Regional Economic Growth Smes And The Wider Europe:

Regional Economic Growth, SMEs and the Wider Europe B. Fingleton, Ayda Eraydn, Raffaele Paci, 2017-11-22 This title was first published in 2003 This work intends to make an important and interesting contribution to the wider debate on European regional development It looks beyond the confines of the EU proper and combines interesting and relevant case studies from a broader pan European perspective Also the approaches adopted are informed by a variety of theoretical positions By addressing the changing roles of SMEs in different regions of Eastern Europe readers should gain insights into the different dimensions of SME development and the link between SMEs and regional growth

Economic Growth in the Regions of Europe Sascha Sardadvar, 2011-01-12 Although interest in spatial growth regressions has been growing in recent years formal theoretical approaches that acknowledge the role of space in economic growth have been sparse In particular in a regional context the assumption of independent non interacting closed economies can lead to misinterpretations This book fills the void by discussing neoclassical growth theory in a spatial context in order to examine growth both theoretically and empirically in a system of N regional economies A formal model is presented that allows for interregional fixed capital relocations which are in turn determined by the economies relative locations in space It is shown how initial endowments with human capital play a decisive role regarding the evolution of output and how both convergence and divergence processes may occur Using a spatial econometric model specification the theoretical model is tested empirically for 255 European regions

Local Economies and Global Competitiveness B. Dallago, C. Guglielmetti, 2010-12-10 The globalized economy depends on local and context specific factors This edited volume addresses local global nexuses via case studies of global interactions in developed and developing areas and of particular firms approaches to these issues The chapters build up a prospectus on how best to create globally capable localities

Regions and Innovation Policies in Europe Manuel González-López, Bjørn T. Asheim, 2020-04-24 Offering a novel contribution within the growing field of regional innovation policies this book combines recent theoretical developments and empirical contributions with a particular focus on non core regions Leading academics in the field discuss the topics of regional path transformation place based strategies and policy learning Also included are sections on the role of EU institutions on the promotion of regional innovation and the analysis and comparison of the innovation policies experiences of four non core European regions

Lagging Regions in the European Union Paweł Dobrzański, 2024-09-02 Unequal distribution of income is one of the most important socio economic issues The processes of globalisation and integration are accelerating economic growth however at the same time imbalances between regions are growing Reducing inequalities within regions and national economies as well as around the world is important for individual and societal well being and cohesion and for effective state policies This book investigates the problem of left behind regions in the European Union EU It first introduces the reader to the theories of regional imbalances and problems with measuring them It then explores imbalances in the EU using a variety

of indicators and describes the EU's regional policy for reducing regional disparities. It uses an empirical shift share analysis to assess the productivity of EU regions which are lagging behind. The book also provides an empirical analysis of the effectiveness of EU funds in increasing labour productivity performed with DEA methodology. This book can be used as a teaching resource for undergraduate and postgraduate students and can serve as reference material for academics and researchers as well as policymakers at the European, national and local levels. *Economic Growth and Cohesion Policy Implementation in Italy and Spain* Mattia Casula, 2020-05-20. This book concerns EU Cohesion Policy and the economic convergence of underdeveloped regions in Italy and Spain from the first programming period to the present. It investigates the political and institutional factors that determine the success or failure of implementing EU Cohesion Policy at national and sub-national level as well as their impact on economic growth. On the wave of the American tradition of development studies, this book suggests that public policy analysis can be fruitful for understanding economic growth and cohesion if it were to reconstruct domestic public interventions for development and the institutional characteristics of the subjects responsible for pursuing development goals. To do so, this book derives its theoretical foundations from the traditional debate on the role of state actors in promoting economic development and on the institutional characteristics that the public authorities involved in the process of economic development should display. More precisely, by adopting an Hirschmanian approach to development, it elaborates an original framework to compare different Cohesion Policy implementations and to understand its economic results in different countries using Italy and Spain as pilot studies. *The Impact of European Integration on Regional Structural Change and Cohesion*, **The Impact of European Integration on Regional Structural Change and Cohesion** Christiane Krieger-Boden, Edgar Morgenroth, George Petrakos, 2008-03-31. Edited by three European editors and spanning across Europe, this excellent study focuses on the effects of the European integration process on the inter-regional division of labour in both western and Eastern European countries. Using extensive empirical analysis of the changes of regional specialization over a period of two decades, observing its *Promotion of business transfers in the Baltic Sea Region* Max HogeForster, Christian Wildt, 2021-09-21. The ageing of society does not stop at company owners. More and more companies have to be handed over to the new generation. This process is a challenge for all parties involved. The support of business transfer assistance is just as essential for the European economy as the promotion of start-ups because both are critical to the development of the European economy. Over 450 000 firms with over two million jobs are transferred to a new owner in the EU 28 each year. Around one third of these transfers fail and the companies are closed. The future growth and sustainability of innovative companies in the Baltic Sea Region are severely limited by failed business transfers. Furthermore, due to a lack of available and appropriate successors, many firms are liquidated rather than transferred. This publication is part of the project INBETS www.inbets.eu, which highlights the background to the current situation of business transfers in the Baltic Sea Region and proposes a policy program to promote business successions and open up

