risk of extinction the imperative to document analyse and teach them before time runs out is very great At this critical time new technologies such as visual and aural archiving digitisation of textual resources electronic mapping and social media have the potential to play an integral role in language maintenance and revitalisation Drawing on studies of endangered languages from around the world Europe Asia Africa and North and South America this volume considers how these new resources might best be applied and the problems that they can bring It also reassesses more traditional techniques of documentation in light of new technologies and works towards achieving a practicable synthesis of old and new methodologies This accessible volume will be of interest to researchers in language endangerment language typology and linguistic anthropology and to community members working in native language maintenance

Creating Orthographies for Endangered Languages Mari C. Jones, Damien Mooney, 2017-08-31 Creating an orthography is often seen as a key component of language revitalisation Encoding an endangered variety can enhance its status and prestige In speech communities that are fragmented dialectally or geographically a common writing system may help create a sense of unified identity or help keep a language alive by facilitating teaching and learning Despite clear advantages creating an orthography for an endangered language can also bring challenges and this volume debates the following critical questions whose task should this be that of the linguist or the speech community Should an orthography be maximally distanced from that of the language of wider communication for ideological reasons or should its main principles coincide for reasons of learnability Which local variety should be selected as the basis of a common script Is a multilectal script preferable to a standardised orthography And can creating an orthography create problems for existing native speakers

Historical Linguistics and Endangered Languages Patience Epps, Danny Law, Na'ama Pat-El, 2021-07-28 This collection showcases the contributions of the study of endangered and understudied languages to historical linguistic analysis and the broader relevance of diachronic approaches toward developing better informed approaches to language documentation and description The volume brings together perspectives from both established and up and coming scholars and represents a globally and linguistically diverse range of languages The collected papers demonstrate the ways in which endangered languages can challenge existing models of language change based on more commonly studied languages and can generate innovative insights into linguistic phenomena such as pathways of grammaticalization forms and dynamics of contact driven change and the diachronic relationship between lexical and grammatical categories In so doing the book highlights the idea that processes and outcomes of language change long held to be universally relevant may be more sensitive to cultural and

typological variability than previously assumed Taken as a whole this collection brings together perspectives from language documentation and historical linguistics to point the way forward for richer understandings of both language change and documentary descriptive approaches making this key reading for scholars in these fields *Framing Sustainability in Language and Communication* Maida Kosatica, Sean P. Smith, 2025-03-31 This collection brings together established and emerging scholars for a critical framing of sustainability through the lens of language and communication social semiotics and media studies The volume underscores the importance of re envisioning sustainability around not only climate change and biodiversity loss but in broader systems of ecological social and economic imbalances on a global scale The book begins with a visual essay which provides a semiotic foundation for understandings of sustainability across disciplinary approaches in the chapters that follow Subsequent chapters are organized around four thematic parts reframing sustainability in a colonial world the semiotics of sustainability communicating sustainability in everyday life and sustainability communication in the arts A closing commentary by Crispin Thurlow offers critical reflections on sustainability within language and communication research and beyond This book will be of interest to scholars addressing sustainability across diverse disciplines including language and communication social semiotics linguistic anthropology environmental communication media studies and development studies *Engaging Native American Publics* Paul V. Kroskrity, Barbra A. Meek, 2017-07-14 *Engaging Native American Publics* considers the increasing influence of Indigenous groups as key audiences collaborators and authors with regards to their own linguistic documentation and representation The chapters critically examine a variety of North American case studies to reflect on the forms and effects of new collaborations between language researchers and Indigenous communities as well as the types and uses of products that emerge with notions of cultural maintenance and linguistic revitalization in mind In assessing the nature and degree of change from an early period of salvage research to a period of greater Indigenous self determination the volume addresses whether increased empowerment and accountability has truly transformed the terms of engagement and what the implications for the future might be **An Areal Typology of Agreement Systems** Ranko Matasović, 2018-05-24 The first areal typological exploration of agreement systems in the world's languages **The ^AOxford Handbook of Endangered Languages** Kenneth L. Rehg, Lyle Campbell, 2018-07-18 The Oxford Handbook of Endangered Languages in 39 chapters is a comprehensive resource on endangered languages It broadens understanding of language endangerment language documentation and language revitalization and in doing so encourages further research and support for endangered languages **Archaeology and Language** Colin Renfrew, 1990-01-26 In this book Colin Renfrew directs remarkable new light on the links between archaeology and language looking specifically at the puzzling similarities that are apparent across the Indo European family of ancient languages from Anatolia and Ancient Persia across Europe and the Indian subcontinent to regions as remote as Sinkiang in China Professor Renfrew initiates an original synthesis between modern historical linguistics and the new archaeology of cultural process

boldly proclaiming that it is time to reconsider questions of language origins and what they imply about ethnic affiliation issues seriously discredited by the racial theorists of the 1920s and 1930s and as a result largely neglected since Challenging many familiar beliefs he comes to a new and persuasive conclusion that primitive forms of the Indo European language were spoken across Europe some thousands of years earlier than has previously been assumed *Endangered Languages of Austronesia* Margaret Florey,2010 This book explores the challenges to linguistic vitality confronting many minority languages in the highly diverse and geographically far flung Austronesian language family The contributions bring together Indigenous language activists and academic researchers with a long standing commitment to language documentation

Africa's Endangered Languages Jason Kandybowicz,Harold Torrence,2017-07-10 This book examines the endangered languages of Africa from both documentary and theoretical perspectives highlighting the threats of extinction many of them face and the challenges and implications each bring to bear on linguistic theory It focuses on the symbiosis between documentary and theoretical methodologies and its consequences for the preservation of endangered languages both in the African context and more broadly
