San Representation Keyan Tomaselli, Michael Wessels, 2017-12-22 The San or Bushmen of southern Africa have exerted a fascination over generations of writers and scholars from novelists and anarchists to ethnologists and geneticists and also occupy a special place in the popular imagination as the First People and the contemporary remnant of spiritual and natural man The ways in which particular groups of people from southern Africa have been traditionally categorised and positioned as objects of scrutiny by a range of academic disciplines is increasingly being contested and questioned There is a growing awareness of the cultural economic and genetic entanglement of the peoples of the region This book examines how San and Khoe people are represented by others as well as by those who identify as San or Khoe The book interrogates the ways in which disciplines through their methodologies and ways of authorising knowledge not only discover or reveal knowledge but produce it in ways that involve complex and often ambiguous relationships with power structures and forms of intellectual symbolic and cultural capital One major trend that emerges is that the San and Khoe can no longer be seen as people of the past but have to be acknowledged as contemporary and socially situated individuals and communities who are increasingly contesting the representations which others have imposed on them This book was originally published as a special issue of Critical Arts A Journal of South North Cultural and Media Studies

Perfumery Steve Van Toller, George H. Dodd, 2013-04-17 THE SENSE OF SMELL The nose is normally mistakenly assumed to be the organ of smell reception It is not The primary function of the nose is to regulate the temperature and humidity of inspired air thereby protecting the delicate linings of the lungs This is achieved by the breathed air passing through narrow passageways formed by three nasal turbinates in each nostril The turbinates are covered by spongy vascular cells which can expand or contract to open or close the nasal pathways The olfactory receptors innervated by the 1st cranial nerve are located at the top of the nose There are about 50 million smell receptors in the human olfactory epithelia the total size of which in humans is about that of a small postage stamp with half being at the top of the left and half at the top of the right nostril The receptive surfaces of olfactory cells are ciliated and extend into a covering layer of mucus There is a constant turnover of olfactory cells Their average active life has been estimated to be about 28 days

The Man Who Found the Maya Steven Frimmer, 2010 Starting as a typical tourist John Lloyd Stephens developed into an adventurous traveler and popular author hailed as our greatest travel writer Then he blossomed into an intrepid explorer who found over forty sites of the virtually forgotten Maya pioneering archaeology in the Americas and rescuing from obscurity a lost civilization His incredible travels first in Europe the Near East and the Holy Land and then in the jungles of Central America and Mexico mark him as a kind of nineteenth century Indiana Jones How he transformed from the wandering tourist who scrawled his name on ancient monuments to the dedicated discoverer whose theories about the Maya were often years ahead of the scholars is as fascinating as the exploits he chronicled in his books Based largely on Stephens's own writings this biography presents the man in the widely different settings that marked his colorful career the society of his beloved nineteenth century New York the forbidding desert of Arabia plague ridden Constantinople and the uncharted mountains and steaming jungles where the hidden Maya temples and cities lay under centuries of almost impenetrable vegetation Readers will see through Stephens's eyes the hieroglyphic covered temples of ancient Luxor the hidden city of Petra carved out of

living rock and the moment he comes upon the walls of Copan one of the great moments in archaeology From his childhood in a booming young New York City to his years as a lawyer dabbling in politics to his travels and his four successful books about those travels to his subsequent career as a businessman Stephens was a fascinating figure and an interesting one to read about STEVEN FRIMMER is a retired editor with more than thirty years experience in book publishing and is the author of three previously published books on archaeology **Music in a New Found Land** Wilfrid Mellers,1967 **The Whole Works of the Late Reverend Thomas Boston, of Ettrick** Thomas Boston,1849 **The Whole Works of the Late Reverend and Learned Mr. Thomas Boston, Minister of the Gospel at Etterick** Thomas Boston,1849 Commentary on the International and Uniform Lessons National Baptist Convention of the United States of America. Webber,2004 Ray Harryhausens animated creatures sparkled with predatory alertness and subtle quirks of behavior that stamped each with a distinct and memorable personality His use of stop motion animation a method of animating movable models and puppets brought dinosaurs and monsters to life on the silver screen Many animators and special effects wizards like Phil Tippett of Jurassic Park and Jim Aupperle of Planet of Dinosaurs who are still working on prehistoric based films openly credit Ray Harryhausen as having influenced their careers His films are famous for being among the very best of the genre The first chapter of this book chronicles Harryhausens formative years and work on numerous 16mm experiments beginning with his viewing of King Kong in 1933 The next four chapters cover his four feature length dinosaur films The Beast from 20 000 Fathoms The Animal World One Million Years B C and The Valley of Gwangi These chapters provide extensive information about all aspects of the staging of their stop motion content and many additional facets of the overall production process The paleontological accuracy of his saurians from a modern perspective is also examined A chapter on his work and experiences in the 1970s and beyond discusses potential dinosaur projects as well as The Golden Voyage of Sinbad which is not a saurian film but does include the bat winged homunculus An appendix covers a number of dinosaur related films that Harryhausen had a hand in
