Regional Capitals Past Present Prospects:

Regional Capitals Pim Kooij, P. H. Pellenburg, 1994 **Towns, Regions and Industries** Jon Stobart, Neil Raven, 2005-06-04 Focusing on the Midlands this book examines urban and industrial change from 1700 1830 arguing that a complex urban system and its individual constituents both responded to and shaped wider processes of industrialisation the nature of urban and indu 'Whither regional studies?' Andy Pike, 2013-09-13 Regional studies are at a vibrant conjuncture Regions continue to provide a conceptual and analytical focus for often overlapping concerns with economic social political cultural and ecological change In the context of increased interest in inter and multi disciplinary approaches regions remain an arena in which synthesis across disciplines economics geography planning politics and sociology can take place Yet recent work has raised fundamental questions about how we think about and research regions and regional change development governance and regulation First emergent conceptual ideas have introduced new thinking about space place and scale that interprets regions as unbounded relational spaces This work has disturbed notions of regions as bounded territories and questioned hierarchical systems of scale through more complex multi scalar approaches Second research methodology has grown in sophistication and sensitivity but remains somewhat polarised between the binaries of positivist often quantitative and more theoretically diverse typically qualitative approaches Last regional governance policy and politics are wrestling with the conceptual methodological and political complexities of new modes and geographies of governance and emergent multi agent and multi level institutional architectures This book brings together important voices in regional studies to contribute to and reflect upon these current issues and debates While we are at an early stage in beginning to think through what such conceptual theoretical methodological governance policy and political innovations and developments mean for regional studies the magnitude and resonance of such issues underpin the vitality of research on the region This book was published as a special issue of *Regional Studies* **Regional Economic Change in Europe** Gert-Jan Hospers, 2004 In this era of ongoing globalization a coherent vision on Europe's changing geo economy is more important than ever before Drawing on the work of Schumpeter Fourastié and Perroux the book at hand offers a new and policy oriented perspective on regional economic change in Europe Conceptually it develops a middle range theory by extending Schumpeter's vision with a sectoral and spatial dimension This neo Schumpeterian framework is concretized by exploring fifty years of structural change in Sardinia the Ruhrgebiet and the resund European Cities in the Modern Era, 1850-1914 Friedrich Lenger, 2012-08-17 In *European Cities in the Modern Era 1850-80 1914* Friedrich Lenger offers an account of Europe's major cities in a period crucial for the development of much of their present shape and infrastructure **Integrated Spatial and Transport Infrastructure Development** Hansjörg Drewello, Bernd Scholl, 2015-09-16 The challenge of growth in transport especially in freight transport and scarce resources in money landscape and local opposition against new infrastructure investment require new solutions from transport policy This book deals with these issues taking as an example the transport corridor

Rotterdam Genoa one of the most heavily used in Europe In 2010 the INTERREG project Code24 with partners from five European countries started with the aim to develop a transnational strategy to strengthen and to develop the corridor The main objective was to accelerate and jointly develop the transport capacity of the entire corridor by ensuring optimal economic benefits and spatial integration while reducing negative impacts on the environment at local and regional level These issues are highlighted in the book from an interdisciplinary perspective taking into account spatial economic environmental and political aspects **Regional Development Strategies** Jeremy Alden, Philip Boland, 2013-10-18

Regional development strategies have become the focus of attention in many countries in the 1990s This textbook provides a conceptual theoretical and empirical analysis of regional development strategies within a European context It examines the various regional development strategies which are currently being pursued within the regions of Europe defined in its loosest term to include East and West The book describes how many different European regions are attempting to reduce regional disparities by engaging themselves in coherent and focused regional development strategies and there is also private sector approach to regional economic development There are many case studies from Europe and from other parts of the world including Japan thereby providing lessons that different countries and regions can learn from each other **The City's**

Hinterland Keith Hoggart, 2016-03-16 Despite the fact that the rural commuter belts of cities are major loci of population change economic growth and dynamic social change within city regions most research tends to ignore this area while focusing on the built up city core However with the current emphasis on the role of rural areas in policy debates it is vital to recognize the importance of the commuter belt By comparing four major European cities in England France Germany and Spain this book offers the first comparative investigation of the dynamism of city rural hinterlands It assesses whether rural areas will become effectively integrated into quality of life improvements as a result of their inter dependencies with cities focusing on the critical arenas of employment change housing and service provision In doing so it investigates how change in these three fields impact on the quality of life and physical environment of rural hinterlands The Artisan and the

