The Regional Economic Integration A comparative study of Central Asian and South Asian Regions This book has been acknowledged as an exhaustive research on Economic Integration between Central Asia and South Asian as well as within the regions This book has given an idea that both the regions are complementary to each other having a lot of potential in all growing sectors To harness this potential efficiently both the regions should cooperate with each other Economic benefits might help in diluting some political problems existing within the regions War devastating countries by Economic Integration could yield maximum benefits in the European Union then why not these regions could do so History is witnessed that these regions enjoy same social and culturalties while engaging in trade activities Author has made extensive efforts to highlight the benefits of economic integration for development and prosperity of both the regions

The Experience with Regional Economic Cooperation Organizations Johannes F. Linn,2008 Since the collapse of the Soviet Union Central Asia has witnessed repeated efforts to strengthen regional integration through cooperation with the establishment of a number of regional organizations with Central Asian participation In this paper we review the experience with regional cooperation initiatives and organizations in Central Asia and the rest of the world Using a typology of regional organizations that we have developed for this paper we review the functions and performance of selected regional organizations and compile evidence more generally on the experience with regional cooperation around the globe Based on this we draw some lessons to help Central Asian countries their partners and their regional organizations respond effectively to the opportunities and challenges of regional cooperation and integration Central Asian countries need to realize that effective cooperation is not easy It takes time and requires a flexible constructive approach of all major partners It also requires effective leadership by key countries institutions and individuals and a careful selectivity for membership and for the mandate of the organization Where multiple regional organizations overlap in membership and mandate it is essential to address the risk of costly duplication The paper concludes with an assessment of the specific implications for the Central Asia Regional Economic Cooperation Program CAREC *Strengthening Central Asia Regional Economic Cooperation, 2007-2009*

Economic Cooperation in the Wider Central Asia Region Martin Raiser,Anton Dobronogov,2006-01-01 This paper explores ways to unlock the potential for regional development and economic cooperation in the wider Central Asia region It argues that understanding critical clusters of interrelated issues and explicitly taking into account geopolitical and political economy considerations are key in this regard Regional countries and other stakeholders should focus on a few areas where there are real prospects for success in the short run a combination of modest win win initiatives and in some cases bold strokes that augment and change the distribution of benefits and hence make cooperation more likely to deliver progress

Economic Integration in Central Asia Regional Economic Cooperation Member Countries Muhammad Ayub Mehar Khan,2020 The nexus of the modes of financing trade and transport related infrastructure quantum of trade activities and economic growth is the core area of this paper It covers the impacts of regional economic integration of Central Asia Regional Economic Cooperation CAREC member countries on their trade and GDP growth Though several bilateral and multilateral agreements to boost mutual trade are considered as a measure of economic integration in the absence of high quality physical infrastructure of transport and logistic services the implementation of such agreements is not possible So the provision of good trade and transport related logistic services has been taken as a key indicator of integration among the countries in the region The role of the magnitudes and modes of financing in determining the provision of logistic services and transport related infrastructure has also been covered in the study The results emphasize the causal relations between trade and transport related infrastructure and GDP growth The most important conclusion is the identification of short term external borrowing as the most effective mode of financing The study does not recommend long term external borrowing or multilateral borrowing for the development of trade and transport related infrastructure The strong significant and robust impact of the share of short term borrowing in total external debt on GDP growth exports and infrastructure development indicates the pressure on policy makers and economic managers to utilize resources effectively and efficiently The global financial architecture should focus on the provision of short term lending facilities to improve the efficiency of developing projects
