Culture & Agriculture, 2007 *Culture and Economy* Ullrich Kockel, 2019-07-17 This title was first published in 2002 For many regions culture is considered the only viable resource they have for economic development Neo liberalist economics has become the dominant paradigm across a wide range of cultural contexts while the cultural contingency of this paradigm itself has been obscured In offering an empirically grounded anthropological critique of these issues the volume makes an original contribution to the international debate on culture and economy The case studies shed light on everyday practices used to establish culture s economic value and concepts of culture and economy employed by policy decision makers are scrutinized through studies of strategies and policies at various levels Aspects of economy such as the market are examined as cultural constructs in a historical context Illustrated by international case studies the volume provides a compelling and insightful survey of the theories and practices that shape the polyvalent relationships between culture and economy in the twenty first century *Everyday Culture in Europe* Máiréad Nic Craith, 2016-04-15 This book discusses the history and contemporary practice of studying cultures at home by examining Europe s regional or small ethnologies of the past present and future With the rise of nationalism and independence in Europe ethnologies have often played a major role in the nation building process The contributors to this book offer case studies of ethnologies as methodologies showing how they can address key questions concerning everyday life in Europe They also explore issues of European integration and the transnational dimension of culture in Europe today and examine how regional ethnologies can play a crucial part in forming a wider European ethnology as local participants have experience of combining identities within larger regions or nations

boundaries within the issue of the construction of Europe In the first part historians and anthropologists from various national traditions discuss the process of the construction of Europe and its implications for cultural identities The second section examines a number of topics at the core of the process of Europeanization and presents up to date information on each of these issues political parties regions football cities the Euro ethnicity heritage and European cinema Emphasis is placed on the political structuring of cultural identities by contrasting top down and bottom up processes that define the tensions between the unity and diversity of the European Community **Journal of Economic Literature** ,2002 A