European Town, 1500-1900 Geoffrey Crossick, 2016-12-05 Artisans played a central role in the European town as it developed from the Middle Ages onwards Their workshops were at the heart of productive activity their guilds were often central to the political and legal order of towns and their culture helped shape civic ritual and the urban order These essays which have all been specially written for this collection explore the relationships between artisans and their towns across Europe between the beginning of the early modern period and the end of the 19th century They pay special attention to the processes of economic juridical and political change that have made the 18th and early 19th centuries a period of such significance Written by leading historians of European artisans the essays question the myths about artisans that have long pervaded research in the field The leading myth was that shared by the artisans themselves the myth of decline and the belief in each generation that artisans in the past had inhabited a better age These essays open up for debate the nature of

artisanship the way economic change affected craft production the political role of artisans the cultural identification of the artisans with work and masculinity and the way changing urban society and changing urban structure posed threats to which the artisans had to respond Albert Steenge,Alexander Vogel,2002-01-01 Creative Urban Milieus Martina Hessler,Clemens Zimmermann,2008 Creative Urban Milieus is an interdisciplinary examination of the historical relationship between culture and the economy in such cities as Berlin New York Helsinki London Venice and many others The Netherlands and the Dutch Eduardo F. J. De Mulder,Ben C. De Pater,Joos C. Droogleever Fortuijn,2018-07-28 This book presents a geographical survey of the Netherlands reviewing recent and historic developments that made the nation It is a relatively wealthy country and the Dutch belong to the happiest and healthiest on earth But these qualities are not evenly spread over the country The urban agglomeration of Randstad Holland in the west hosts most of the nation s capital and young well educated people whereas older and less educated people are concentrated in the peripheral areas in the north east and south Interactions between physical and human geographical aspects of the Netherlands are described quite extensively Its position on one of Europe s most prominent deltas its abundance of energy resources and the course of history have all contributed to its present national position and international networks But early and recent Dutch have also shaped this country They reclaimed lakes and shallow seas protected the lowlands against floods re allotted land parcels and designed and developed urban areas Besides its focus on water related topics the book also covers social and cultural aspects The book also discusses future challenges and offers scenarios for solutions This is a book for those interested in a wide variety of recent aspects of the geography of the Netherlands described in a historical context It appeals to students and researchers of many disciplines in geography urban and landscape planning water management history and cultural studies

Norwich Since 1550 Carole Rawcliffe,2004-11-01 Norwich remained the second largest city in England until the eighteenth century Its history over the last 450 years is one of exceptional interest Norwich since 1550 is a full account of the post medieval history of the city and covers all aspects of Norwich life including its population housing churches and chapels politics work education arts architecture and medical care It brings out Norwich s individuality and shows how it became the city it is today While Norwich changed and developed in many ways over the centuries its textiles could not compete with those of the northern boom towns of the Industrial Revolution Instead it found a role as a regional and banking capital

Germany's Urban Frontiers Kristin Poling,2020-09-29 In an era of transatlantic migration Germans were fascinated by the myth of the frontier Yet for many they were most likely to encounter frontier landscapes of new settlement and the taming of nature not in far flung landscapes abroad but on the edges of Germany s many growing cities Germany s Urban Frontiers is the first book to examine how nineteenth century notions of progress community and nature shaped the changing spaces of German urban peripheries as the walls and boundaries that had so long defined central European cities disappeared Through a series of local case studies including Leipzig Oldenburg and Berlin Kristin Poling reveals how

Germans on the edge of the city confronted not only questions of planning and control but also their own histories and futures as a community

