place and an idea **Paradox Lost** Michael Huemer, 2018-06-28 Paradox Lost covers ten of philosophy's most fascinating paradoxes in which seemingly compelling reasoning leads to absurd conclusions. The following paradoxes are included: The Liar Paradox in which a sentence says of itself that it is false. Is the sentence true or false? The Sorites Paradox in which we imagine removing grains of sand one at a time from a heap of sand. Is there a particular grain whose removal converts the heap to a non-heap? The Puzzle of the Self-Torturer in which a series of seemingly rational choices has us accepting a life of excruciating pain in exchange for millions of dollars. Newcomb's Problem in which we seemingly maximize our expected profit by taking an unknown sum of money rather than taking the same sum plus 1000. The Surprise Quiz Paradox in which a professor finds that it is impossible to give a surprise quiz on any particular day of the week but also that if this is so then a surprise quiz can be given on any day. The Two Envelope Paradox in which we are asked to choose between two indistinguishable envelopes and it is seemingly shown that each envelope is preferable to the other. The Ravens Paradox in which observing a purple shoe provides evidence that all ravens are black. The Shooting Room Paradox in which a deadly game kills 90% of all who play yet each individual's survival turns on the flip of a fair coin. Each paradox is clearly described, common mistakes are explored, and a clear logical solution offered. Paradox Lost will appeal to professional philosophers, students of philosophy, and all who love intellectual puzzles.