new target groups of potential successors Part financed by the European Union European Development Fund and European Neighbourhood and Partnership Instrument within the INBETS project This publication does not necessarily reflect the opinion of the European Commission

Teoría de las condiciones y los servicios generales de la producción Gustavo Garza, Jaime Sobrino, Normand Asuad, Carola Conde, Conrado Jiménez, 2013-06-17 La economía política de la urbanización asume que las condiciones generales de la producción constituyen el determinante histórico fundamental de la concentración espacial del capital En este libro primero de una trilogía sobre el tema se extiende esa categoría proponiendo la existencia del binomio condiciones y servicios generales de la producción como un concepto más adecuado para comprender las aglomeraciones metropolitanas contemporáneas En la primera parte de la obra se analiza la evolución de dicha categoría dentro de la teoría del capital su desarrollo histórico mundial como andamiaje infraestructural así como su definición tipológica y características En la segunda parte se inicia un estudio empírico sobre el vínculo de la infraestructura con la competitividad urbana y principalmente la cuestión de su financiamiento en el caso de la Ciudad de México

Ex-ante Evaluation of the Investment Priorities for the National Development Plan 2007-2013 Edgar L. W. Morgenroth, John Fitzgerald, 2006 Evaluates the level and focus of public investment at both the macroeconomic level and through detailed microeconomic analysis

Regional Externalities Wim Heijman, 2007-03-07 Wim Heijman Wageningen University The Netherlands E-mail wim.heijman@wur.nl Generally speaking externalities occur when a decision causes uncompensated costs or benefits to individuals or groups other than the persons making the decision Examples of negative externalities are numerous in the area of the environment and natural resources Some negative externalities result because a particular type of manufacturing technology is used e.g. water and air pollution caused by industry Other negative externalities occur because of the transportation system e.g. air pollution caused by intensive car traffic Though positive externalities draw less attention than negative externalities their existence is obvious for example beekeepers who provide unpaid pollination services for nearby fruit growers or the positive network effects of a telephone system The more people who own a telephone the more useful the device is for each owner Boardman et al 2001 From a social planner's perspective the existence of externalities results in an economic process outcome that is not socially optimal because marginal costs of the product involved do not equal its price This implies that in a well functioning market economy negative externalities cause too much of a product to be produced whereas positive externalities cause too little of a product to be produced

Cities between Competitiveness and Cohesion Peter Ache, Hans Thor Andersen, Thomas Maloutas, Mike Raco, Tuna Taşan-Kok, 2008-04-29 This book offers a cross European analysis of urban and regional strategies of reconciling welfare and competitiveness It develops an understanding of the strategy challenge to reconcile competitiveness with cohesion and provides an analysis of cities and regions as actors in multi level governance settings The book offers a European comparative view on housing labour markets enterprises ethnic issues gender dimensions urban development projects transport and sustainability