Historical Dictionary of the Netherlands Joop W. Koopmans, Arend H. Huussen Jr., 2007-05-22 The Netherlands frequently but erroneously called Holland is one of the most densely populated countries in the world In the past few decades it has been undergoing many transformations made possible by its dynamic and fast moving political landscape It has shifted from fierce nationalism toward a self image of tolerance and permissiveness the national identity and self consciousness has slowly eroded through decolonization and immigration Unfortunately several murders of prominent controversial politicians have started yet another shift away from tolerance and economic stagnation has bred pessimism Nonetheless despite many trials and tribulations there has been real progress and the Dutch have perhaps done a better job of coming to terms with their limitations than many others in the world The second edition of the Historical Dictionary of the Netherlands contains more than 700 cross referenced dictionary entries on individual topics spanning the Netherlands political economic and social system along with short biographies on important figures who have shaped the Netherlands history Supplementing the entries are a list of acronyms and abbreviations a chronology an introduction appendixes and a bibliography making this a superb quick reference on the Netherlands

Parallel Lives Revisited Jozefien De Bock, 2018-01-31 Postwar Mediterranean migration to the city of Ghent Integration processes of immigrants in the local labour market and the workplace Immigrant workers relations with colleagues and employers Integration processes of immigrants in the local housing market and the neighbourhood Immigrants social relations with neighbours Quantitative appendix List of interviews

The Construction of Built Heritage G.J. Ashworth, 2017-11-22 This title was first published in 2002 Employing a range of case studies from three northern European countries England Sweden and The Netherlands this captivating book explores the process of heritage conservation from theoretical initiation to practical expression It traces the threads from the origination of conservation ideas by innovative individuals their adoption by voluntary groups identified with particular conservation aims to the inclusion of conservation policies in national legislation and international convention A common cultural heritage underpins the diffusion of ideas across different systems within a similar time scale The ideas have been assimilated and adopted to differing degrees providing the opportunity for questioning both the strength and purpose in heritage conservation and the influence of the social and political context This will be a stimulating read for an international audience of conservationists heritage policy makers conservation architects planners and developers urban design and planning scholars and European and cultural studies academics

City Spaces - Tourist Places Bruce Hayllar, Tony Griffin, Deborah Edwards, 2010-08-31 Over the last decade commentaries and research on urban tourism precincts have predominantly focused on their role in the tourism attractions mix their physical and functional forms their economic significance their role as a catalyst for urban renewal their evolution and associated development processes and perhaps more broadly their role locality and function within the context of urban planning City Spaces Tourist Places both

consolidates and develops the extant knowledge of urban tourism precincts into a coherent research driven contemporary work It revisits and examines the foundational literature but more importantly engages with aspects of precinct development that have previously been either underdeveloped or received only limited consideration such as the psychological and socio cultural dimensions of the precinct experience Written by an international team of contributors it provides the reader with A comprehensive analysis of foundational theory and cutting edge advances in the knowledge of the precinct phenomenon An examination of previously underdeveloped topics and themes based on contemporary and ground breaking research Typological and theoretical frameworks in which to locate precinct form function and experience Brilliantly edited to ensure theoretical continuity and coherence City Spaces Tourist Places is vital reading for anyone involved in the study or planning of urban tourism precincts

The Emergence of European Trade Unionism Jean-Louis Robert, 2018-01-18 The Emergence of European Trade Unionism examines the pre 1914 development of trade unions in different European countries including France Germany Britain and The Netherlands Part one examines trade unionism in the iron steel and textile industries as well as the Dockers unions in the ports of London A variety of locations is considered large to medium towns and textile and machine making cities Part two continues with assessments of major aspects of industrial relations in these countries Collectively the essays provide a fresh reassessment of Western European trade unionism in the four decades before the First World War By taking such an overtly comparative position in terms of subject matter geographical coverage and approach the book offers intriguing insights and unusual perspectives into the national international and transnational themes that run through the history of early twentieth century trade unionism

Shaping Medan Dirk Aedsge Buiskool, 2024-12-02 The City of Medan on Sumatra emerged from the large scale plantation industry The plantations were characterized by harsh labor conditions and frequently described as an area of suppression and struggle In contrast the city of Medan itself maintained a relatively harmonious atmosphere A significant factor contributing to this harmony was the influence of nine Chinese businessmen This book featuring previously unpublished archival materials and interviews explores the contributions of these prominent Chinese figures to Medan s economic social healthcare and politics
